# CHICAGO COLLEGE OF LAW.

The Law Department of Lake Forest University.  
ATHENÆUM BUILDING.

## FACULTY:

|                                                                                                 |                                                                     |
|-------------------------------------------------------------------------------------------------|---------------------------------------------------------------------|
| HON. THOMAS A. MORAN, LL.D.—<br>Late Justice of Appellate Court, First<br>District of Illinois. | HON. S. P. SHOPE—<br>Ex-Justice of Supreme Court of Illinois.       |
| HON. M. M. SHEPARD—<br>Justice of Appellate Court, First District<br>of Illinois.               | HON. O. N. CARTER—<br>Judge of County Court of Cook County.         |
| HON. EDMUND W. BUREE—<br>Judge of Circuit Court of Cook County.                                 | HON. JOHN GIBBONS, LL.D.—<br>Judge of Circuit Court of Cook County. |
| ADELBERT HAMILTON, LL. B.<br>'DARIUS H. FINGREY, LL. D.                                         |                                                                     |
| ELMER E. BARRETT, LL. B., Secretary.                                                            |                                                                     |

Sessions are held each week-day evening in the Athenæum Building.

Two and three year course.

Students qualified for admission to the bar in any state. Can be self-supporting while studying.

Degree LL. B. on those successfully completing the three-year course.

For further information address the Secretary.

ELMER E. BARRETT, LL. B.,  
Room 1501, 100 Washington Street.

## A PHENOMENAL COMPANY.

# Northwestern Life Assurance Company

OF CHICAGO, FOUNDED 1874.

**It is Without a Peer!!** Assets \$274 for every \$100 of liability—more than double the ratio of any legal reserve company, great or small.

**Most Remarkable!!** Over \$20,000,000 of death claims paid, more than \$1,200,000 of which were *paid out of its expense funds*—something of which no other insurance organization in America can boast.

**And Yet** its income for expense purposes has been, and is, far below that of any old-line company and less than that of most natural premium companies—a record of economy unparalleled.

JAMES A. STODDARD, Manager,  
Home Insurance Building, CHICAGO, ILL.

DANIEL J. AVERY, President.

CHARLES A. CAPWELL, Secretary.

## "THE UNPUBLISHED COOKING LORE

of all parts of this vast country," says the Boston Globe, "has been culled and sifted and put together in THE CHICAGO RECORD COOK BOOK. The volume is unique in that it shows how a family may live well at small expense." Mailed postpaid on receipt of \$1.00 by THE CHICAGO RECORD, 181 Madison-st., Chicago.

## CIRCULATION THE CHICAGO RECORD.

1881.

The omission of the circulation figures for December is due to going to press before the end of the month. The current figures for the year will be given in a subsequent edition of the Almanac.

## "One of the Cheapest Good Things

of the present day," says the American Grocer, New York, "is THE CHICAGO RECORD COOK BOOK. There is a menu for every day, with recipes gathered from housekeepers in all parts of the United States. It aims to furnish directions for good living adapted to the means of people with moderate incomes. It furnishes instructions for variety in diet, paying due reference to differences in tastes and desires." Mailed postpaid on receipt of \$1.00 by THE CHICAGO RECORD, 181 Madison street, Chicago.

## Suggestions

For The Daily News Almanac for 1899.

*Purchasers of THE DAILY NEWS ALMANAC are invited to send suggestions for its improvement to the Editor of The Chicago Daily News Almanac, 123 Fifth Avenue, Chicago.*

# R. HOE & CO.'S

## QUADRUPLE NEWSPAPER

# PERFECTING PRESS

THE CHICAGO DAILY NEWS HAS NOW IN OPERATION  
TEN OF THESE MACHINES.

Each prints and delivers, folded and counted, newspapers at the rate of:

**48,000 4, 6 or 8 Pages per hour.**

**24,000 10, 12, 14 or 16 Pages per hour.**

**12,000 20 or 24 Pages per hour.**

We manufacture Rotary Perfecting Presses of all sizes and for every variety of work, suited to the smallest as well as the largest circulation, also for the finest quality of magazine and book work.

Our Combined Newspaper and Color Perfecting Presses can be found in operation in many offices, also separate Color Perfecting Presses, printing in five colors and doing the best half-tone work.

Full particulars as to these and our other machines—Lithographic, Stop-Cylinder, and all other kinds of Flat-Bed Presses—also special machinery, and Printers', Lithographers', Electrotypers' and Stereotypers' materials will be furnished upon application to

**R. HOE & CO., 504 Grand-st., New York.**

**Also Mansfield Street, Borough Road, London, England.**

## PREFACE.

The year 1898 was one of the most interesting and important in the history of the United States and of the world. It was the year that witnessed the war between this country and Spain, in which the achievements of our army and navy astonished the entire world; the destruction of Spanish sovereignty in the West Indies; the loss to Spain of her colonial power in the Pacific; the annexation of the Republic of Hawaii to the United States; the first steps in a movement for the dismemberment of China; the rapid growth of a sentiment among the Jews looking to their return to Palestine; the initiative having for its object the disarmament of Europe; the disastrous culmination of the most gigantic wheat speculation in the history of commerce; the almost total absorption of the continent of Africa by the European powers; the obliteration of the last remnant of sectional feeling between the northern and southern portions of this country; the election of a new congress, and many other less important events that will be lasting in their bearing on our national history.

THE DAILY NEWS ALMANAC for 1899 has made every effort to cover all these various subjects and to deal with the facts involved in a fair and wholly impartial manner. The articles on the Philippines, Puerto Rico, Cuba, the Mariana islands and Hawaii are prepared with the purpose of giving the reader a concise and accurate view of their people, products, trade and commerce that will show their present and prospective importance. The section devoted to the war with Spain deals exclusively with the facts as they have been established, leaving to general history the speculations and opinions that have grown out of it.

Much important and valuable statistical matter has been added to the departments of agriculture, education and finance, while the army and navy have been given an enlarged space devoted to the increased importance of these branches of the national government.

The election returns are full, accurate and complete, showing the trend of political preferences in each of the states and territories, and no pains have been spared to make THE DAILY NEWS ALMANAC for 1899 of permanent value to its possessors.

January 1, 1899.

NOTE.—The time given in this Almanac is local mean time, except when otherwise indicated.

## ECLIPSES.

In the year 1899 there will be five eclipses, three of the Sun and two of the Moon.

I.—A Partial Eclipse of the Sun, January 11. Invisible here. Visible to the extreme North-western portion of Alaska, and to the greater portion of the North Pacific Ocean.

II.—A Partial Eclipse of the Sun, June 8. Not visible here; but visible to Great Britain, France, Germany, Denmark, Norway, Sweden, and all the Polar Regions.

III.—A Total Eclipse of the Moon, June 22-23. Invisible here; but visible generally: the beginning, in the eastern portions of Asia and throughout the Pacific Ocean, and the western portions of North America; and the end, in Asia, the middle and western Pacific Ocean, and the eastern portions of Africa.

IV.—An Annular Eclipse of the Sun, December 2. Not visible here. Visible to a portion of New Zealand, the extreme Southwestern part of Australia, and to a great portion of the South Pacific and Indian Oceans. The line of Annulus passes almost exactly through the South Pole.

V.—A Partial Eclipse of the Moon, December 16, occurring as follows:

| STANDARD                  | EASTERN           | CENTRAL           | MOUNTAIN         | PACIFIC          |
|---------------------------|-------------------|-------------------|------------------|------------------|
| Moon enters Penumbra..... | 16d. 5h. 33m. A.  | 16d. 4h. 33m. A.  | 16d. 3h. 33m. A. | 16d. 2h. 33m. A. |
| Moon enters Shadow.....   | 16d. 6h. 45m. A.  | 16d. 5h. 45m. A.  | 16d. 4h. 45m. A. | 16d. 3h. 45m. A. |
| Middle of Eclipse.....    | 16d. 8h. 26m. A.  | 16d. 7h. 26m. A.  | 16d. 6h. 26m. A. | 16d. 5h. 26m. A. |
| Moon leaves Shadow.....   | 16d. 10h. 7m. A.  | 16d. 9h. 7m. A.   | 16d. 8h. 7m. A.  | 16d. 7h. 7m. A.  |
| Moon leaves Penumbra..... | 16d. 11h. 19m. A. | 16d. 10h. 19m. A. | 16d. 9h. 19m. A. | 16d. 8h. 19m. A. |

First contact of shadow 66 degrees from North point of the Moon's limb toward the East.  
Magnitude of Eclipse — 0.996. (Moon's diameter — 1.0.)

## THE FOUR SEASONS.

| SEASON.     | Begins.                       | Lasts.           | D. H. M. |
|-------------|-------------------------------|------------------|----------|
| Winter..... | December 21, 1898, 0:59 P.M.  | .....            | 89 0 47  |
| Spring..... | March 20, 1899, 1:46 P.M.     | .....            | 92 20 00 |
| Summer..... | June 21, 1899, 9:46 A.M.      | .....            | 98 14 43 |
| Autumn..... | September 23, 1899, 0:29 A.M. | .....            | 88 42 27 |
| Winter..... | December 21, 1899, 6:56 P.M.  | Common Year, 385 | 5 57     |

## EMBER DAYS.

|               |            |                |            |
|---------------|------------|----------------|------------|
| February..... | 22, 24, 25 | September..... | 20, 22, 23 |
| May.....      | 24, 26, 27 | December.....  | 20, 22, 23 |

## MORNING AND EVENING STARS.

MERCURY will be Morning Star about January 11, May 10, September 5 and December 25; and Evening Star about March 24, July 22 and November 16.

VENUS will be Morning Star until September 16; and then Evening Star the rest of the year.

JUPITER begins as Morning Star and continues as such till April 25, after which he appears as Evening Star until November 13, and then as Morning Star to the end of the year.

## CHURCH DAYS AND CYCLES OF TIME.

NOTE.—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example: To know on what day of the week July 4 was in the year 1856, in the table of years look for 1856, and in a parallel line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

\*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3-18 were omitted).—This Calendar is from W. H. Laker's London Almanack, with some revisions.

## IMPORTS OF MERCHANDISE WITH RATE OF DUTY.

For the fiscal year ended June 30, 1898, compared with the corresponding period of 1897.

## THE COTTON CROP AND PRICES.

The phenomenally low price of cotton recently reported, said to be the lowest point reached in many years, lends special interest to a series of tables just compiled by the treasury bureau of statistics, showing the remarkable increase in cotton production and coincidental fall in price. These tables show that the United States, the chief cotton producer of the world, has quadrupled her cotton production since 1872, and that the price of cotton in the same

period has fallen to about one-fourth that which prevailed in that year. In 1872 the cotton crop of the United States is shown to have been 1,384,084,494 pounds, with an average price of 22.19 cents per pound. In 1898 the crop is reported at 5,647,372,061 pounds, with an average price of 6.22 cents per pound. Thus the production of 1898 is more than four times that of 1872 and the average price but a little over one-fourth that of that year.

When it is considered that the other por-

tions of the world that grow cotton have not at all reduced their production meantime it is apparent that the increased cotton supply of the world in the quarter of a century under consideration has been very great and far in advance of the increase in population or consuming power.

Twenty-five years ago the United States produced 70 per cent of the cotton of the world; to-day she produces 85 per cent of the world's cotton. This increase in the percentage has been, not because of a reduction of the cotton produced in other parts of the world, but simply on account of the increase in our own. The cotton supply of the other cotton-producing sections of the world in 1873-3 was 1,667,000 bales and in 1897-8 1,665,000 bales. The average cotton production of other countries from 1872 to 1878 was 1,618,000 bales per annum and from 1890 to 1897 was 1,924,000 bales per annum, showing that there has also been a slight growth in cotton production in other parts of the world, while our own production has been increasing enormously.

Not only has the price of cotton fallen at about the same rate that the production has increased but there has also been a corresponding fall in the price of cloths manufactured from cotton. The reports of the bureau of statistics show that cotton "printing cloths" were quoted at 7.88 cents per yard in 1872, while reports just published show an average rate of 2.17 cents per yard in the cotton year 1898 for the same grade of cloths, the fall in the manufactured article thus having, in this case at least, nearly or quite kept pace with the fall in the price of raw cotton and the increase in production of that article.

It is proper to add that the prices quoted for the earlier years are based upon the currency values of that period, and if reduced to a gold basis would be slightly less. Cotton "printing cloths" whose prices are given in the table are of the quality manufactured for use in printing calicoes and accepted as a standard grade by which prices are constantly quoted:

| Year ended Aug. 31. | Domestic cotton crop. Pounds. | Average price "printing cloths." |         |
|---------------------|-------------------------------|----------------------------------|---------|
|                     |                               | Per lb.                          | Per yd. |

## COMPULSORY SCHOOL LAWS IN THE UNITED STATES.

Twenty-nine states and two territories have passed compulsory school laws defining the ages to which the law shall apply, the annual term of school attendance, and the penalty imposed upon parents or guardians for violation of the law.

(Prepared by the United States bureau of education.)

| STATE.                 | Age.        | Annual period.                                                                                                       | Penalty on parents or guardians.                                                                    |
|------------------------|-------------|----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| Maine.....             | 8-15        | 16 weeks (2 terms of 8 weeks each, if practicable). <sup>*</sup>                                                     | Fine, \$25 (maximum).                                                                               |
| New Hampshire.....     | 6-16        | 12 weeks.....                                                                                                        | Each offense, \$10 (maximum).                                                                       |

\*13 to 16 in secular Sunday schools. †12 to 15 continuation. ‡From 8 until confirmation; in town from 7 until confirmation. §Special dispensation after 7 years' attendance and 1 year's prolongation for ignorance.

## POPULATION OF EUROPE.

According to figures given by *La Revue Française de l'Etranger*, the total population of Europe, by calculations made on the latest census, is 380,000,000, which is a gain of 37,000,000 over that computed January, 1888. Here is a table showing the figures given in the *Revue*:

|                                   |             |
|-----------------------------------|-------------|
| European Russia and Finland ..... | 106,200,000 |
| Germany .....                     | 52,300,000  |
| Austria-Hungary .....             | 43,500,000  |
| United Kingdom .....              | 32,800,000  |
| France .....                      | 38,500,000  |
| Italy .....                       | 31,300,000  |
| Spain .....                       | 18,000,000  |
| Belgium .....                     | 5,500,000   |
| Turkey in Europe .....            | 5,800,000   |
| Roumania .....                    | 5,600,000   |
| Portugal .....                    | 5,000,000   |
| Sweden .....                      | 5,000,000   |
| Holland .....                     | 4,000,000   |

|                   |           |
|-------------------|-----------|
| Bulgaria .....    | 3,000,000 |
| Switzerland ..... | 3,000,000 |
| Greece .....      | 2,400,000 |
| Denmark .....     | 2,300,000 |
| Serbia .....      | 2,300,000 |
| Norway .....      | 2,000,000 |

The density of the population according to each square kilometer (about .386 square mile) is thus reckoned: In Belgium, 230; Italy, 169; Holland, 149; England, 128; Germany, 97; Switzerland, 73; France, 73; Austria, 69; Spain, 36; Russia, 20. While the annual increase of the population of Russia has been 1.45 for every 100 in the last 10 years, that of Germany has been 1.15, of Austria-Hungary .96, of England .35, of Italy .46, of France .08. At this rate of augmentation in 100 years Russia would have 228,000,000 inhabitants, Germany 106,000,000, Austria 79,000,000, England 65,000,000, Italy 44,000,000 and France only 40,000,000.

## COMMERCIAL RATIO OF SILVER TO GOLD EACH YEAR SINCE 1688.

From 1688 to 1832 the ratios are taken from Dr. A. Soetbeer; from 1833 to 1878 from Pixley and Abell's tables; and from 1879 to 1891 from daily cablegrams from London to the bureau of the mint:

| YEAR.    | Ratio. | YEAR.    | Ratio. | YEAR.    | Ratio. | YEAR.    | Ratio. | YEAR.    | Ratio. | YEAR.    | Ratio. |
|----------|--------|----------|--------|----------|--------|----------|--------|----------|--------|----------|--------|

The difference between the amount of money in the country and the amount in circulation represents the money in the treasury. Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in tables for years 1873 to 1891, inclusive; since 1891 they are reported separately.

## GOVERNMENT PAPER CURRENCY IN CIRCULATION.

| JUNE 30. | Legal-tender notes. | Treasury notes 1890. | Currency certificates. | Gold certificates. | Silver certificates. | Total government paper. |

## COINS OF THE UNITED STATES.

Authority for coining and changes in weight and fineness, total amount coined, legal-tender quality.

## GOLD COINS.

*Double Eagles*—Authorized to be coined, act of March 3, 1849; weight, 516 grains; fineness, .900. Total amount coined to June 30, 1897, \$1,357,498,040. Full legal tender.

*Eagles*—Authorized to be coined, act of April 2, 1792; weight, 270 grains; fineness, .910%; weight changed, act of June 28, 1834, to 238 grains; fineness changed, act of June 28, 1834, to .89225; fineness changed, act of Jan. 18, 1837, to .900. Total amount coined to June 30, 1897, \$274,581,286. Full legal tender.

*Half-Eagles*—Authorized to be coined, act of April 2, 1792; weight, 135 grains; fineness, .910%; weight changed, act of June 28, 1834, to 129 grains; fineness changed, act of June 28, 1834, to .89225; fineness changed, act of Jan. 18, 1837, to .900. Total amount coined to June 30, 1897, \$224,370,045. Full legal tender.

*Quarter-Eagle*—Authorized to be coined, act of April 2, 1792; weight, 67.5 grains; fineness, .910%; weight changed, act of June 28, 1834, to 64.5 grains; fineness changed, act of June 28, 1834, to .89225; fineness changed, act of Jan. 18, 1837, to .900. Total amount coined to June 30, 1897, \$28,770,880. Full legal tender.

*Three-Dollar Piece*—Authorized to be coined, act of Feb. 21, 1853; weight, 77.4 grains; fineness, .900; coinage discontinued, act of Sept. 26, 1890. Total amount coined, \$1,619,376. Full legal tender.

*One Dollar*—Authorized to be coined, act of March 3, 1849; weight, 25.8 grains; fineness, .900; coinage discontinued, act of Sept. 26, 1890. Total amount coined, \$19,469,337. Full legal tender.

## SILVER COINS.

*Dollar*—Authorized to be coined, act of April 2, 1792; weight, 416 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 412.4 grains; fineness changed, act of Jan. 18, 1837, to .900; coinage discontinued, act of Feb. 12, 1873. Total amount coined to Feb. 12, 1873, \$8,031,238. Coinage reauthorized, act of Feb. 28, 1878. Coinage discontinued after July 1, 1891, except for certain purposes, act July 14, 1890. Amount coined to June 30, 1897, \$409,024,980. Full legal tender except when otherwise provided in the contract.

*Trade Dollar*—Authorized to be coined, act of Feb. 12, 1873; weight, 420 grains; fineness, .900; legal tender limited to \$5, act of June 22, 1874 (rev. stat.); coinage limited to export demand and legal-tender quality repealed, joint resolution, July 22, 1876; coinage discontinued, act of Feb. 19, 1887. Total amount coined, \$35,965,924.

*Half-Dollar*—Authorized to be coined, act of April 2, 1792; weight, 306 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 292.4 grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 192 grains; weight changed, act of Feb. 12, 1873, to 12.4 grains, or 192.9 grains. Total amount coined to June 30, 1897, \$134,033,136. Legal tender, \$10.

*Columbian Half-Dollar*—Authorized to be coined, act of Aug. 5, 1892; weight, 192.9 grains; fineness, .900. Total amount coined, \$2,501,062.50. Legal tender, \$10.

*Quarter-Dollar*—Authorized to be coined, act of April 2, 1792; weight, 104 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 103.4 grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 96 grains; weight changed, act of Feb. 12, 1873, to 6.4 grains, or 96.45 grains. Total amount coined to June 30, 1897, \$22,335,062. Legal tender, \$10.

*Columbian Quarter-Dollar*—Authorized to be coined, act of March 3, 1893; weight, 96.45 grains;

fineness, .900. Total amount coined, \$10,005.75. Legal tender, \$10.

*Twenty-Cent Piece*—Authorized to be coined, act of March 3, 1875; weight, 5 grams, or 77.16 grains; fineness, .900; coinage prohibited, act of May 2, 1878. Total amount coined, \$271,000.

*Dime*—Authorized to be coined, act of April 2, 1792; weight, 41.6 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 41.24 grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 38.4 grains; weight changed, act of Feb. 12, 1873, to 2.4 grams, or 38.58 grains. Total amount coined to June 30, 1897, \$29,428,613.90. Legal tender, \$10.

*Half-Dime*—Authorized to be coined, act of April 2, 1792; weight, 20.8 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 20.4 grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 19.2 grains; coinage discontinued, act of Feb. 12, 1873. Total amount coined, \$4,880,219.40.

*Three-Cent Piece*—Authorized to be coined, act of March 3, 1851; weight, 12.36 grains; fineness, .750; weight changed, act of March 3, 1853, to 11.32 grains; fineness changed, act of March 3, 1853, to .900; coinage discontinued, act of Feb. 12, 1873. Total amount coined, \$1,282,087.20.

## MINOR COINS.

*Five-Cent (nickel)*—Authorized to be coined, act of May 16, 1866; weight, 77.16 grains, composed of 75 per cent copper and 25 per cent nickel. Total amount coined to June 30, 1897, \$14,302,054.75. Legal tender for \$1, but reduced to 25 cents by act of Feb. 12, 1873.

*Three-Cent (nickel)*—Authorized to be coined, act of March 3, 1865; weight, 30 grains, composed of 75 per cent copper and 25 per cent nickel. Total amount coined, \$941,349.48. Legal tender for 60 cents, but reduced to 25 cents by act of Feb. 12, 1873. Coinage discontinued, act of Sept. 26, 1890.

*Two-Cent (bronze)*—Authorized to be coined, act of April 22, 1864; weight, 96 grains, composed of 95 per cent copper and 5 per cent tin and zinc. Coinage discontinued, act of Feb. 12, 1873. Total amount coined, \$912,020.

*Cent (copper)*—Authorized to be coined, act of April 2, 1792; weight, 264 grains; weight changed, act of Jan. 14, 1793, to 268 grains; weight changed by proclamation of the president, Jan. 26, 1793. In conformity with act of March 3, 1795, to 168 grains; coinage discontinued, act of Feb. 21, 1857. Total amount coined, \$1,562,887.44.

*Cent (nickel)*—Authorized to be coined, act of Feb. 21, 1857; weight, 72 grains, composed of 88 per cent copper and 12 per cent nickel. Coinage discontinued, act of April 22, 1864. Total amount coined, \$2,007,720.

*Cent (bronze)*—Coinage authorized, act of April 22, 1864; weight, 48 grains, composed of 95 per cent copper and 5 per cent tin and zinc. Total amount coined to June 30, 1897, \$8,448,600.48. Legal tender, 25 cents.

*Half-Cent (copper)*—Authorized to be coined, act of April 2, 1792; weight, 132 grains; weight changed, act of Jan. 14, 1793, to 104 grains; weight changed by proclamation of the president, Jan. 26, 1793. In conformity with act of March 3, 1795, to 84 grains; coinage discontinued, act of Feb. 21, 1857. Total amount coined, \$39,926.11.

\*Gold the nominal standard. Silver practically the standard.

†Silver the nominal standard. Paper the actual currency, the depreciation of which is measured by the gold standard.

‡The "British dollar" has the same legal value as the Mexican dollar in Hongkong, the Straits settlements and Labuan.

§The law of February 11, 1895, introduced the gold standard, with an ideal gold peso weighing .569 grams as the monetary unit.

## FAILURES IN THE UNITED STATES.

Quarterly statements of failures and average of liabilities, 1875-1898.  
(From Dunn's Review, New York.)

The only authorized material standard of customary length is the Troughton scale belonging to this office, whose length at 59°.32 Fahr. conforms to the British standard. The yard in use in the United States is therefore equal to the British yard.

The only authorized material standard of customary weight is the troy pound of the mint. It is of brass of unknown density, and therefore not suitable for a standard of mass. It was derived from the British standard troy pound of 1758 by direct comparison. The British avoirdupois pound was also derived

from the latter, and contains 7,000 grains troy.

The grain troy is therefore the same as the grain avoirdupois, and the pound avoirdupois in use in the United States is equal to the British pound avoirdupois.

The British gallon=4.54396 liters.

The British bushel=36.3477 liters.

The length of the nautical mile given above and adopted by the United States Coast and Geodetic Survey many years ago is defined as that of a minute of arc of a great circle of a sphere whose surface equals that of the earth (Clarke's Spheroid of 1866).

By the concurrent action of the principal governments of the world an International Bureau of Weights and Measures has been established near Paris. Under the direction of the International Committee two ingots were cast of pure platinum-iridium in the proportion of 9 parts of the former to 1 of the latter metal. From one of these a certain number of kilogrammes were prepared, from the other a definite number of meter bars. These standards of weight and length were inter-compared, without preference, and certain ones selected as international standards. The others were distributed by lot. In September, 1892, to the different governments and are called national prototype standards. Those apportioned to the United States were received in 1890 and are in the keeping of United States coast and geodetic survey.

The metric system was legalized in the United States in 1866.

The international standard meter is derived from the meter des archives, and its length is defined by the distance between two lines at 0° centigrade, on a platinum-iridium bar deposited at the International Bureau of Weights and Measures.

The international standard kilogramme is a mass of platinum-iridium deposited at the same place, and its weight in vacuo is the same as that of the kilogramme des archives.

The liter is equal to a cubic decimeter, and it is measured by the quantity of distilled water which, at its maximum density, will counterpoise the standard kilogramme in a vacuum, the volume of such a quantity of water being, as nearly as has been ascertained, equal to a cubic decimeter.

## WHEAT CORNER OF 1897-98.

The year 1898 marked the culmination and collapse of one of the most gigantic and spectacular operations in wheat ever inaugurated in this or any other country. The center of activity was Chicago, and the central figure was Joseph Leiter, a resident of that city. Operations were continued over a period of more than ten months, during which it is estimated that nearly 100,000,000 bushels of wheat were traded in by the party in interest, including what is generally known as his "scalping" operations, and the price was advanced from 65 cents at the start to \$1.85 a bushel before the end was reached, a net improvement of nearly \$1.20. The amount of cash wheat handled by one party, the capital involved and the wide interest excited were without precedent. The attention of the whole civilized world was attracted and the Chicago market was constantly watched by the people of all foreign lands, as well as by those of our own.

Prices were pushed to a dizzy height, but the collapse was sudden and disastrous. Joseph Leiter and his immediate following being the principal sufferers, those best informed estimating their losses at nearly, if not fully, \$10,000,000.

Joseph Leiter was a young man of 29, who had never been known as an operator in wheat, and was not even a member of the board of trade; he came of good mercantile stock, however, his father—J. Z. Leiter—having been for many years a leading and successful merchant in Chicago, finally retiring from the business with a large fortune, which was eventually increased to \$30,000,000 or more. The son was thought to have inherited the mercantile instincts of his father, and had already demonstrated in many ways his keen business sagacity. It is claimed, and generally admitted, that when Leiter ventured upon his first operations in wheat nothing was more foreign to his thoughts than the colossal transactions in which he eventually became the directing spirit. The idea of "speculation" he disclaimed from first to last, stoutly contending that he was simply a merchant, and a speculator only in the sense that he expected to sell what he bought at a handsome profit, and without resorting to any of the tricks known to the typical speculator.

A fortunate investment made early in September, 1897, was the humble beginning of the Leiter deal, which did not end until June 13, 1898. From the inception the transactions gradually grew in magnitude until every previous experience in that line was completely overshadowed, and the world watched its development with increasing wonder.

The reasons which led Leiter to think so favorably of wheat were found in the then prevailing conditions the world over, but more especially in Europe, and these he freely made known to the public. He attempted no deception, but openly warned every one of the folly of selling wheat at the then prevailing prices, and he at the same time proceeded to buy freely what the public seemed so greedy to sell, with the result that when the conditions he had foreseen came finally to be generally acknowledged, prices were greatly enhanced and the soundness of his judgment apparently vindicated. The world's crop of wheat in 1897 was

much below the average. England, France, and other countries which found it necessary to import wheat, found also their harvests more than usually deficient; while Russia, India, Argentina and Austria-Hungary—countries which usually raise a large surplus for export—found this surplus greatly curtailed. So with enlarged necessities came diminished supplies, and the problem of feeding Europe soon began to attract attention in America. As figured out statistically, the breadstuffs situation, when the harvests in 1897 were gathered, compared with that of 1896 as follows:

| —Wheat crop (bushels).— |             |             |
|-------------------------|-------------|-------------|
|                         | 1897.       | 1896.       |
| France .....            | 248,000,000 | 337,000,000 |
| Russia .....            | 232,000,000 | 319,000,000 |
| Italy .....             | 88,000,000  | 132,000,000 |
| Austria .....           | 36,000,000  | 41,000,000  |
| Hungary .....           | 93,000,000  | 101,000,000 |
| Roumania .....          | 29,000,000  | 69,000,000  |
| Bulgaria .....          | 25,000,000  | 45,000,000  |
| United Kingdom..        | 54,000,000  | 60,000,000  |

The above-named countries, with the minor ones not named, showed a deficiency in the European wheat production of 1897 of 356,000,000 bushels, as compared with the year previous. To offset this was an increase in the United States of about 120,000,000 bushels and about 20,000,000 bushels in other parts of the world, leaving a net shortage in the world's wheat supply of over 200,000,000 bushels. These figures early attracted Leiter's attention, and he argued openly that they foreshadowed an unusual demand for American wheat, and predicted an astonishing advance in values. So it was not long before he became a heavy buyer—simply as a merchant, he always protested, or as he would buy a piece of real estate when it was offered below its intrinsic value. He was in the market because the inexorable law of supply and demand must eventually enhance the price of wheat. Probably no man ever bought a bushel of wheat with more complete confidence in its legitimate value than did Joseph Leiter in his earlier dealings, and, despite his many disappointments and the serious obstacles he frequently encountered, his faith rarely wavered until the disastrous end of his long campaign was finally reached. In the whole ten months of its continuance he never descended to any of the tricks of the ordinary speculator, nor endeavored to take advantage of the seller by concealing his real purpose; he openly proclaimed himself on the "bull side," warned the trade of the danger of "selling short," and bought without limit whatever was offered for sale. In August, 1897, his presence in the market and his extensive operations began to attract attention; the price was then about 75¢ cents, having sold at 64¢ cents earlier in the season. As his accumulations went on prices were gradually enhanced. When the end of September approached, and the time was near at hand for the delivery of the wheat Leiter had bought for that month's delivery, it was found that there was little here, and to avoid the odium of running a corner he announced his willingness to transfer all his trades to December, but warned the trade that the price would be very much higher when that delivery matured. But the large traders—and especially that class known to

include the elevator interest—were almost uniformly "bears," and, confident that an amateur speculator, as Leiter was acknowledged to be, could not successfully carry through a campaign on the lines he had undertaken, all kept selling heavily, and Leiter kept on buying with equal persistency, prices in the meanwhile continuing to advance steadily.

By this time the world had become deeply interested and everybody was watching the course of prices on the Chicago board of trade, the up turn abroad having kept pace with that in America. As the end of December, 1897, drew near, the stocks of contract wheat in Chicago were found to be greatly depleted and nearly 6,000,000 bushels less than Leiter had bought in the meantime, and which must be delivered to him before the end of the month. Many, considering the situation hopeless for the shorts, settled and paid their differences. But the great elevator proprietors, who, as before stated, were the largest "shorts," determined to get the wheat and deliver it, evidently expecting that the delivery of 6,000,000 to 6,000,000 bushels practically in one lump—and which had to be paid for in cash on delivery—would financially embarrass the daring young operator. For this purpose the northwest was ransacked by the large and wealthy interests which had been caught "short," and wheat was bought wherever it could be found, with little regard to the price, and, favored by unusually open weather, millions of bushels were brought to Chicago by lake from Duluth and by car from Minneapolis. During the last days of December there were delivered to Leiter over 5,000,000 bushels of wheat, which was promptly accepted and paid for in cash, apparently without effort and without any unusual strain on his financial credit. This large delivery, with his other holdings, left Leiter the absolute owner of over 6,000,000 to 10,000,000 bushels of the cereal, though in the meantime he had been sending it forward very liberally to tidewater or to Europe. There was some expectation that the enormous demands made on Leiter's bank account by the delivery of so much property, on which instant payment was demanded, might prove too much of a load for the young speculator; but his father, L. Z. Leiter, promptly came to his assistance with his \$30,000,000 fortune, and his credit soon became practically unlimited.

For a moment Leiter hesitated at this juncture, but his indecision did not last long; he was the owner of a vast amount of grain which he felt forced to protect, and his only course now seemed to be to carry his campaign into May, 1898. At the same time he began those tremendous shipments abroad which soon became the wonder of the trade, and, with a single exception, finally eclipsed anything before known in the history of the grain trade. In order to guard against a repetition of his experience in December, 1897, he extended his operations into the northwest, and before long owned millions of bushels of wheat at Duluth and Minneapolis, in addition to his immense and daily increasing holdings at Chicago. But wheat was still offered freely; the farmers, attracted by the high prices, were selling wherever they had stored, until the interior reserves were well-nigh exhausted everywhere. In the meantime prices had gone up by leaps and bounds, and the foreign markets were keeping pace with

those in this country. Yet Leiter's representatives still stood in the pit and demanded more wheat, though in the meantime his accumulations probably amounted to 20,000,000 bushels—a larger load than any single individual was ever before known to carry. But his faith had not yet begun to waver; "shorts" had become badly frightened, however, and with Leiter's aggressive confidence and the "shorts'" efforts to cover prices continued to soar.

The end of May, 1898, finally came, and Leiter's opponents again disappointed him; they had made the most strenuous exertions; had ransacked the country, and finally succeeded in delivering him 3,000,000 bushels, for which prompt payment was necessary; but his star was still in the ascendant, or at least his financial sky was unclouded, and payment was easily made. By this time, however, his holdings had enlarged to something like 25,000,000 bushels, representing not less than \$30,000,000 in cash—a staggering load for any one but Leiter. Yet, still undaunted, he at once commenced to buy wheat for July delivery, and this move was the beginning of the end. His skies darkened, the load became tiresome, and financial difficulties began to press more or less heavily, and his confident smile had departed. Prices abroad had risen to a point which restricted consumption, and the old world was driven to other markets. Argentina and India had begun to ship their bountiful crops, and the promise for this country for 1898 as well as for the old world generally was most brilliant. Every hour the burden became heavier for the man who had undertaken to fight the whole world. The speculative element fought him with frantic vigor, and every available bushel of wheat on both sides of the ocean was sold, so that the theoretical supplies which Leiter had figured on were enormously exceeded by the actual marketings. The end drew near; it came suddenly. On Monday, June 12, 1898, Leiter found himself with 30,000,000 to 35,000,000 bushels of wheat on hand, his ready cash gone and his credit with the banks shattered by the withdrawal of the financial support of L. Z. Leiter, which he had hitherto had.

Realizing at last the hopelessness of his battle, he struck his colors, threw all the wheat he had bought for July on to the market, and in little more than an hour had divested himself of fully 8,000,000 bushels. The price had also dropped 20 cents a bushel, aggregating fully \$7,000,000 on his entire holdings. The 15,000,000 bushels or more of cash wheat he held in this country and Europe then became a matter of grave concern. A general panic was likely to follow the forced marketing of such a vast amount of property, and to avoid such a calamity it was protected by the banks and finally placed in the hands of trustees to be sold at leisure when shortened supplies might warrant it or circumstances dictate. This eminently wise action prevented the disastrous consequences which would otherwise have followed such a complete collapse and minimized the ruin which might, without such precaution, have followed the Leiter fiasco.

It will no doubt be interesting to trace the course of prices each month during the ten months that Leiter was carrying on his campaign, or from Aug. 1, 1897, to June 12, 1898, comparing them with the current values the same month of the year previous,

the quotations being for cash wheat and embracing the entire range for the month:

| Monthly price cash wheat— |                 |               |  |
|---------------------------|-----------------|---------------|--|
|                           | 1897.           | 1896.         |  |
| August .....              | \$0.74% @ 1.03% | \$0.53 @ .63% |  |
| September .....           | .85% @ 1.01%    | .55 @ .70     |  |
| October .....             | .87% @ .99%     | .65% @ .81%   |  |
| November .....            | .91 @ 1.00%     | .71 @ .94%    |  |
| December .....            | .92 @ 1.09      | .74% @ .83%   |  |
|                           | 1898.           | 1897.         |  |
| January .....             | .89% @ 1.10     | .71% @ .94    |  |
| February .....            | .96 @ 1.08      | .71% @ .81%   |  |
| March .....               | 1.00 @ 1.06%    | .69% @ .90%   |  |
| April .....               | 1.01 @ 1.23%    | .64% @ .97    |  |
| May .....                 | 1.17 @ 1.85     | .68% @ .97%   |  |

The price in June, up to the day of the collapse, had ranged at \$1.05 @ 1.20, and on the day that Leiter threw his holdings overboard the price fell to 85 cents, and a week later had fallen to 75 cents, a loss of \$1.10 from the top figure, \$1.85, which was reached in May.

The advance started wheat to Chicago from all over the country and the receipts were far in excess of what any one had calculated. From September to May, inclusive, the receipts each month compared with the same month the year previous were as follows:

| Cereals wheat a mo.— |          |          |  |
|----------------------|----------|----------|--|
|                      | 1897-98. | 1896-97. |  |
| September .....      | 9,083    | 6,246    |  |
| November .....       | 4,044    | 2,055    |  |
| December .....       | 7,670    | 1,175    |  |
| January .....        | 1,187    | 833      |  |
| February .....       | 1,561    | 558      |  |
| March .....          | 3,352    | 505      |  |
| April .....          | 2,637    | 261      |  |
| May .....            | 7,711    | 303      |  |

Total for 8 months. .37,195

11,961

The exports from this country were also unusually heavy, for as soon as Leiter's operations became well understood not only was there a healthy legitimate foreign demand but Leiter himself was disposed to market his wheat abroad and used every effort to get it across the ocean. The monthly exports from and including January, 1898—when the foreign movement got well under way—to and including June, compare with former years as follows:

| Wheat and flour (bushels).— |            |            |            |
|-----------------------------|------------|------------|------------|
|                             | 1898.      | 1897.      | 1896.      |
| January .....               | 16,653,000 | 11,670,000 | 13,533,000 |
| February .....              | 13,239,000 | 8,151,000  | 11,678,000 |
| March .....                 | 15,520,000 | 7,895,000  | 8,575,000  |
| April .....                 | 16,492,000 | 6,285,000  | 7,722,000  |
| May .....                   | 17,151,000 | 8,774,000  | 8,331,000  |
| June .....                  | 17,771,000 | 7,997,000  | 10,932,000 |
| Total .....                 | 96,826,000 | 40,702,000 | 60,771,000 |

That the Leiter deal was of immense pecuniary benefit to the wheat growers of the world there can be no question, however disastrous it may have been to himself and his financial backers and followers. It created an unusual, even though it was partially fictitious, demand, which greatly enhanced the price. The persistent "short" seller, who had for so many years coined money by depreciating the price, found that he was for a time overmatched, and the wheat "bear" was, for the time being, out of fashion. Leiter's campaign added from 10 cents to 50 cents a bushel to the farmers' staple crop, and, while the aftermath was serious loss or absolute ruin to many, its good effects were felt on thousands of farms and will continue to be for years to come.

## THE ARMIES OF EUROPE.

**AUSTRIA-HUNGARY**—The imperial active army is made up of 13,129 officers, 329,112 men, 60,369 horses and 1,984 guns. Of these 1,642 officers and 23,664 men belong to the Austrian landwehr and 3,355 officers and 24,964 men to the Hungarian landwehr, the remainder (14,133 officers and 281,492 men) comprising the Austria-Hungarian army. The war footing of the empire is estimated at 1,853,837. The Mannlicher rifle is in use.

**BELGIUM**—The active army embraces 3,360 officers, 45,030 men, 9,044 horses and 254 guns. The war strength is estimated at 170,939. On a war footing the army is estimated at about 171,000 men. The Mauser rifle is in use.

**DENMARK**—The Danish active army has 834 officers and 27,720 men. Its war strength is estimated at 117,136. The Krag-Jorgensen rifle is in use.

**FRANCE**—The French active army is composed of 21,963 officers, 540,041 men, 123,000 horses and 3,048 guns. This is divided into 584 battalions of infantry, 448 squadrons of cavalry, 508 field, horse and mountain batteries, 103 batteries of foot artillery, twenty-two battalions of engineers and twenty squadrons of various other branches of the service. The war footing of the army is about 4,949,572. The Lebel rifle is in use.

**GREAT BRITAIN**—The British army consists of 7,721 officers and 213,148 men. This force is divided into 143 battalions of in-

fantry, 124 squadrons of cavalry, eighty-eight field batteries, twenty-two horse batteries, ten mountain batteries, ninety-three companies of garrison artillery, besides sixty-seven bodies of engineers, service and medical corps. The war footing of the army is estimated at 638,000. The army is raised by volunteer enlistments. The Lee-Metford rifle is in use.

**GERMANY**—The imperial active army of Germany consists of 18,750 officers, 528,696 men, 93,301 horses and 3,000 guns and comprises twenty corps. These are divided into 634 battalions of infantry, 465 squadrons (ninety-three regiments) of cavalry, 600 batteries of field and horse artillery, thirty-seven batteries of foot artillery, besides fifty-one battalions of pioneers and other troops. The war footing of the army is estimated at 5,166,582. The Mauser rifle is in use.

**GREECE**—The active army of Greece contains 13,824 infantry, 1,263 cavalry, 2,320 artillery, 6,186 engineers, or a total of 23,529 men. The reserve force is large, on paper, including 98,000 first reserves and 176,000 second reserves, making an estimated war strength of about 297,000 men. The Mannlicher rifle is in use.

**ITALY**—The active army of Italy consists of 10,993 officers, 219,625 men, 34,038 horses and 1,343 guns. These are divided into 283 battalions of infantry, thirty-six battalions

of rifles, twenty-two battalions of Alpini, 144 squadrons of cavalry, 186 batteries of field, sixteen batteries of horse and fifteen batteries of mountain artillery; seventy-six companies of seacoast and fortress artillery, besides forty-one companies of engineers, etc. The war footing embraces 54,407 officers and 2,127,300 men. The Carcano rifle is in use.

**NETHERLANDS**—The Dutch army is made up of 1,630 officers, 62,811 men, 5,290 horses and 120 guns. To this should be added the East Indian troops, about 38,000. There is also the militia, active and sedentary, which brings the total up to 3,786 officers and 191,783 men. The regular army, exclusive of militia, is divided into forty-five battalions of infantry, fifteen squadrons of cavalry, eighteen field and two horse battalions, forty companies of fortress artillery, besides engineer, torpedo, telegraph and other companies. The war strength is put at 234,000.

**PORTUGAL**—The active Portuguese army is made up of 2,543 officers, 25,658 men and 3,985 horses. The estimated war strength is about 100,000 men. The Kropatchek rifle is in use.

**RUSSIA**—The Russian active army consists of 23,700 officers, 893,900 men, 163,000 horses and 3,672 guns, besides 38,000 men classified as non-combatants. These are divided into 487,000 infantry, 112,300 cavalry, 110,444 artillery and 33,900 engineers and the remainder are in other branches of the service. On a war footing the army is estimated at 3,400,000. The Mouzin rifle is in use.

**SPAIN**—The Spanish army before the war with the United States consisted of an act-

ive army of 64,314 infantry, 14,314 cavalry, 11,605 artillery and 5,102 engineers and other troops, making a total of 84,335 men. Besides these were the sanitary troops and administrative troops, 23,790; the West Indian establishment (Cuban and Puerto Rican forces), 201,312, and the Philippine establishment, 37,760. This gives a total of 352,197 as the peace strength of the army. Besides these are the first (160,000 men) and the second (1,000,000) reserves, giving a war footing of about 1,500,000. The Mauser rifle is in use.

**SWEDEN AND NORWAY**—The active army of the kingdom is 40,440 men. The war strength is estimated at 225,440. The Mauser rifle is in use.

**SWITZERLAND**—The active army of the Swiss republic is composed of sixty-nine general staff officers, 103,107 infantry, 3,753 cavalry, 21,633 artillery, 6,356 engineers, 4,980 sanitary troops, 1,530 administrative and 183 cyclists, making a total of 141,666. There are also the first and second reserves. The first includes 79,305 and the second 264,733 men of all classes and branches of the service, making the war strength about 490,000 men. The Schmit-Rubin rifle is in use.

**TURKEY**—The personnel of the sultan's active army comprises about 24,000 officers and 220,000 men, 30,000 horses and 1,453 guns, divided into 318 battalions of infantry, 197 squadrons of cavalry; 169 field, forty-four mountain, eighteen horse and twelve howitzer batteries; 430 companies of dismounted and 234 mounted gendarmes. The war strength is estimated at about 1,500,000 men. The Mauser rifle is in use.

\*Navy statistics are being constantly changed by the building of new ships, and repairing or retiring of old ones.

## PARTITION OF CHINA.

It was not until after the close of the war between China and Japan that the celestial empire attracted the aggressive cupidity of the colonizing nations of Europe. At the close of the so-called opium war in 1841 Hongkong, an island in the mouth of the Canton river, was ceded to Great Britain, and is now one of the strongest naval and military stations of the British empire in Asia, being known as the "Eastern Gibraltar." With this exception the Chinese empire remained practically untouched. The weakness displayed by the Chinese in the war with its insular neighbor and the total want of national coherency among the Chinese people themselves were simply an invitation to the stronger powers of Europe to enrich themselves at the expense of the Chinese empire.

At the close of the war with Japan a treaty was negotiated between the two nations which may be found in full in *The Daily News Almanac* for 1896, page 77, by virtue of which China surrendered to Japan Shashih, in the province of Hupeh; Chungking, in the province of Sze-chuen; Suchow, in the province of Kiangsu; Hangchow, in the province of Chehkiang; the Liau-Tong peninsula, besides the temporary possession of Wei-Hai-Wei, in the province of Shangtung.

Russia, joined by France and Germany, at once interfered to prevent the Japanese occupancy of the Liau-Tong peninsula. Russia took this course for the purpose of keeping open for herself a road through Manchuria and Liau-Tong to an open port on the Pacific, which she might convert into a great military and naval depot, giving her an outlet for the commerce of Siberia, which is becoming of vast size and importance. For centuries Russia has been making an attempt to reach an ice-free port on the Pacific, being blocked from progress for that purpose toward the Atlantic by England, France and Turkey. Russia lost no time in raising her flag at Port Arthur, in the province of Liau-Tong, and on the 27th of March, 1898, she secured from China the cession of that port. It was announced from St. Petersburg that the lease from China under which Port Arthur was held would not injure any foreign nation, but when the compact between Russia and China was published in full it was found that no such construction could be put upon the transaction, for the ports of Talien-Wan and Port Arthur were to be reserved for the exclusive use of Russian and Chinese war vessels, and that the remainder of the territory named in the cession, while open to merchant vessels, was closed to the war vessels of every other nation. France also received concessions in the re-forming of the boundaries of Tonquin which were of substantial benefit to her.

Germany, on the other hand, found that, while she was a party to the dual alliance, she had received little or no recognition from a division of the spoils which followed the breaking of the Japanese treaty. The incident at Yen-Chu-Fu furnished Germany an excuse for seizing a large area of territory. In November, 1897, at the above-named place, in the southern part of the province of Shangtung, a mission established by the German Roman Catholics was attacked by a mob of Chinese, and two missionaries were killed and one was disposed

of in a way yet unknown, while the mission buildings were destroyed. A few days later, on the 6th of November, 1897, a Chinese mob in the city of Wuchung, in the province of Hoo-Pec, made an attack upon the German minister to China and upon the commander of a German gunboat, insulting the German flag as well. Germany was prompt to resent this action, and on the 18th of November, 1897, a German fleet of four war vessels appeared at Kiao-Chau, a strongly fortified port in the province of Shangtung. A force of marines was landed and took a position which commanded the harbor. A demand for the surrender of the harbor was made and the Chinese garrison fled in haste. This was followed by a demand upon the Pekin government for compensation for the previous outrages on the missions and the German minister and officer. The German government demanded the punishment of the persons implicated in the murder of the priests, the rebuilding of the destroyed mission houses, the payment of an indemnity of \$450,000 to the families of the murdered men, together with the payment of a very large sum to meet the expenses of the naval expedition and for the support of a military force at Kiao-Chau.

The Chinese government demanded the evacuation of Kiao-Chau before it would consent to negotiations, which demand the Germans refused to consider. The dispute was finally settled the very last of December, 1897, by China yielding all Germany demanded, giving a lease, in March, 1898, for ninety-nine years, of the territory that Germany had seized.

These movements produced a profound sensation in Europe, and at one time there was every appearance that a general war would follow. Great Britain felt that she had been "tricked" by Russia in the cession of that had been secured from China and in the wider influence the czar had acquired at Pekin; Russia herself did not approve of the transfer of Kiao-Chau to Germany, being desirous of securing that port for her own purposes; Japan felt sorely disappointed at being deprived of nearly all she had gained by her costly war with and complete victory over China, while European nations stepped in and took nearly everything that Japan coveted and had won; Germany, while satisfied with what she had seized, was suspicious that Russia had used her to further the schemes of the czar, while France was fearful of the strenuous opposition of Great Britain to the demands the republic was making in the southern portion of China bordering on Tonquin. Both Russia and France were using all their influence to prevent the loan of \$80,000,000 which China had negotiated in London. Great Britain, which controlled two-thirds of the entire trade of China, felt that she was being deprived of it by means that were unfair even in European diplomacy. Russia was the country that Great Britain was most disposed to criticize for the securing of Port Arthur as the southern terminal of the Siberian railway system, while the transforming of that port into a Gibraltar was calculated to give the czar a dominating influence both in China and Korea, which was a menace to Great Britain's most important commercial interests in Asia. The feeling in Great Britain was still further intensified by the removal of an

Englishman, Mr. Brown, who had been employed to supervise Korean finances, and the appointment of a Russian, Mr. Alexief, in his place, against the protest of Great Britain. Such an appointment would have placed Korea in the hands of Russia. Great Britain followed up her protest against this change by sending a strong fleet to Chemulpo, and the result was that a compromise was effected under which the Korean customs were administered by a joint commission of British and Russian officials. The seizure of the island of Hainan by the French in December, 1897, brought a protest from the British foreign office and a declaration by France that permanent occupation was not designed.

With her enormous interests involved in China, Great Britain could not remain passive to Russia's occupation of Port Arthur, which commanded the Gulf of Pe-chi-li, and, incidentally, the Chinese capital itself. So strongly opposed was the British government to the Russian occupancy that every effort was made to dissuade the czar from his purpose, the government pledging itself not to occupy any port in the gulf if Russia would abandon the Port Arthur scheme. Russia flatly refused to consider the British proposal, and in self-defense a demand was made upon China by the British government for a lease of the port of Wei-Hai-Wei, after it had been evacuated by Japan, which then held it as security for the unpaid war indemnity, and demanded it of China upon the same terms granted to Russia in the cession of Port Arthur. The demand of Great Britain was acknowledged, the indemnity was paid to Japan in May, 1898, and on the 20th of that month the British forces occupied the port.

By this movement Great Britain more than matched Russia, for the port of Wei-Hai-Wei is a more commanding position than Port Arthur. While the latter commands Peking, the former commands the Chinese capital by commanding the Gulf of Pe-chi-li and Port Arthur itself. While Port Arthur is of no value as a commercial point, Wei-Hai-Wei is of importance as a mercantile harbor and is capable of better defense than the Russian naval entrepot. It cannot be denied that in the Gulf of Pe-chi-li Great Britain holds a far stronger naval and commercial position than Russia does.

While these scrambles were going on in northern China, France was strengthening herself along the Tonquin frontier in the south. She acquired the lease of a large bay on the southern coast of China; the right to build a railroad between Tonquin and Yunnan-Fu, in the province of Yunnan, an important point on the road from Kwai-Yung-Fu to the western frontier of

China; a promise from China not to alienate any of the territory in the four southern provinces of the empire, which comprise about one-eighth of the entire domain; an agreement not to transfer to any other power the island of Hainan, which lies off the coast of the French possessions in Tonquin and commands the entire coast, besides some voice in the administration of the Chinese postal service, then under English control. The important part of this agreement to France is the railroad concession to Yunnan-Fu, in the center of that province, which is one of the richest in the Chinese empire. This road ending in French territory will be of inestimable value to France from a commercial point of view.

Of course Great Britain must have concessions in the south to equal those of France, as she had in the north to offset such as had been granted to Russia and Germany. The result was that China leased to Great Britain, for ninety-nine years, about 200 square miles of territory on the mainland north of Hongkong, taking in parts of Mirs bay on the east and Deep bay on the west, as well as the island of Lantau.

While the partition of China is yet in its infancy, it is plainly to be seen that so far British diplomacy and influence have been more than a match for Russian ambition; German greed and French aggression, much as those nations have already secured from China. No nation in Europe has been more fully aware of the inherent weakness of China than Great Britain, and the main desire she has had has been to strengthen her hold on the trade of the fabulously rich valley of the Yang-tse-Kiang, which embraces nearly one-half of the valuable area of the empire. The river is 3,350 miles in length, and drains, with its tributaries, nearly 800,000 square miles of territory, while they together furnish a system of inland waterways about 12,000 miles in length. The eastern portion of this rich valley, the province of Szechuen, borders British Burma. This entire valley is under British influence, while the footholds Great Britain has at Wei-Hai-Wei and Hongkong give her practically the control of the mouth of that mighty stream. With railroads entering this open back door of China, Szechuen, Great Britain can control the trade of the entire Yang-tse basin for its whole distance. In the northern provinces of Shanai and Honan there are immense deposits of coal, and these are controlled by an Anglo-Italian syndicate which has railroad concessions of great value and importance. This, with the financial obligations of China to Great Britain, gives the latter an influence that cannot be overlooked in the discussion of any plan proposed for the dismemberment of the Chinese empire.

### THE PARTITION OF AFRICA.

The scramble among the nations of Europe for colonial possessions in Africa is of comparatively recent origin. While the earliest explorations began in 1563, when a body of British merchants sent out in search of trade a few vessels to Guinea, there was no thought of anything more than an effort to find a new market for English productions. It was more than forty years later, in 1596, that the Dutch followed the English merchants in the attempt to establish a trading

station on the coast of Guinea. About the same time that the British traders began the exploration of the Guinea coast the French set out on the same errand and located at what is now known as French Guinea. Thus at the beginning of the seventeenth century nearly all the portions of Africa that were held by the nations of Europe were the three divisions of the coast of Guinea that were known respectively as British, French and Dutch Guinea.

Even at the end of that century England and France were the principal rivals for African trade, but at the close of the French wars France had lost nearly all her possessions in Africa as well as elsewhere. In this war Great Britain acquired the ascendancy in African affairs, which she stubbornly held for 200 years. Leaving the coast, England pushed into the interior, while France annexed Algeria, Senegambia and Sierra Leone. Generally the partition of Africa went on slowly and peaceably, and it was not until the Brussels conference in 1878 that the unrestrained scramble began that has resulted in the division of the entire continent among the different nations of Europe. Thus in 1876, while Great Britain, France, Spain and Portugal had located colonies on the coast of Africa, the interior was held by the wild tribes that occupied it against all foreign aggression. The Berlin conference in 1878 was the time at which the energetic division of the continent was inaugurated, and at the close of 1890 of the 11,900,000 square miles of territory composing the continent of Africa only some 1,500,000 remained open to seizure by the nations of Europe. There were even then some conflicting claims that had not been settled, as the conflicts between French, German and British interests on the Niger clearly testified. But these, together with the disputes between Portugal and England in the upper Zambesi, have been decided, or are in process of amicable settlement, and it is mainly the claims that arise out of the British occupation of Egypt and the Sudan that still appear to threaten war.

The following table shows the possessions held by each of the European nations, the area of each and the estimated population:

|                          | Area<br>sq. m. | Popula-<br>tion. |
|--------------------------|----------------|------------------|
| Great Britain—           |                |                  |
| Basutoland .....         | 10,293         | 218,902          |
| Bechuanaland .....       | 170,000        | 60,376           |
| Cape Colony .....        | 221,311        | 956,485          |

| Germany—                            |                |                  |
| Cameroons .....                     | 191,130        | 4,570,000        |
| East Africa .....                   | 400,000        | 4,000,000        |
| Southwest Africa .....              | 350,000        | 250,000          |
| Togoland .....                      | 23,160         | 2,500,000        |
| Portugal—                           |                |                  |
| Angola .....                        | 517,200        | 2,500,000        |
| Cape Verde islands .....            | 1,650          | 110,326          |
| Guinea and Bissagos .....           | 14,000         | 800,000          |
| East Africa .....                   | 275,000        | 1,500,000        |
| Italy—                              |                |                  |
| Somaliland and Galla-<br>land ..... | 190,000        | 400,000          |
| Dahlak .....                        | 420            | 2,000            |
| Spain—                              |                |                  |
| Ifni .....                          | 27             | 6,000            |
| Fernando Po .....                   | 850            | 20,000           |
| Sahara coast .....                  | 243,000        | 100,000          |

Omitting area over which only a protectorate is established or maintained, the area owned by these countries in Africa may be roughly estimated as follows: Great Britain, 2,250,000 square miles; France, 3,500,000; Germany, 890,000; Portugal, 900,000; Italy, 600,000, and Spain, 250,000. Besides these possessions there are the Congo Free State, 850,000 square miles; Liberia, 37,000; the Boer republics, 122,640, and unappropriated territory, 1,500,000.

## THE WORLD'S PRODUCTION OF WINE.

According to the Montieur Vinicole, the world's wine production for 1886 and 1897, by countries, was as follows:

| COUNTRIES.                                    | 1897.       | 1896.         | COUNTRIES.               | 1897.         | 1896.         |
|-----------------------------------------------|-------------|---------------|--------------------------|---------------|---------------|
|                                               | Gallons.    | Gallons.      |                          | Gallons.      | Gallons.      |
| France .....                                  | 854,713,420 | 1,179,811,520 | Greece .....             | 55,983,000    | 55,983,000    |
| Algiers .....                                 | 115,402,580 | 107,001,000   | Bulgaria .....           | 28,797,800    | 28,797,800    |
| Tunis .....                                   | 2,377,800   | 2,500,900     | Servia .....             | 21,306,400    | 29,062,000    |
| Italy .....                                   | 665,936,780 | 569,958,600   | Roumania .....           | 85,514,000    | 198,150,000   |
| Spain .....                                   | 510,338,000 | 471,068,600   | United States .....      | 30,303,740    | 17,966,600    |
| Portugal .....                                | 66,050,000  | 86,657,600    | Mexico .....             | 1,586,200     | 1,849,400     |
| Azores, Canary and Ma-<br>delra Islands ..... | 8,605,000   | 8,454,400     | Argentine Republic ..... | 39,044,800    | 42,007,300    |
| Austria .....                                 | 49,556,000  | 66,050,000    | Chile .....              | 73,976,000    | 45,706,600    |
| Hungary .....                                 | 81,704,000  | 43,548,000    | Brazil .....             | 10,308,800    | 12,549,500    |
| Germany .....                                 | 55,498,000  | 82,106,200    | Cape Colony .....        | 5,151,900     | 2,377,600     |
| Russia .....                                  | 66,050,000  | 75,619,000    | Persia .....             | 660,500       | 845,440       |

## DISARMAMENT OF EUROPE—THE CZAR'S DECLARATION.

Following is the text of the note which was handed to the foreign diplomats at St. Petersburg Aug. 24, 1895, by Count Muraviev, Russian minister of foreign affairs, at the dictation of Emperor Nicholas. The czar's proposal in this note of a conference looking to the preservation of peace was the subject of world-wide discussion:

"The maintenance of general peace and the possible reduction of the excessive armaments which weigh upon all nations present themselves in existing conditions to the whole world as an ideal toward which the endeavors of all governments should be directed. The humanitarian and magnanimous ideas of his majesty the emperor, my august master, have been won over to this view in the conviction that this lofty aim is in conformity with the most essential interests and legitimate views of all the powers; and the imperial government thinks the present moment would be very favorable to seeking the means. International discussion is the most effectual means of insuring all peoples benefit—a real, durable peace, above all putting an end to the progressive development of the present armaments. In the course of the last twenty years the longing for general appeasement has grown especially pronounced in the consciences of civilized nations and the preservation of peace has been put forward as an object of international policy. It is in its name that great states have concluded between themselves powerful alliances.

"It is the better to guarantee peace that they have developed, in proportions hitherto unprecedented their military forces, and still continue to increase them without shrinking from any sacrifice. Nevertheless, all these efforts have not been able to bring about the beneficent result desired—pacification. The financial charges following the upward march strike at the very root of public prosperity. The intellectual and physical strength of the nations' labor and capital are mostly diverted from their natural ap-

plication and are unproductively consumed. Hundreds of millions are devoted to acquiring terrible engines of destruction, which, though to-day regarded as the last word of science, are destined to-morrow to lose all their value in consequence of some fresh discovery in the same field. National culture, economic progress and the production of wealth are either paralyzed or checked in development. Moreover, in proportion as the armaments of each power increase they less and less fulfill the object the governments have set before themselves.

"The economic crisis, due in great part to the system of armaments a outrance, and the continual danger which lies in this massing of war material are transforming the armed peace of our days into a crushing burden which the peoples have more and more difficulty in bearing. It appears evident that if this state of things were to be prolonged it would inevitably lead to the very cataclysm it is desired to avert and the horrors whereof make every thinking being shudder in advance. To put an end to these incessant armaments and, to seek the means of warding off the calamities which are threatening the whole world—such is the supreme duty to-day imposed upon all states. Filled with this idea, his majesty has been pleased to command me to propose to all the governments whose representatives are accredited to the imperial court the assembling of a conference which shall occupy itself with this grave problem.

"This conference will be, by the help of God, a happy presage for the century which is about to open. It would converge into one powerful focus the efforts of all states sincerely seeking to make the great conception of universal peace triumph over the elements of trouble and discord, and it would at the same time cement their agreement by a corporate consecration of the principles of equity and right whereon rest the security of states and the welfare of peoples."

## TABLE OF WIND PRESSURES.

Adopted by the English navy. The following table, taken from London Engineering, was prepared by Mr. J. T. Conor, engineer-in-chief of the Portsmouth Dock Yard, and it gives the figures adopted by the English navy for the pressure of the wind due to various velocities. As the velocity table is in English knots, we have added a column of English miles.

| Naut.<br>No. Name of wind. | —Velocity—Force pr. sq. |        |             | Naut.<br>No. Name of wind. | —Velocity—Force pr. sq. |        |             |

## THE CUBAN REVOLT.

From Nov. 1, 1897, to April 25, 1898.

The record of events in the Cuban rebellion, in The Daily News Almanac for 1898, was brought down to Nov. 1, 1898.

Active hostilities were resumed between the insurgent and Spanish forces at the beginning of the winter season. There was no yielding on the part of the rebel leaders, but they were wary and were watching the course of events in the United States, with the expectation that this government would intervene in their behalf. The reports of starvation and suffering in Cuba were so well attested that the American people were rapidly approaching a condition of sentiment which would ultimately force the government to espouse the cause of the Cubans upon humanitarian grounds if upon no other.

On the 8th of November Capt.-Gen. Blanco issued a proclamation of amnesty in the following terms:

"I pardon in full all those who have been prosecuted for the crime of rebellion. Rebels prosecuted for common crimes, independent of rebellion, such as spoliation, immorality and the like, will be pardoned as rebels, but judged for other offenses committed by them."

The proclamation of amnesty had no effect upon the rebels and passed without notice from them. Nor did the offer of autonomy, made by the Spanish government late in October, 1897, have any effect in placating the patriots or satisfying the conservatives. At a mass-meeting of the latter, held Oct. 26, it was unanimously resolved that the conservative party should energetically oppose autonomy and the policy of the Sagasta cabinet. The response of the insurgents to the offer of autonomy was more energetic and pronounced. Toward the end of October a proclamation was issued, signed by Capote, president of the republic of Cuba, and countersigned by Gens. Gomez and Garcia. The document declared that the war would soon end and in proof of the assertion presented the following facts:

1. That the public assembly at Guimarrilla for the election of a new president was duly announced to the whole world in spite of Spain's effort to prevent it.

2. The siege and capture of Victoria de las Tunas.

3. The regular collection of taxes throughout the island, due to complete civil and military organization.

4. The stability of the Cuban government in the free city of Cabañas, continually visited by noted journalists of the United States, England and France, and never by our enemy.

5. The regular arrivals from abroad of war materials, food and medical supplies, and diplomatic and political correspondence, papers, etc.

6. The establishment of diplomatic agencies of the republic of Cuba in the principal countries.

7. That out of 250,000 men sent to Cuba by Spain only 70,000 remain.

8. The lapse of two years and seven months since the glorious Feb. 24, during which time Spain has not been able to reconquer the island, to the astonishment of the great European powers, which cannot understand so long a war in our days.

Spain having at her disposal all the resources of an established power.

9. The impossibility of Spain's floating in Paris, London or Berlin a loan to continue the war in Cuba, and the exhaustion of the Spanish treasury.

10. The daily desertion from the Spanish ranks of her soldiers, the lack of food admitted by the Madrid press, and the fact that the Spanish treasury is eight months in arrears in the pay of her troops.

11. The noted failures of Gens. Calleja, Campos, Morin and Weyler.

12. The ruin of the interior and exterior trade of the towns still in Spain's possession and the paralyzing of farm work caused by the Cuban republic.

13. The inaction of the Spanish troops in Camaguey and in Santa Clara, where Gomez' headquarters are, Weyler having systematically refused to fight.

14. The uselessness of the reconcentration methods of Weyler.

The proclamation closes with a declaration that autonomy will never be accepted; that the assassination of their chiefs is not to be forgotten and that their memory will not be offended by surrendering to autonomy. The last sentence of the document is:

"Therefore, while rejecting the autonomy so lately offered by Spain, we do not believe it necessary to remind her that our laws punish as guilty of high treason all persons who come to the territory of free Cuba with overtures for the establishment of peace through autonomy." As might be expected, the Spaniards saw that autonomy was a failure from the first and little effort was made to establish it.

On Sunday, Nov. 21, the palace of the captain-general was fired upon by a party of rebels from Casa Blanca, some 600 yards across the entrance to the harbor. Gen. Rafael de Cadenas, with a band of fifty rebels, had effected an entrance to Casa Blanca shortly before midnight, and about 4 o'clock they retired, each man leading an extra horse loaded with booty of all kinds. During the month engagements were reported on the heights of Romero, in Pinar del Rio, and at La Cuchilla de los Calmitos, in which the rebels were defeated with slight loss. A little later several rebel camps at Aranjuez were broken up. Another engagement was reported at Piedra, in Santiago province, in which the insurgents were forced to retreat.

An important victory was gained by the rebels at Guisa, fifteen miles from Bayamo, under the command of Gens. Rabi and Klos, in which ninety Spaniards were killed besides the commanding officer and several blockhouses destroyed. A successful rebel raid was made Dec. 9 on Calmanera, the port of Guantanamo, and goods to the value of \$30,000 were carried off. About the same time a rebel force under Gen. Rabi besieged the town of Guamo, near Cauto, and the Spanish garrison was forced to retreat with a loss of 150.

## DEATH OF RUIZ.

One of the most tragic events of the war was the death of Joaquín Ruiz, who left Havana on the 16th of December for the purpose of consulting with the insurgent leaders with a view of inducing them to accept the proffered autonomy proposed by

Spain. Ruiz was a lieutenant-colonel of engineers in the Spanish army. He went to the camp of Gen. Nestor Aranguren for the purpose of inducing him to abandon the rebel cause and to accept autonomy. The two men were intimate friends and Ruiz had no doubt as to the success of his mission. Ruiz perfectly understood the fact that the proclamation of the president of the Cuban republic threatened with death any one who should enter their camps offering terms of peace upon any terms other than complete independence. As Ruiz did not return to Havana at the time specified upon his departure Gen. Blanco became alarmed for his safety and asked the aid of Consul-General Lee to obtain his release if he was a prisoner. Ruiz had already been executed and the following is the official report of the circumstances: "Col. Ruiz wrote to Aranguren saying he wished to have an interview with him, but Aranguren refused to enter into the proposition, knowing the purpose of his visit. In the face of this and in spite of the counsels of his friends in Havana, Ruiz went on his mission. Only four days previously Aranguren had solemnly bound himself by oath to fight to the death for independence. He only did his duty as a soldier in ordering an instant court-martial, which tried Ruiz and ordered him to be shot to death. Aranguren declares that Ruiz entered the Cuban camp accompanied by two guides who were deserters from the rebel army; that he bore no flag of truce, and that the moment he came into Aranguren's presence he broached the subject of autonomy and amnesty in the hearing of several of Aranguren's officers."

In answer to the criticisms passed upon Aranguren for this act the Cuban junta in New York made the following explanation in justification of Aranguren's conduct: "Col. Ruiz tried to avail himself of Aranguren's friendship to win the young Cuban chief over to the Spanish cause. He was warned by Aranguren not to take the fatal step, as he knew what the consequences would be. He did not heed his friend's advice and went. Now Ruiz was a military man and knew what military orders meant and how military men have to act in such cases. The Cuban war is no child's play and decrees are not made to be set aside at the pleasure of the first-comer. No military chief in the world would tolerate any emissary of the enemy to come freely among his men and promote desertion, destroy discipline and demoralize them with offers of any kind. Aranguren acted as any military man would have done in his place. Perhaps no one more than he deplores what has happened; yes, the case may be deplored, but it was justifiable. It was dire necessity."

The death of Ruiz was avenged on the 19th of January. Aranguren was in the habit of visiting a lady in the Tapaste hills, in the province of Havana. On this occasion he was betrayed by Claudio Morales, a negro camp follower of the insurgents. The house was surrounded and Aranguren, his mistress, her sister, Aranguren's body servant and a child were all killed.

Although an election had been held in September, at which Capote had been chosen president, another was ordered in December, at which Bartolome Masso was selected as his successor. This peculiar proceeding was due to the fact that the military leaders were distrustful of Capote in case terms of peace should be offered by Spain to the insurgents. The leaders were

opposed to any treating with Spain or to the reception of any proposals except independence from the mother country. On the 21st of January it was reported from Havana that Esperanza, the rebel capital in the Cubitas hills, had been captured by a Spanish force under Gen. Castello, with 2,600 troops. He is reported to have burned all the houses in the city, together with the government buildings, and that on the following day he met and routed a rebel force of 2,500 men in the Infierno forests.

The reversal of Weyler's orders respecting the reconcentrados on the 10th of November had no effect in improving the condition of those unfortunate or in relieving the distress and suffering of the pacificos. Early in 1898 several United States senators visited Cuba with the view of ascertaining the exact condition of affairs. The reports of these men electrified the whole country as well as congress, and the speeches of Senators Gallingier of New Hampshire, Thurston of Nebraska and Proctor of Vermont portrayed the actual condition of the starving, suffering people of Cuba. Senator Proctor made his report to the senate on the 17th of March in a long speech, from which the following is an extract:

"West of Havana is mainly the rich tobacco country; east, so far as I went, a sugar region. Nearly all the sugar mills are destroyed between Havana and Sagua. Two or three were standing in the vicinity of Sagua and in part running, surrounded, as are the villages by trochas and 'forts,' or palisades of the royal palm, and fully guarded. Toward and near Cienfuegos there were more mills running, but all with the same protection. All the country people in the four western provinces, about 400,000 in number, remaining outside the fortified towns when Weyler's order was made, were driven into these towns, and these are the reconcentrados. They were the peasantry, many of them farmers, some land-owners, others renting lands, and owning more or less stock; others working on estates and cultivating small patches, and even a small patch in that fruitful clime will support a family. Some of them had houses of stone, the blackened walls of which are all that remain to show that the country was ever inhabited. The first clause of Weyler's order reads as follows: 'First—All the inhabitants of the country or outside the line of fortifications of the towns shall, within the period of eight days, concentrate themselves in the town so occupied by the troops. Any individual who, after the expiration of this period, is found in the uninhabited parts will be considered a rebel and tried as such.' Many doubtless did not learn of this order. Others failed to grasp its terrible meaning. Its execution was left largely to the guerrillas to drive in a town that had not obeyed, and I was informed that in many cases a torch was applied to their homes with no notice and the inmates fled with such clothing as they might have on, their stock and other belongings being appropriated by the guerrillas. When they reached the town they were allowed to build huts of palm leaves in the suburbs and vacant places within the trochas, and left to live if they could. Their huts are about 10 by 15 feet in size and for want of space are usually crowded together very closely. They have no floor but the ground and no furniture, and after a year's wear but little clothing except such stray substitutes as they can extemporize. With large families or with more

than one in this little space, the commonest sanitary provisions are impossible. Conditions are unmentionable in this respect. Torn from their homes, with foul earth, foul air, foul water and foul food, or none, what wonder that one-half have died and that one-quarter of the living are so diseased that they cannot be saved!

"Of the hospitals I need not speak. Others have described their condition far better than I can. It is not within the narrow limits of my vocabulary to portray it. I went to Cuba with a strong conviction that the picture had been overdrawn; that a few cases of starvation and suffering had inspired and stimulated the press correspondents, and they had given free play to a strong, natural and highly cultivated imagination. What I saw I cannot tell so that others can see it. It must be seen with one's own eyes to be realized. The Los Pasos hospital in Havana has been recently described by one of my colleagues, Senator Gallinger, and I cannot say that his picture was overdrawn, for even his fertile pen could not do more. He visited it after Dr. Lecar, one of Miss Barton's very able and efficient assistants, had renovated it and put in cots. I saw it when 400 women and children were lying on the stone floors in an indescribable state of emaciation and disease, many with the scantiest covering of rags—and such rags!—and sick children, naked as they came into the world. And the conditions in the other cities are even worse.

"When will the need for this help end? Not until peace comes and the reconcentrados can go back to their country, rebuild their homes, reclaim their tillage plots, which quickly run up to brush in that wonderful soil and climate, and until they can be free from danger of molestation in so doing. Until then the American people must in the main care for them. It is true that the alcaldes, other local authorities and relief committees are now trying to do something, and desire, I believe, to do the best they can. But the problem is beyond their means and capacity, and the work is one to which they are not accustomed."

No accurate report has been made, and probably it is impossible to make one, that will give the number of deaths by starvation that followed Weyler's order for concentrating the non-combatants in the fortified towns held by the Spanish forces, but conservative estimates place the number at from 200,000 to 400,000 persons.

#### AN APPEAL TO THE PEOPLE.

On the 17th of March the Cuban junta in New York issued the following address:

"To the American People: The frequency with which there have lately appeared in the public press suggestions made by malicious or misinformed individuals that Cuba would accept or could be forced to accept autonomy, or anything short of independence, has impelled us to make a definite and final statement on this subject.

"From the first our motto has been 'Independence or death.' We are now more firmly than ever determined to carry out our programme. As we will not accept, we will not even discuss the proposals of autonomy. After three years of the most sanguinary, barbarous and uncivilized warfare of modern times, carried on by Spain, we are stronger than ever. It is for us to say what will satisfy us, not for others. Our ideals and our national honor we can confide to the keeping of ourselves alone.

"I cannot think that the American people have forgotten the principle laid down in their own declaration of independence, nor can I believe that any true American can be found who would advise us to forsake the ideal of republican government for the monarchical, even in its most liberal form.

"There is no way to compel the Cubans to accept autonomy except by force of arms. We have fought three years, not against Spain alone, but against the whole world. Not a helping hand was extended to us, no country gave us equal rights with Spain. The right to arm our people by purchasing weapons in this country and transporting them to Cuba is admitted, but although engaged in lawful traffic we had to run the blockade to get from these shores, and again run the gauntlet in Cuba. Our ships and cargoes were seized, subjected to delay, but invariably restored by the slow and costly process of the law. Nevertheless we never faltered. We always appreciated the fact that the sympathy of the American people was with us. Spain has proved impotent to compel us by force to accept autonomy. She now desires the aid of the United States to compel us to accept.

"I cannot believe that the American people would lend themselves to the most treacherous and bloodstained monarchy of history for such a purpose. Should such prove to be the case, however, I declare in the name of the Cuban people in arms that force alone can compel our submission. We, who have seen hundreds of thousands of our race and families exterminated by slow starvation by a cowardly decree of the most inhuman commander of sanguinary Spain, will fight against anything but independence, no matter who opposes us.

"If unfortunately, this incredible proposal be carried into effect, and American bayonets are arrayed against us in our struggle for freedom and in aid of the Spanish monarchy, we will fight on sadly but determinedly, and let history judge whether the vanquished had not a purer ideal of free institutions than the victors. In such case we will be exterminated, but future generations will again take up our flag and our aspirations and Cuba will yet be free. Nor will we ever agree to a truce until our independence is established. We will continue to fight, as did the Americans under Jackson at the battle of New Orleans, even after the treaty of peace is signed, if it should be necessary.

"The Cubans cannot be convinced that the United States will ever try to force us to remain under the Spanish flag, but I have deemed it my duty to appeal to the generosity, the sympathy and the patriotism of the American people, to the end that they may understand the justice and firmness of our demand for complete independence.

"TOMAS ESTRADA PALMA."

In the senate several resolutions were introduced which expressed the sense of that body upon the Cuban situation. On the 25th of March the following resolutions were offered. Those by Senator Allen (Pop.) of Nebraska were as follows:

"Whereas, The war now and for some time past being waged between the kingdom of Spain and the Cuban insurgents has fully demonstrated the total inability of the former to subdue the insurgents; and,

"Whereas, Said war has become one of extermination by starvation, and the dictates of Christian civilization and common humanity alike demand the speedy cessation of hostilities and the immediate ter-

mination of the deliberately planned starvation now going on in the island of Cuba; and,

"Whereas, Under existing circumstances it is the bounden duty of the United States to intervene; and,

"Whereas, The assertion of the Monroe doctrine, forbidding interference of foreign powers in the affairs of any state or nation on the western hemisphere, creates an obligation on the part of the United States to guarantee the people thereof against unusual cruelties and barbarities and extermination by any such foreign power; and,

"Whereas, The Cubans have, in the opinion of the American people and of congress, by their valor and sacrifices during the four years of war, won their independence from Spain and are entitled to political recognition by the United States; and,

"Whereas, It is apparent that Spain can no longer govern or control the people of Cuba; therefore,

"Resolved, by the senate and the house of representatives. That the republic of Cuba, now and for some time maintained by force of arms, is hereby recognized by the United States of America as a separate and independent nation; that the United States shall immediately intervene and put an end to the war now being waged on the island of Cuba, and shall succor and release from imprisonment the people there concentrated for the purpose of starvation and extermination; and be it further

"Resolved, That for the purpose of enabling the president of the United States to provide for concentrated non-combatant Cubans with the necessary food, raiment and medicine for their immediate relief from starvation the sum of \$500,000, or so much thereof as may be necessary, is hereby appropriated out of any money in the treasury not otherwise appropriated."

Senator Foraker (Rep.) of Ohio offered the following:

"Be it resolved by the senate and the house of representatives of the United States of America:

"1. That the people of the island of Cuba are, and of right ought to be, free and independent.

"2. That the government of the United States hereby recognizes the republic of Cuba as the true and lawful government of that island.

"3. That the war Spain is waging against Cuba is so destructive of the commercial and property interests of the United States and so cruel, barbarous and inhuman in its character as to make it the duty of the United States to demand and the government of the United States does hereby demand, that she at once withdraw her land and naval forces from Cuba and Cuban waters.

"4. That the president of the United States be and hereby is authorized, empowered and directed to use if necessary the entire land and naval forces of the United States to carry these resolutions into effect."

Senator Frye (Rep.) of Maine presented these:

"Whereas, The war which has been waged in the island of Cuba for the last three years has been conducted by the Spanish government in violation of the rules of civilized warfare; said government has driven the unarmed and peaceable inhabitants from their homes and forced them within the armed camps, where it has permitted hundreds of thousands of men, women and children to die of starvation,

and as a result of this system of inhuman warfare tens of thousands of the helpless people are now dying for want of food; and,

"Whereas, The war has paralyzed and almost destroyed the large commercial relations which have heretofore existed between the United States and Cuba, and has rendered useless and brought to ruin the many millions of dollars of property of American citizens invested in the island; and,

"Whereas, The existence and prolongation of the hostilities have imposed heavy financial expenditures and burdensome official labors upon the government of the United States in the enforcement of its neutrality laws; and,

"Whereas, The consuls of the United States and other impartial and competent observers have reported that the Spanish government has lost control of much of the greater portion of the island to that it is powerless to restore its authority and bring about peace, and that a continuance of the contest will have no other effect than to increase the horrors, misery and starvation which now exist, to utterly extinguish the commerce with and destroy the property of American citizens and add to the expense and burdens of the government of the United States; therefore,

"Resolved, by the senate and house of representatives of the United States of America in congress assembled, That the president of the United States be and he is hereby directed and empowered to take such effective steps as in his discretion may be necessary to secure a speedy termination of the hostilities between the government of Spain and the people of Cuba, the withdrawal of the military and naval forces of Spain from said island and the complete independence of said people."

Senator Rawlins (Rep.) of Utah offered the following:

"Whereas, The war waged by the kingdom of Spain against the people of Cuba has destroyed the commerce between them and the people of the United States, and its revival will be impossible so long as such war may continue; and,

"Whereas, By the authority of that kingdom, in the course of such war, much American property has been destroyed and many American citizens, without just cause, have been imprisoned and some assassinated in their prison cells; and,

"Whereas, While our ship Maine was at anchor in the harbor of Havana, within the dominion and under the control of the kingdom of Spain, at a place designated by her authority, that ship and most of the men on board in the service of our country, by the explosion of a submarine mine, were willfully, wickedly and treacherously mangled and destroyed; and,

"Whereas, The kingdom of Spain has proved herself incompetent to tranquillize the island of Cuba either by the methods of peace or by means of civilized warfare, and, accordingly, has proceeded to make desolate the homes of its peaceful inhabitants, driving men, women and children into guarded camps, detaining them there without making provisions to shelter, clothe or feed them; thus willfully causing the extermination to the number of hundreds of thousands by the slow and torturous process of starvation; and,

"Whereas, Against these wrongs, against these revolting acts of inhumanity, this government has time and again made peaceful protest to the kingdom of Spain, at the same time endeavoring by a helpful char-

ity to relieve those whom she has thus brought to such dire distress, and our repeated protests having been disregarded and our efforts of philanthropy having proved unavailing; and,

"Whereas, Firmly convinced that further peaceful protest will prove equally in vain and that the recognition of the independence of the republic of Cuba and armed intervention in its behalf by this government will alone be effective for the redress of past and the prevention of future wrongs; and,

"Whereas, While regretting the necessity—now imperative—for such action, but mindful of our duty to a neighboring people and to humanity, and with a clear consciousness as to the justness of our cause and that our action will meet with the approving judgment of all civilized peoples; now, therefore, be it

"Resolved, by the senate and house of representatives of the United States of America in congress assembled, That the independence of the republic of Cuba be and the same is hereby recognized, and that war against the kingdom of Spain be and the same is hereby declared, and that the president is hereby authorized and directed to employ the land and naval forces of the United States of America to wage such war to success."

The feeling in the house of representatives was as pronounced as in the senate, although less active. On the 30th of March Representative Mahany (Rep.) of New York presented the following:

"Whereas, It has been the immemorial spirit of the American republic to foster, with due respect to the just restrictions of international obligations, the growth of freedom everywhere in the world, and especially in the western hemisphere; and,

"Whereas, The kingdom of Spain has during the last three years failed utterly to maintain its dominion in the island of Cuba, or to exhibit the attributes of actual sovereignty, either in the conduct of the war or the civil administration of the law; and,

"Whereas, During the same period the Cuban insurgents have continuously had and victoriously defended nine-tenths of Cuban territory; and,

"Whereas, The war as now prosecuted by the Spanish forces in that island dooms uncounted thousands of non-combatants—old, helpless men, defenseless women and children—to the inconceivable horrors of death by starvation; now, therefore, be it

"Resolved, by the senate and house of representatives of the United States of America in congress assembled, That the American people be impelled by a solemn sense of their duty to humanity and animated with a just regard for the rights of a people who have heroically sacrificed and

nobly battled to be free, do hereby recognize the republic of Cuba as a free and independent state and welcome her to the sisterhood of republics in the western world."

Similar resolutions were offered by Broderick (Rep.) of Kansas, Wheeler (Dem.) of Alabama, Adamson (Dem.) of Georgia, Todd (Rep.) of Michigan and others.

The result of these resolutions was a conference committee of the two houses of congress, when the following preamble and resolutions were agreed upon and adopted April 19, 1898:

"Whereas, The abhorrent conditions which have existed for more than three years in the island of Cuba, so near our own borders, have shocked the moral sense of the people of the United States, have been a disgrace to Christian civilization, culminating, as they have, in the destruction of a United States battleship, with 266 of its officers and crew, while on a friendly visit in the harbor of Havana, and cannot longer be endured, as has been set forth by the president of the United States in his message to congress, April 11, 1898, upon which the action of congress was invited; therefore,

"Resolved, by the senate and house of representatives of the United States of America in congress assembled:

"1. That the people of the island of Cuba are, and of right ought to be, free and independent.

"2. That it is the duty of the United States to demand, and the government of the United States does hereby demand, that the government of Spain at once relinquish its authority and government in the island of Cuba and withdraw its land and naval forces from Cuba and Cuban waters.

"3. That the president of the United States be, and he hereby is, directed and empowered to use the entire land and naval forces of the United States, and to call into the actual service of the United States the militia of the several states, to such an extent as may be necessary to carry these resolutions into effect.

"4. That the United States hereby disclaims any disposition or intention to exercise sovereignty, jurisdiction or control over said island, except for the pacification thereof; and asserts its determination, when that is accomplished, to leave the government and control of the island to its people."

Adopted by Senate—Yeas, 42; nays, 35.

Adopted by House—Yeas, 310; nays, 6.

This brings the record of the Cuban revolt down to the time when the patriots' cause was espoused by the United States and the war bill was passed by congress pursuant to the request of the president as conveyed in his message to congress bearing date April 25, 1898.

## THE SPANISH-AMERICAN WAR.

In his message to congress, transmitted on the 6th of December, 1897, the president reviewed the history of the relations subsisting between the United States and the government of Spain in which the island of Cuba was involved for the last seventy-five or eighty years. This message may be found in The Daily News Almanac for 1898, page 216.

The war with Spain was not inspired on the part of this country either by a spasmodic outburst of sympathy for the Cuban patriots or by a sudden resentment against

Spain for her efforts to force the suffering insurgents again into a condition worse than that of servitude. Nor was it encouraged by the American people against a nation their inferiors in every way with the expectation or hope of acquiring territorial or financial gain or benefit. For more than half a century the people of the United States had witnessed the almost continuous efforts of the Cubans to free themselves from a government wholly infamous and universally detested by the vast majority of the inhabitants of the island. They had

seen the insurgents cruelly butchered after each failure to secure their freedom and basely cheated in all the promises that Spain had made to better their condition. They understood that Spain had become incapable of governing Cuba because the measures employed by her for that purpose were those of past centuries which the civilized world had long ago outgrown and abandoned. They understood that Cuba was held by Spain only for the purpose of plundering and robbing her people for the benefit of the Spanish treasury and the corrupt and dishonest horde of officials sent by the home government to enrich themselves at the expense of a suffering race. Through all this long period public opinion in the United States was gradually becoming more and more in favor of freedom for the Cubans and for the extinction of Spanish tyranny on this continent. The government of the United States had been exceedingly conservative upon the subject of the various Cuban revolutions. Peace and friendly relations had long existed between the two countries, although the efforts of lawless individuals who sympathized with the insurgents in Cuba had several times nearly involved the government in war with Spain. It had come to be simply a question of time when the people of the United States would force the government to intervene in the affairs of Cuba and put a stop to the wars and disorders that had been increasing in number and severity for the last fifty years. Besides this, American interests in Cuba were increasing in value and importance, while the trade and commerce between this country and the island were becoming too important to be disturbed or sacrificed by the disordered condition of political affairs. It will thus be seen that the people of the United States, as well as their government, had reached the firm conviction that safety for themselves demanded that Spanish rule in Cuba must and should terminate. This was the universal sentiment in this country when congress met in December, 1897, the only difference of opinion being as to how such a desirable condition of things should or could be brought about.

A short synopsis of the various revolutionary movements in Cuba for the last seventy-five years may not be devoid of interest, as they tend to show the spirit and determination of the Cubans and the difficulty this country has had in preserving the friendly relations that existed unbroken between the United States and Spain. An English authority, in speaking of Cuba, said, as long ago as 1875, that "the deprivation of political, civil and religious liberty, and the exclusion from all public stations, combined with heavy taxation to maintain the standing army and navy, have resulted in a deadly hatred between the native Cubans and the mass of officials sent from Spain. This has manifested itself in frequent uprisings for greater privileges and freedom." Inspired by these acts of injustice the first revolution broke out in 1829 and is known in history as the conspiracy of the "Black Eagle." This was quickly suppressed and most of the participants who were taken alive were put to death. In 1844 the black population in the province of Matanzas revolted, but little or nothing was done that could give it the character of an armed revolution except the severity with which the Spanish government treated those who were supposed to have been involved in it. More than 1,300 persons were convicted

of complicity with the affair; about eighty were shot, a large number of others were variously punished and the incident was over. Of those convicted only fourteen were white, while 1,242 were free colored and some sixty were slaves.

The Lopez conspiracy was fomented in 1849. Narciso Lopez, a Venezuelan by birth but a Spanish officer by profession, made an attempt to invade Cuba with a small filibustering force, but was intercepted by the Spanish authorities and his efforts were held in abeyance. The next year he resumed operations and effected a landing at Cardenas with 600 men, but before he obtained a foothold he was compelled to abandon the undertaking and to re-embark his men. He was pursued to Key West by a Spanish vessel. In 1851 he attempted to take advantage of a revolt in Cuba and set out from New Orleans with 450 men and landed at Playitas, near Havana. Meeting a strong Spanish force he retreated into the interior and he and all his companions were captured. Lopez was taken to Havana, where he was garroted Aug. 18, 1851. Of his companions some were shot, but the most of them were transported and afterward pardoned.

In 1854 another filibustering expedition was set on foot by Gen. Quitman of Mississippi, who was a veteran of the Mexican war. The leaders were betrayed and the attempt wholly failed.

While the government of the United States did its best to prevent its citizens from engaging in these lawless adventures they served to seriously complicate the relations between the government and Spain. The Madrid government was displeased with the act of this country when, in 1852, it declined to join with France and Great Britain in a treaty guaranteeing to Spain the possession of Cuba, and this made her still more alert against all revolutionary movements on the island and watchful for American connection with them. This led to collisions between Spain and American citizens, of which the attack on an American steamer, the Black Warrior, by a Spanish war vessel was an instance. To put an end to all causes of trouble between Spain and the United States President Polk proposed to the Spanish government a transference of the island of Cuba to this country for the sum of \$1,000,000, which was refused. Ten years later a proposal was debated in congress to offer Spain \$30,000,000 for the island, but nothing came of it.

The breaking out of the revolution in Spain which resulted in the abdication of Queen Isabella, in 1868, encouraged the Cuban liberals to set on foot a new revolt. In October of that year Carlos M. de Cespedes collected a force of 128 men near Bayamo and issued a declaration of independence Oct. 10, dated at Manzanillo. The rebellion immediately assumed formidable proportions and within three weeks Cespedes had a rabble of nearly 15,000 poorly armed but determined men at his command. On the 18th of October, 1868, the city of Bayamo was taken, and on the 26th the jurisdiction of Holguin revolted. In November the insurgents defeated a Spanish force sent against them from Santiago de Cuba, and a number of Spanish-American republicans recognized the belligerency of the Cuban patriots. For the first two years of the revolution the insurgents were almost uniformly successful. They maintained an army of 50,000 men, but they had great difficulty in supplying them with arms and am-

munition. The result was that in 1871 a large portion of the rebel forces in central Cuba laid down their arms. Gen. Agramonte, however, refused to do so, and, with his cavalry as a nucleus, he organized an army and kept up the war for two years until he was killed. In 1873 Cespedes, who had been chosen president of the republic of Cuba by the provisional congress, was deposed and Cisneros was chosen in his place. Cespedes was later killed by the Spaniards. In a desultory way the war was continued until 1878, when Gen. Martinez Campos on behalf of Spain brought it to a close by promises of concessional and reforms, and a treaty of peace was entered into near El Zanjón in February of that year. In this ten years of war Spain employed 235,298 men, of whom 81,098 died or were killed. No one of the promises made by Gen. Campos, as a condition for the surrender of the rebels, was ever kept.

The Virginius affair did more than any previous incident to arouse the American people against Spain. The Virginius was a blockade-running steamer that was taken during our civil war and sold as a prize. She was purchased by an American and given an American register. While cruising in Caribbean waters she was captured by the Spanish gunboat Tornado, Oct. 31, 1873, and taken into the port of Santiago de Cuba. She had on board 156 persons, some of whom were British and others American subjects. The men were immediately tried, and before Nov. 8 six British and thirty Americans had been shot. Further executions were prevented by the arrival of the British warship Niobe, commanded by Sir Lambton Lorraine, who threatened to bombard the city if the executions were not stopped. The United States government took the case in hand and instructed Gen. Sickles, our minister at Madrid, to demand satisfaction from Spain for the outrage. It was not until Gen. Sickles had demanded his passports from the Spanish government that an arrangement was effected. The result was that on the 19th of December, 1873, the Virginius and the surviving crew were surrendered to the United States and the sum of \$80,000 was paid by Spain as an indemnity to the American families who had suffered by the killing of their members. This brings the story of Cuba's efforts for freedom and America's connection therewith down to the revolution that broke out in February, 1895. It is unnecessary to go over the events of this revolt, as they have been given in detail in *The Daily News Almanac* for the years 1896, 1897, 1898 and in the present volume.

The devotion of the Cubans to their cause, the brutality and inhumanity with which the peaceable inhabitants of the island have been treated and the inability of our government to induce Spain to adopt reforms in the island that would be acceptable to the Cubans made intervention a duty the United States could not evade. It is possible that war might have been avoided had not a number of unfortunate circumstances prevented. The bitterness in Havana against this country, the insulting procrastination with which Spain treated every attempt of the United States to bring about an amicable settlement of existing difficulties, the avowed determination of Weyler to depopulate the island by starving the non-combatants, regardless of sex or age, and the sacrifice of all American interests in Cuba

aroused the people of this country to a pitch of feeling that was wholly new and irresistible.

The first event after the beginning of the new year (1898) to seriously disturb the public mind was the publication of a letter written by Senor de Lome, the Spanish minister at Washington, to Jose Canalejas, which contained very insulting and deprecatory references to the president. This letter was given out by the Cuban junta and published Feb. 8, 1898. Literally translated it was as follows:

"Legation de Espana, Washington.—Eximo Senor Don Jose Canalejas—My Distinguished and Dear Friend: You need not apologize for not having written to me. I also ought to have written to you, but have not done so on account of being weighed down with work and nous sommes quittes.

"The situation here continues unchanged. Everything depends on the political and military success in Cuba. The prologue of this second method of warfare will end the day that the colonial cabinet will be appointed, and it relieves us in the eyes of this country of a part of the responsibility for what may happen there, and they must cast the responsibility upon the Cubans, whom they believe to be so immaculate.

"Until then we will not be able to see clearly, and I consider it to be a loss of time and an advance by the wrong road, the sending of embassies to the rebel field, the negotiating with the autonomists not yet declared to be legally constituted and the discovery of the intentions and purpose of this government. The exiles will return one by one, and when they return will come walking into the sheepfold, and the chiefs will gradually return. Neither of these had the courage to leave en masse, and they will not have the courage to this return.

"The message has undeceived the insurgents, who expected something else, and has paralyzed the action of congress, but I consider it bad. Besides the natural and inevitable coarseness with which he repeats all that the press and public opinion of Spain has said of Weyler, it shows once more what McKinley is, weak and catering to the rabble, and besides, a low politician, who desires to leave a door open to me and to stand well with the jingoes of his party.

"Nevertheless, as a matter of fact, it will only depend on ourselves whether he will prove bad and adverse to us. I agree entirely with you, without a military success nothing will be accomplished there, and without military and political success there is here always danger that the insurgents will be encouraged, if not by the government, at least by part of the public opinion.

"I do not believe you pay enough attention to the role of England. Nearly all that newspaper cannibal which swarms in your hotel are English, and at the same time that they are correspondents of the Journal they are also correspondents of the best newspapers and reviews of London. Thus it has been since the beginning. To my mind the only object of England is that the Americans should occupy themselves with us and leave her in peace, and if there is a war, so much the better; that would further remove what is threatening her—although that will never happen.

"It would be most important that you should agitate the question of commercial relations, even though it would be only for

effect, and that you should send here a man of importance in order that I might use him to make a propaganda among the senators and others in opposition to the junta and to win over exiles.

"There goes Amblarad. I believe he comes too deeply taken up with little political matters, and there must be something very great or we shall lose.

"Adela returns your salutation, and we wish you in the new year to be a messenger of peace and take this New Year's present to poor Spain.

"Always your attentive friend and servant, who kisses your hands,

"ENRIQUE DUPUY DE LOME."

While there was some question as to how the letter came into the hands of the junta there was no doubt of its authenticity, and when De Lome was called before the secretary of state to explain the matter he promptly acknowledged the authorship and assumed full personal responsibility for the letter, which he declared Senor Canalejas had never received. De Lome at once cabled his resignation of office to Madrid, which was immediately accepted. While the Spanish government expressed the most profound regret for the misconduct of its representative, the incident increased the severe tension of the situation. The Spanish government at once appointed Senor Polo y Berbeo to succeed De Lome as its minister at Washington.

On the 24th of January the United States battleship *Maine*, commanded by Capt. C. D. Sigbee, was ordered to the harbor of Havana. The secretary of state, Mr. Day, took special pains to explain this order by publicly declaring that the vessel was sent to Cuba not as a menace to Spain nor for the purpose of protecting American interests at Havana, but simply as an evidence of "the resumption of friendly naval relations with Spain." In the orders issued to Capt. Sigbee it was expressly set forth that the vessel was only going to resume friendly calls at Cuban ports. That such was the full understanding of the order is attested by the declaration of the Spanish minister at Washington, who said, regarding the visit of the *Maine* to Havana, that "the only remote contingency which might lead to unpleasant consequences would be some overt act on the part of the insurgent sympathizers with the hope of embroiling Spain and the United States." In acknowledgment of the visit of the *Maine* to Havana, the cruiser *Vizcaya* was ordered by the Spanish government to visit American ports, and did come to New York for that purpose. The *Maine* had a crew of 354 men, and arrived at the harbor of Havana on the 25th day of January, 1898. The ship was assigned anchorage by the regular government pilot. On the 15th of February the *Maine* was destroyed by an explosion. Of her crew 266 men, including two officers, were killed or received wounds of which they afterward died. The explosion took place at 9:40 in the evening. An account of the affair was given in these words: "The night was intensely dark. At a distance of 200 or 300 yards from the doomed ship were anchored the Ward line's steamer *City of Washington* and the Spanish cruiser *Alfonso XII*. The men were asleep below; Capt. Sigbee was in his cabin. He had just finished writing a letter when the crash came. Capt. Sigbee said: 'The ship lurched heav-

ily to port and I knew in an instant what it meant—that my ship had blown up.' The force of the explosion shook the whole water front of the city and threw down many telegraph and telephone poles. The captain's first order was to flood the magazines, but they were already flooding themselves. A great flame broke out from the *Maine*, illuminating the whole harbor.

On the 8th and 9th of March congress voted to place in the hands of the president the sum of \$50,000,000 to be expended as he saw fit as an emergency fund to be used for the protection of the government. Most of this fund was expended in the purchase of war vessels and naval supplies and to put the army upon a war footing.

A naval court of inquiry was appointed to ascertain the cause of the destruction of the *Maine*, consisting of Capt. W. T. Sampson, U. S. N.; Capt. F. E. Chadwick, U. S. N.; Lieutenant-Commander A. Marix, U. S. N.; and Lieutenant-Commander W. P. Potter, U. S. N. Capt. Sampson was president of the court and Lieutenant-Commander Marix was the judge-advocate. The court began its investigations at Havana on the 26th of February, and after twenty-three days of continuous investigation transmitted its report, with the mass of testimony, to the president on the 21st of March. The report was as follows:

"United States Steamship *Iowa*, First Rate, Key West, Fla., Monday, March 21, 1898.—After full and mature consideration of all the testimony before it, the court finds as follows:

"1. That the United States battleship *Maine* arrived in the harbor of Havana, Cuba, on the 25th day of January, 1898, and was taken to buoy No. 4, in from five and one-half to six fathoms of water, by the regular government pilot.

"The United States consul-general at Havana had notified the authorities at that place the previous evening of the intended arrival of the *Maine*.

"2. The state of discipline on board the *Maine* was excellent, and all orders and regulations in regard to the care and safety of the ship were strictly carried out. All ammunition was stowed away in accordance with instructions, and proper care was taken whenever ammunition was handled. Nothing was stowed in any one of the magazines or shellrooms which was not permitted to be stowed there. The magazines and shellrooms were always locked after having been opened, and after the destruction of the *Maine* the keys were found in their proper place in the captain's cabin, everything having been reported secure that evening at 8 o'clock.

"The temperatures of the magazines and shellrooms were taken daily and reported. The only magazine which had an undue amount of heat was the after ten-inch magazine, and that did not explode at the time the *Maine* was destroyed.

"The torpedo war heads were all stowed in the after part of the ship under the wardroom and neither caused nor participated in the destruction of the *Maine*.

"The dry gun cotton primers and detonators were stowed in the cabin aft and remote from the scene of the explosion.

"The waste was carefully looked after on board the *Maine* to obviate danger. Special orders in regard to this had been given by the commanding officer.

"Varnishes, driers, alcohol and other combustibles of this nature were stowed on or

above the main deck and could not have had anything to do with the destruction of the Maine.

"The medical stores were stowed aft under the wardroom and remote from the scene of explosion. No dangerous stores of any kind were stowed below in any part of the other storerooms.

"The coal bunkers were inspected. Of these bunkers adjoining the forward magazine and shellrooms four were empty, namely, B 3, B 4, B 5 and B 6. A 15 had been in use that day and A 16 was full of New River coal. This coal had been carefully inspected before receiving it on board. The bunker in which it was stored was accessible on three sides at all times, and the fourth side at this time, on account of bunkers B 4 and B 6 being empty. This bunker, A 16, had been inspected that day by the engineer officer on duty.

"The fire-alarms in the bunkers were in working order, and there had never been a case of spontaneous combustion of coal on board the Maine.

"The two after boilers of the ship were in use at the time of the disaster, but for auxiliary purposes only, with a comparatively low pressure of steam, and being tended by a reliable watch. These boilers could not have caused the explosion of the ship. The four forward boilers have since been found by the divers, and are in a fair condition.

"On the night of the destruction of the Maine everything had been reported secure for the night at 8 p. m. by reliable persons, through the proper authorities, to the commanding officer. At the time the Maine was destroyed the ship was quiet, and therefore least liable to accident caused by movements from those on board.

"3. The destruction of the Maine occurred at 9:40 p. m. on the 15th day of February, 1898, in the harbor of Havana, Cuba, being at the time moored at the same buoy to which she had been taken upon her arrival.

"There were two explosions of a distinctly different character, with a very short but distinct interval between them, and the forward part of the ship was lifted to a marked degree at the time of the first explosion.

"The first explosion was more in the nature of a report like that of a gun, while the second explosion was more open, prolonged and of greater volume. The second explosion was, in the opinion of the court, caused by the partial explosion of two or more of the forward magazines of the Maine.

"The evidence bearing on this, being principally obtained from divers, did not enable the court to form a definite conclusion as to the condition of the wreck, although it was established that the after part of the ship was practically intact, and sunk in that condition a very few minutes after the destruction of the forward part.

"The following facts in regard to the forward part of the ship are, however, established by the testimony:

"That portion of the port side of the protective deck which extends from about frame 30 to about frame 41 was blown up aft and over to port. The main deck, from about frame 30 to about frame 41, was blown up aft and slightly over to starboard, folding the forward part of the middle superstructure over and on top of the after part.

"This was, in the opinion of the court, caused by the partial explosion of two or

more of the forward magazines of the Maine.

"5. At frame 17 the outer shell of the ship, from a point eleven and one-half feet from the middle line of the ship and six feet above the keel, when in its normal position, has been forced up so as to be now about four feet above the surface of the water; therefore, about thirty-four feet above where it would be had the ship sunk uninjured. The outside bottom plating is bent into a reversed V shape, the after wing of which, about fifteen feet broad and thirty-two feet in length, from frame 17 to frame 25, is doubled back upon itself against the continuation of the same plating extending forward.

"At frame 18 the vertical keel is broken in two and the flat keel bent into an angle similar to the angle formed by the outside bottom plating. This break is now about six feet below the surface of the water and about thirty feet above its normal position.

"In the opinion of the court this effect could have been produced only by the explosion of a mine situated under the bottom of the ship at about frame 18 and somewhat on the port side of the ship.

"6. The court finds that the loss of the Maine, on the occasion named, was not in any respect due to fault or negligence on the part of any of the officers or members of the crew of said vessel.

"7. In the opinion of the court the Maine was destroyed by the explosion of a submarine mine, which caused the partial explosion of two or more of her forward magazines.

"8. The court has been unable to obtain evidence fixing the responsibility for the destruction of the Maine upon any person or persons.

W. T. SAMPSON,

Captain, U. S. N., President.

A. MARIX,

Lieutenant-Commander, U. S. N., Judge-Advocate.

"The court, having finished the inquiry it was ordered to make, adjourned at 11 a. m. to await the action of the convening authority.

W. T. SAMPSON,

Captain, U. S. N., President.

A. MARIX,

Lieutenant-Commander, U. S. N., Judge-Advocate.

"U. S. Flagship New York, March 22, 1898, off Key West, Fla."

"The proceedings and findings of the court of inquiry in the above case are approved.

M. STWARD,

Rear-Admiral, Commander-in-Chief of the U. S. Naval Force on the North Atlantic Station."

(In this connection see President's message on the same subject under the heading "Messages of the President," in this volume.)

While these investigations were in progress a court of inquiry was appointed by Spanish authority to make a similar examination to that conducted by the American court. The following is a synopsis of the report of the Spanish officers:

"The report contains declarations made by ocular witnesses and experts. From these statements it clearly deduces and proves the absence of all those attendant circumstances which are invariably present on the occasion of the explosion of a torpedo.

"The evidence of witnesses comparatively close to the Maine at the moment is to the

effect that only one explosion occurred; that no column of water was thrown into the air; that no shock to the side of the nearest vessel was felt, nor on land was any vibration noticed, and that no dead fish were found.

"The evidence of the senior pilot of the harbor states that there is abundance of fish in the harbor, and this is corroborated by other witnesses. The assistant engineer of works states that after the explosions made during the execution of works in the harbor he has always found dead fish.

"The divers were unable to examine the bottom of the Maine, which was buried in the mud, but a careful examination of the sides of the vessel, the rents and breaks, in which all point outward, shows without a doubt that the explosion was from the inside.

"A minute examination of the bottom of the harbor around the vessel shows absolutely no sign of the action of a torpedo, and the fiscal (judge-advocate) of the commission can find no precedent for the explosion of the storage magazines of a vessel by a torpedo.

"The report makes clear that, owing to the special nature of the proceedings followed and the absolute respect shown for the extra-territoriality of the Maine, the commission has been prevented from making such an examination of the inside of the vessel as would determine even the hypothesis of the internal origin of the accident. This is to be attributed to the regrettable refusal to permit of the necessary co-operation of the Spanish commission both with the commander and crew of the Maine and the different American officials commissioned to investigate the causes of the accident and later on with those employed in salvage work.

"The report finishes by stating that an examination of the inside and outside of the Maine as soon as such examination may be possible, as also of the bottom where the vessel rests, will prove that, supposing the remains [of the wreck] not to be totally or partially altered in the process of extraction, the explosion was undoubtedly due to some interior cause."

There was only one opinion in the United States regarding the responsibility for the loss of the Maine. The American people, while not asserting that the act was one of treachery on the part of the Spanish government, did believe that without complicity on the part of Spanish officials at Morro castle the vessel would not have been blown up by mines operated by electric batteries located within that fortification. As indicating the sentiment at foreign capitals the plea for peace made by six of the representatives of the leading governments of Europe was significant.

On the 6th of April Consul-General Lee was directed to leave Havana and return to the United States, closing the American consulate in that city. This he did on the 10th inst., turning over the affairs of this government to the British consul. This was deemed necessary on account of the threatening attitude of the Spaniards of the city, and the president believed that the life of the consul-general was in danger, an opinion which all the American residents in Cuba shared.

On the 7th of April, 1898, several diplomatic officials met at the British embassy shortly before noon and proceeded to the

president's mansion and the department of state. The party was made up as follows:

Sir Julian Pauncefote, the British ambassador, dean of the diplomatic corps.

M. Cambon, the French ambassador, and M. Thiebaud, first secretary of the French embassy.

Dr. Von Holleben, the German ambassador, with Baron Speck von Sternburg, first secretary of the German embassy.

Mr. Hengelmüller, the Austrian minister.

Count Vinci, the Italian charge d'affaires.

Mr. de Wollant, the Russian charge d'affaires.

Arriving at the white house they were ushered into the blue room and there were received by President McKinley. After a social exchange and mutual well wishes Sir Julian Pauncefote said:

"Mr. President: We have been commissioned by the great powers of Europe, whom we represent here to-day, to approach your excellency with a message of friendship and peace at the present critical juncture in the relations between the United States and Spain, and to convey to you the sentiments expressed in the collective note which I have the honor to place in your hands."

The British ambassador then handed to President McKinley the collective note of the powers, which reads as follows:

"The undersigned, representatives of Germany, Austria-Hungary, France, Great Britain, Italy and Russia, duly authorized in that behalf, address, in the name of their respective governments, a pressing appeal to the feelings of humanity and moderation of the president and of the American people in their existing differences with Spain. They earnestly hope that further negotiations will lead to an agreement which, while securing the maintenance of peace, will afford all necessary guaranties for the re-establishment of order in Cuba.

"The powers do not doubt that the humanitarian and purely disinterested character of this representation will be fully recognized and appreciated by the American nation."

President McKinley then handed to Sir Julian Pauncefote the answer of the United States, as follows:

"The government of the United States recognizes the good will which has prompted the friendly communication of the representatives of Germany, Austria-Hungary, France, Great Britain, Italy and Russia, as set forth in the address of your excellencies, and shares the hope therein expressed that the outcome of the situation in Cuba may be the maintenance of peace between the United States and Spain by affording the necessary guaranties for the re-establishment of order in the island, so terminating the chronic condition of disturbance there which so deeply injures the interests and menaces the tranquillity of the American nation by the character and consequences of the struggle thus kept up at our doors, besides shocking its sentiment of humanity.

"The government of the United States appreciates the humanitarian and disinterested character of the communication now made on behalf of the powers named, and for its part is confident that equal appreciation will be shown for its own earnest and unselfish endeavors to fulfill a duty to humanity by ending a situation the indefinite prolongation of which has become insufferable."

On the 10th of April the Spanish minister presented to Assistant Secretary of State Day the final plea of his government for peace. It was as follows:

"The minister plenipotentiary of Spain has the honor to inform the honorable secretary of state of the United States of America that her majesty the queen regent, yielding to the reiterated requests of his holiness, and inspired by sentiments of peace and concord which animate her, has given proper instructions to the general-in-chief of the army of Cuba, in order that he should concede an immediate suspension of hostilities for such time as he shall deem prudent for preparing and facilitating peace in that island.

"Gen. Blanco has published to-day the corresponding proclamation, and reserved to himself to fix in another the term and other details of its execution, with the sole object of making sure that a measure of such transcendent importance may lead in the shortest possible time to the desired pacification of the Great Antilla. In the fixing of this term the general-in-chief, inspired by the most elevated sentiments, far from raising any difficulties or obstacles, is disposed to concede all possible facilities.

"The government of her majesty by this important measure has crowned its extraordinary efforts to obtain the pacification of Cuba by means of reason and right.

"The autonomic constitution, which grants to the inhabitants of the island of Cuba a political regime at least as liberal as that which rules in the Dominion of Canada, will shortly enter upon its complete development, when, the elections having taken place, the insular parliament shall meet in Havana on the 4th of May next, and such are the franchises and liberties granted to the Cubans that no pretext is left to them to ask for more ample concessions.

"Furthermore, as the island of Cuba is represented in the cortes of the kingdom, a privilege which is not enjoyed by any other foreign autonomic colony, the Cuban senators and deputies can there explain their aspirations, if they should have any.

"No one who knows the liberal spirit of the majority of the Spanish cortes recently elected and the patriotic attitude of the principal parties of the opposition can doubt that the Cubans will obtain such modifications as they may desire in justice within the limits of reason and of the national sovereignty, according to the solemn offer of the preamble of the royal decree of the 27th of November, 1897, while at the same time the government of her majesty declared that it would not withdraw, nor consent that there should be withdrawn, anything from the colonial liberties, franchises and privileges accorded.

"The repeal of the decree of reconcentration, the aid of all kinds which the government of her majesty has granted and has permitted to be given to the reconcentrados, have put an end to a lamentable state of affairs, which was the inevitable consequence of the bloody conflict provoked by a small minority of the sons of Cuba, directed and supported principally by foreign influences.

"No impartial mind which has full knowledge of the facts, so distorted as they have been, and are actually, in everything referring to the Cuban question, can, with justice, charge Spain with being remiss in seeking the means for pacifying the island or grudging in the concession of privileges, liberties and franchises for the welfare and happiness of the inhabitants.

"The government of her majesty does not doubt that the government of the United States must recognize this, as it will recognize the manifest injustice with which a part of public opinion in this country presumes to find responsibilities for Spain in the horrible catastrophe which occurred in the port of Havana on the unhappy night of Feb. 15 last.

"Her majesty the queen regent, her responsible government, the governor-general of Cuba, the insular government and all the principal authorities of Havana manifested from the first moment the profound sentiments of horror which that immense misfortune caused them, and the sympathy which on that most sad occasion bound them to the American government and people.

"The proofs of this were the visits of the charge d'affaires of his majesty to the illustrious president of the United States, those of the highest Spanish functionaries of state to Mr. Woodford, the unstinted aid given to the victims, as well as the funeral arrangements provided by the municipality of Havana, and the notes addressed to the department of state by this legation on the 16th and 17th of February and the 2d of this month, Nos. 12, 13, 14 and 33 respectively.

"The officers and crew of the vessels of war of her majesty near the Maine, disregarding the evident danger which threatened them, as the officers of that American battleship recognized, immediately lowered their boats and saved a number of the drowning, who only owe their lives to the prompt and efficacious aid of the Spanish sailors.

"It is strange that these notorious facts and these solemn manifestations appear to be forgotten by public opinion, which gives credit on the other hand to the most absurd and offensive hypothesis.

"The government of her majesty would be deeply grateful to the justice and courtesy of that of the United States if it should re-establish officially the truth of facts which appear to be ignored or not appreciated, and ignorance of which contributes so powerfully to maintain the extraordinary excitement which endangers, without any reason or motive, the friendly relations between the two nations.

"With reference to the question of fact which results from the diversity of opinion between the reports of the Spanish and North American commissions, the government of her majesty, which as yet does not know the official text of these opinions, has hastened to declare itself ready to submit the question to the decision of impartial and disinterested experts, accepting in advance the decision of the arbitrators named by both parties—an evident proof of the loyalty and good faith with which Spain proceeds on this as well as on all occasions.

"The minister of Spain trusts that these manifestations, inspired by the loyal desire for peace and concord which animates the government of her majesty, will be appreciated at their just value by the president and government of the United States.

"Washington, 10th of April, 1898."

At this time the feeling in the country was intense, while congress was becoming restive under the delay in declaring war against Spain. In many sections of the country the president was criticised for the check he imposed upon congress, in the hope of a peaceful settlement of the questions at issue between the two countries, but no

one recognized better than the president himself that he could not much longer hold back the people and their representatives from the adoption of the most radical measures, which meant immediate war. When he had exhausted every effort to prevent a resort to arms, and had failed, he sent to congress, on the 11th day of April, his war message, which will be found in full under the heading "Messages of the President" in this volume. An exciting debate followed the reception of this message in both houses of congress, the main question being recognition of the insurgent government established in Cuba. The two houses concurred on the 19th of April and passed the following joint preamble and resolutions, which were sent to the president and approved by him on the day succeeding:

"Whereas, The abhorrent conditions which have existed for more than three years in the island of Cuba, so near our own borders, have shocked the moral sense of the people of the United States, have been a disgrace to Christian civilization, culminating as they have in the destruction of a United States battleship with 266 of its officers and crew while on a friendly visit in the harbor of Havana, and cannot longer be endured, as has been set forth by the president of the United States in his message to congress of April 11, 1898, upon which the action of congress was invited; therefore,

"Resolved, 1. That the people of the island of Cuba are and of right ought to be free and independent.

"2. That it is the duty of the United States to demand, and the government of the United States does hereby demand, that the government of Spain at once relinquish its authority and government in the island of Cuba and withdraw its land and naval forces from Cuba and Cuban waters.

"3. That the president of the United States be, and he hereby is, directed and empowered to use the entire land and naval forces of the United States, and to call into actual service of the United States the militia of the several states, to such extent as may be necessary to carry these resolutions into effect.

"4. That the United States hereby disclaims any disposition or intention to exercise sovereignty, jurisdiction or control over said island except for the pacification thereof, and asserts its determination, when that is accomplished, to leave the government and control of the island to its people."

The resolutions passed the senate by a vote of 42 yeas to 35 nays, and the house by a vote of 310 yeas to 6 nays. The following is the vote in the senate:

Yeas—Messrs. Aldrich, Allison, Baker, Burrows, Carter, Chandler, Clark, Cullom, Davis, Deboe, Elkins, Fairbanks, (rep.); Faulkner (dem.), Foraker, Frye, Gallinger, Gehr, (rep.); Gray (dem.), Hale, Hanna, Hansbrough, Hawley, (rep.); Kyle (pop.); Lodge, McBride, McMillan, Mason, (rep.); Morgan (dem.), Morrill, Nelson, Penrose, Perkins, Platt of Connecticut, Pritchard, Proctor, Quay, Sewell, Shoup, Spooner, Warren, Wilson and Wolcott, (rep.)—42.

Nays—Messrs. Allen (pop.), Bacon, Bate, Berry, (dem.); Butler (pop.), Caffery (dem.), Cannon (rep.), Chilton, Cockrell, Daniel, (dem.); Harris, Helfield, (pop.); Jones of Arkansas (dem.), Jones of Nevada (rep.), Kenney, Lindsay, McEnery, McLaurin, Mal-

lory, (dem.); Mantle (rep.), Martin, Mitchell, Money, Pasco, (dem.); Pettigrew (rep.), Pettus, Rawlins, Roach, (dem.); Stewart (pop.), Teller (rep.), Turley (dem.), Turner (pop.), Turple and White (dem.)—35.  
In the house the six negative votes were cast by:

Charles A. Boutelle (rep.) of Maine.  
Willis Brewer (dem.) of Alabama.  
John J. Gardner (rep.) of New Jersey.  
Henry U. Johnson (rep.) of Indiana.  
Eugene F. Loud (rep.) of California.  
Samuel W. McCall (rep.) of Massachusetts.  
On the same day (April 20) the following ultimatum was sent to Gen. Woodford, our minister at Madrid, to be delivered to the Spanish government:

"You have been furnished with the text of a joint resolution voted by the congress of the United States on the 19th inst., approved to-day, in relation to the pacification of the island of Cuba. In obedience to that act the president directs you to immediately communicate to the government of Spain said resolution, with the formal demand of the government of the United States that the government of Spain at once relinquish its authority and government in the island of Cuba and withdraw its land and naval forces from Cuba and Cuban waters. In taking this step the United States hereby disclaims any disposition or intention to exercise sovereignty, jurisdiction or control over said island except for the pacification thereof, and asserts its determination when that is accomplished to leave the government and control of the island to its people under such free and independent government as they may establish.

"If by the hour of noon on Saturday next, the 23d day of April inst., there be not communicated to this government by that of Spain a full and satisfactory response to this demand and resolution, whereby the ends of peace in Cuba shall be assured, the president will proceed without further notice to use the power and authority enjoined and conferred upon him by the said joint resolution to such extent as may be necessary to carry the same into effect.

"SHERMAN."

On Thursday, April 21, the following reply was received from Gen. Woodford:

"Madrid, April 21, 1898. Received 9:02 a. m.; Sherman, Washington: Bearly this [Thursday] morning, immediately after the receipt of your open telegram, and before I had communicated same to Spanish government, Spanish minister for foreign affairs notified me that diplomatic relations are broken between the two countries, and that all official communications between their respective representatives have ceased. I accordingly asked for safe passports. Turn legation over to British embassy and leave for Paris this afternoon. Have notified consuls. WOODFORD."

The ultimatum was not, therefore, delivered. On the same day, April 20, about 11 o'clock a. m., the department of state served notice of the purposes of this government by delivering to Minister Polo a copy of an instruction to Minister Woodford, and also a copy of the resolutions passed by the congress of the United States on the 19th inst. After the receipt of this notice the Spanish minister forwarded to the state department a request for his passports, which were furnished to him in the afternoon.

It will be seen that it was Spain which broke off the relations between the two governments—first, by the act of the minister in demanding his passports from the secretary of state, and, second, by that government sending to the American minister his passports before receiving a request therefor.

On the 22d day of April the president issued the following proclamation:

"Whereas, By a joint resolution passed by the congress and approved April 20, 1898, and communicated to the government of Spain, it was demanded that said government at once relinquish its authority and government in the island of Cuba and withdraw its land and naval forces from Cuba and Cuban waters, and the president of the United States was directed and empowered to use the entire land and naval forces of the United States, and to call into the actual service of the United States the militia of the several states to such extent as might be necessary to carry said resolution into effect; and,

"Whereas, In carrying into effect said resolution, the president of the United States deems it necessary to set on foot and maintain a blockade of the north coast of Cuba, including all ports of said coast between Cardenas and Bahia Honda, and the port of Cienfuegos on the south coast of Cuba;

"Now, therefore, I, William McKinley, president of the United States, do hereby declare and proclaim that the United States of America has instituted, and will maintain, a blockade of the north coast of Cuba, including ports of said coast between Cardenas and Bahia Honda, and the port of Cienfuegos on the south coast of Cuba, aforesaid, in pursuance of the laws of the United States and the law of nations ap-

plicable to such cases. An efficient force will be posted so as to prevent the entrance and exit of vessels from the ports aforesaid. Any neutral vessel approaching said ports, or attempting to leave the same, without notice or knowledge of the establishment of such blockade, will be duly warned by the commander of the blockading forces, who will indorse on her register the fact and the date of such warning, where such indorsement was made; and if the same vessel shall again attempt to enter any blockaded port she will be captured and sent to the nearest convenient port for such proceedings against her and her cargo as prize as may be deemed advisable. Neutral vessels lying in any of said ports at the time of establishment of such blockade will be allowed thirty days to issue therefrom."

April 25 the president sent a message to congress asking that body to issue a formal declaration of war, which message will be found in full under the heading "Messages of the President," in this volume. On the same day both houses of congress passed and the president signed the following bill:

"A bill declaring that war exists between the United States of America and the kingdom of Spain.

"Be it enacted, etc.

"1. That war be and the same is hereby declared to exist and that war has existed since the 21st day of April, A. D. 1898, including said day, between the United States of America and the kingdom of Spain.

"2. That the president of the United States be and he hereby is directed and empowered to use the entire land and naval forces of the United States, and to call into actual service of the United States the militia of the several states, to such extent as may be necessary to carry this act into effect."

#### CHRONOLOGY OF THE WAR WITH SPAIN.

##### APRIL, 1898.

11. Gen. Stewart L. Woodford, the American minister at Madrid, received his passports from the Spanish government and Polo y Bernabe, the Spanish minister at Washington, left the city. The navy department bought the Brazilian warship *Nithe-roy* and the yachts *Corsair* and *Penelope*. The Spanish government ordered out 80,000 reserves.

22. The first prize is captured by the gunboat *Nashville*. It is the Buena Ventura. Cuban ports blockaded by the American squadron.

23. The president issued a call for 125,000 volunteers.

24. Spain issued a decree declaring that a state of war exists with the United States.

25. Congress passed a bill declaring that war exists between the United States and Spain.

26. The president by proclamation reaffirmed the intention of this government to "adhere to the declaration of Paris" in regard to privateering.

27. The first battle of the war was fought off Matanzas by Admiral Sampson, with the New York, the Puritan and the Cincinnati, in which the land batteries were silenced. Commodore Dewey left Mirs bay with his squadron for Manila.

29. The Spanish squadron, consisting of the cruisers *Maria Teresa*, *Almirante Oquendo*, *Vizcaya* and *Cristobal Colon*, and the torpedo-boat destroyers *Pluton*, *Terror*

and *Furor*, sail from the Cape Verde islands.

30. The battleship *Oregon* arrived at Rio de Janeiro from San Francisco. In accordance with instructions Capt. Clark sailed from San Francisco on March 19 on the journey around the Horn, and it is probable that no ship that ever made the trip attracted so much attention. Her first stopping place was Callao, whence she sailed again on April 5, making direct for Sandy point without stopping at Valparaiso. With 6,588 knots to her credit, everything in good order and all on board well, she passed through the Straits of Magellan and steamed north to Rio de Janeiro, which port she made on April 30 at 6 p. m. At Sandy point she picked up the gunboat *Marletta*, and as the smaller vessel could make only about twelve knots an hour the *Oregon's* progress to Rio was slower than it would have been had she gone alone. A third vessel, the *Buffalo*, joined the American ships at Rio, and they were reported safe at Bahia on May 9. The *Oregon* left Rio de Janeiro May 4 and arrived at Key West May 26, having without accident made a voyage of 15,764 miles.

##### MAY.

1. Commodore Dewey steamed into Manila harbor at daybreak. His squadron consisted of the cruisers *Olympia* (flagship), *Raleigh*, *Baltimore* and *Boston*, and gunboats *Concord* and *Petrel*, and the revenue cutter *McCulloch*, with two transports. Here he met

the Spanish fleet, consisting of the Reina Cristina, Castilla, Don Antonio de Ulloa, Isla de Luzon, Isla de Cuba, Gen. Lezo, Marquis de Duero, Cano, Velasco, Isla de Mindanao, some small gunboats and a transport. The American ships opened a heavy fire on the Spanish vessels. The total tonnage of the American fleet was 19,098 tons and that of the Spanish real fighting ships was 8,722 tons. The result of the battle was the entire destruction of all the Spanish vessels and the silencing of the land batteries. Commodore Dewey did not lose a ship nor a man, while the Spanish lost their entire fleet and from 600 to 700 men.

3. Commodore Dewey cut the cable communications between Manila and Hongkong, destroyed the fortifications at the entrance of Manila bay and took possession of the naval station at Cavite. He demanded the surrender of the city of Manila, which was refused.

4. The vessels of Rear-Admiral Sampson's fleet, consisting of the flagship New York and the battleships Iowa and Indiana, the monitor Puritan, the cruisers Cincinnati, Detroit and Marblehead, and the torpedo boat Mayflower, sailed from Key West, coaled, for a long voyage.

6. The French steamer Lafayette was captured while attempting to run the blockade at Havana.

7. Commodore Dewey was promoted to be rear-admiral and given the thanks of congress.

11. Spanish gunboats and shore batteries attacked the blockading vessels Wilmington, Hudson and Winslow at Cardenas, disabling the Winslow. Ensign Bagley and four sailors were killed and Lieut. Bernadon and two others wounded. Bagley was the first officer killed in the war. The cable at Cienfuegos was cut by American sailors and one was killed. The first land fight of the war took place at the harbor of Port Cabañas. The transport steamer Gussie, carrying members of the 1st infantry, made a temporary landing and had a brush with the Spanish troops.

12. A portion of the fleet under Admiral Sampson bombarded the batteries defending San Juan, Puerto Rico, inflicting great damage and losing two men. The Spanish squadron was sighted at Martinique, Windward Islands.

13. The fleet known as the "flying squadron," under Commodore Schley, consisting of the cruiser Brooklyn, the battleships Texas and Massachusetts, the dispatch boat Scorpion and a collier, sailed from Hampton Roads.

14. The Spanish squadron was reported to be off the Venezuelan coast, near Caracas.

15. The entire Spanish cabinet resigned.

16. A new military department of the Pacific created, including the Philippines, and Gen. Merritt was assigned to the command. Camp Thomas, at Chickamauga, was occupied by volunteer troops.

18. The cruiser Charleston, Capt. Glase, bound for the Philippines to re-enforce Admiral Dewey, sailed from San Francisco.

19. The Spanish fleet under Admiral Cervera was reported to be at Santiago de Cuba.

21. The monitor Monterey ordered to Manila to re-enforce Admiral Dewey.

22. The 1st California regiment embarked on the City of Peking for Manila. This composed the first detachment of a brigade to be commanded by Brig.-Gen. T. N. Anderson.

25. The president called for 75,000 more volunteers. The transports City of Peking, City of Sydney and Australia sailed from San Francisco with 2,500 men and a year's supplies of ammunition and naval stores for the fleet at Manila.

26. The battleship Oregon arrived at Key West.

28. The Spanish reserve fleet left Cadiz for a practice cruise. A night attack of the torpedo-boat destroyers Pluton and Furor was made on Commodore Schley's fleet off Santiago de Cuba and repulsed.

30. A dispatch received from Commodore Schley at the navy department at 12:30 this morning says he had seen and recognized the Spanish fleet commanded by Cervera in the bay of Santiago de Cuba. Maj.-Gen. Miles, commanding the United States army, left Washington for Tampa, Fla.

31. The battleships Massachusetts and Iowa and the cruiser New Orleans of Commodore Schley's fleet engaged the Spanish flagship Cristobal Colon and four strong land batteries guarding the harbor of Santiago de Cuba and the batteries were silenced and some damage was done to the flagship.

#### JUNE.

1. Admiral Sampson joined Commodore Schley off Santiago de Cuba and took command of the united American fleets, comprising sixteen warships.

3. At 4 o'clock in the morning Lieut. Richmond P. Hobson, U. S. N., with a volunteer crew of seven men, sunk the collier Merrimac in the narrow channel at the entrance of the harbor of Santiago de Cuba. The seven men were: Osborn Deignan, George F. Phillips, Francis Kelley, George Charrette, Daniel Montague, J. C. Murphy and Randolph Clausen. The eight men, after the sinking of the Merrimac, drifted ashore on a catamaran and were taken prisoners by the Spanish forces. By a flag of truce from the Spanish admiral, "sent in recognition of their bravery," Admiral Sampson was informed that all had been made prisoners of war and that two were slightly wounded. In offering to exchange them for Spanish prisoners Cervera said that "daring like theirs makes a bitterest enemy proud that his fellow-men can be such heroes."

6. Ten ships maintained a bombardment of the batteries at Santiago de Cuba. The forts were silenced and the Spanish warship Reina Mercedes was sunk. Later in the day the defenses at Aguadores, a town east of Santiago de Cuba, were destroyed.

7. The cruiser St. Louis, protected by the Marblehead and Yankee cut the French cable off the port of Calmanera in Guantamano bay.

10. A landing is effected by 600 American marines from the transport Panther near the entrance of Guantamano harbor. The force was under the protection of the guns of the Oregon, Marblehead, Dolphin, Yankee, Yosemite, Porter and Vixen. A lodgment was effected on a small flat-topped hill and the camp was named McCalla.

11. Shortly after 5 o'clock in the afternoon the Spanish forces attacked Camp McCalla. A brisk skirmish was kept up until dark, during which the Americans lost four men. The Spanish loss is unknown.

12. Fighting at Camp McCalla was resumed. The Americans beginning the battle with fieldpieces. The Texas arrived and re-enforced the troops with forty marines and two Colt automatic guns, while the Marblehead shelled the woods on the south side of

the hill. The Spaniards opened fire with artillery, but the guns were soon silenced by the Texas. The camp was removed to the base of the hill. The fight was kept up during the night, the guns on board the Panther, Abarenda and Marblehead throwing shells. In the morning the Spanish troops retired.

13. A portion of the first military expedition left Tampa, Fla., for Santiago de Cuba, via Key West. Maj.-Gen. Shafter, who is in command of the expedition, reports the following as the troops composing his corps: Infantry—6th, 16th and 71st New York volunteers; 10th, 22d, 2d, 18th, 9th, 24th and 3th Massachusetts; 1st, 7th, 17th, 3d and 20th United States Infantry; 10,799 men and 561 officers. Cavalry—Two dismounted squadrons of four troops each from the 3d, 6th, 9th, 1st and 10th United States cavalry; two dismounted squadrons of four troops each from the 1st United States volunteer cavalry ("rough riders"), and one squadron of mounted, 3d cavalry; 3,155 men and 183 officers. Artillery—Light batteries E and K, 1st artillery; A and F, 2d artillery, and G and H, 4th artillery; 455 men and fifteen officers. Engineers—Companies C and E, 200 men and four officers. Signal corps—Forty-five men and two officers. The staff corps numbered fifteen officers. This made a total force of 14,564 men and 773 officers.

14. Scouting parties of marines and Cubans pursued the Spanish troops on Guantanamo bay, the Spanish loss being estimated at 200 killed and wounded.

15. The forts at Calmanera were bombarded by the warships Texas, Marblehead and Suwanee. The firing began at 2 o'clock and at 3 the forts and batteries were destroyed. The transport ships China, Colon, Zealandia and Senator, carrying 4,200 men, under command of Gen. F. V. Greene, sailed from San Francisco for Manila.

16. The forts at the Santiago harbor were again shelled by Sampson's fleet. The Spanish reserve fleet under Camara at Cadix sailed south.

18. Admiral Camara's fleet arrived at Cartagena.

20. United States troopships reached Santiago de Cuba. Gen. Shafter, Admiral Sampson and Gen. Garcia held a long conference at Aserradero in the afternoon.

21. Landing of troops from the transports began at Balquidri, seventeen miles east of Santiago de Cuba. The Spaniards on the island of Guam, one of the Mariana group, capitulated to the United States cruiser Charleston.

22. The auxiliary cruiser St. Paul attacked while off San Juan, Puerto Rico, by the Spanish torpedo-boat destroyer Terror; the St. Paul's fire disables the Terror, killing an officer and two men and wounding others.

23. The monitor Monadnock and the collier Nero sailed for Manila to re-enforce Admiral Dewey. Landing of the troops at Balquidri was completed.

24. In advancing from Balquidri Gen. Young's brigade of cavalry and the "rough riders" encountered a superior force of Spaniards at La Guasima, near Sevilla. A heavy fire was opened on the Americans and Sergt. Hamilton Fish, Jr., of the rough riders was killed and Capt. A. K. Capron mortally wounded. The enemy was finally driven from his position after the Americans had sustained a loss of sixteen killed and fifty-two wounded.

25. The Americans under Gen. Chaffee oc-

cupy Sevilla, which was abandoned by the enemy.

26. The advance guard of the American army reached San Juan, four miles distant from Santiago. This was the 7th regular infantry.

27. The third Manila expedition, consisting of the transport ships Indiana, Ohio, Morgan City and City of Para, commanded by Gen. Arthur McArthur, sailed from San Francisco.

28. The president issued a proclamation extending the blockade of Cuban ports to those of the southern coast, which extended also to the port of San Juan, Puerto Rico.

29. Maj.-Gen. Merritt sailed from San Francisco for the Philippines on board the Newport. Gen. Snyder's division, numbering more than 8,000 men, sailed from Tampa to re-enforce Gen. Shafter at Santiago de Cuba.

30. The cruiser Charleston, with three transports of the first Philippine expedition, arrived at Cavite in Manila bay.

## JULY.

1. The heights of El Caney and San Juan, overlooking Santiago de Cuba, are taken by the American troops. At 6 o'clock in the morning Capt. Capron's battery of four guns opened fire on El Caney from an elevation about a mile and a half distant. The guns were not heavy enough to destroy the enemy's works and at 8 o'clock Gen. Lawton's infantry of Chaffee's brigade, being the 7th, 12th and 17th regular infantry, assaulted the hill. They took it with more than 100 prisoners. At the San Juan hill a similar work was done. Grimes' battery opened the battle, while the charge was made by the 1st volunteer cavalry "rough riders" and the 1st and 10th regulars. The hill was carried and held. Gen. Linares, the Spanish commander, was wounded at El Caney and Gen. Vara del Rey, second in command, was killed. The next officer in rank was Gen. Jose Toral.

2. The Spaniards attempted to retake San Juan hill, but after severe fighting they were repulsed and Gen. Lawton extended the American lines to the north of Santiago de Cuba. The American losses in the two days' engagements were: Killed—Officers, 23; men, 208. Wounded—Officers, 80; men, 1,203; missing, 81 men. Several thousand Spanish re-enforcements succeeded in entering the city from the north.

3. The Spanish fleet under Admiral Cervera attempted to run out of the harbor of Santiago de Cuba. As the vessels appeared in line they were pursued by the Brooklyn, the Oregon, the Iowa and the Texas of the American squadron and the converted yacht Gloucester. The Spanish ships Maria Teresa, Almirante Oquendo and the Viscaya were within a few minutes forced ashore and surrendered. The Cristobal Colon made a desperate attempt to escape, but was run ashore and sunk about sixty miles from the mouth of the harbor. The two torpedo-boat destroyers Furor and Pluton were wrecked within four miles of the harbor. Admiral Cervera, Capt. Eulate and more than 1,300 officers and men were taken prisoners. The loss of life on the Spanish vessels was terrible, while on the American fleet only one was killed. None of the American vessels were injured seriously in the engagement. Gen. Shafter gave notice to Gen. Toral, commanding the Spanish forces at Santiago de Cuba, to remove from the city all non-combatants, as he was about to shell the city.

4. Truce was established between the two armies.

5. Gen. Toral was again called upon to surrender the city, but declined and the truce was extended.

6. The Spanish authorities exchange Lieut. Hobson and his seven men for prisoners taken by our troops.

7. An extension of the armistice at Santiago de Cuba is granted in order that non-combatants may leave the city and to permit the Spanish commander to communicate with Madrid in regard to capitulation. Gen. Miles left Washington for Santiago de Cuba via Charleston.

8. The Concord and the Raleigh of Admiral Dewey's fleet took possession of Isla Grande in Subig bay on the island of Luzon.

9. Gen. Miles sailed from Charleston on the Yale for Santiago de Cuba; with him went the 6th Massachusetts and the 1st battalion of the 6th Illinois, in all 1,720 men, to re-enforce Gen. Shafter. Gen. Toral offered to surrender the city of Santiago de Cuba if his troops were allowed to march out with their arms. The proposal was declined.

10. At 11:30 a. m. Gen. Shafter informed the Spanish commander that by the direction of the president the offer to surrender made yesterday was rejected and that the United States would accept no terms other than an unconditional surrender. Gen. Toral declined to discuss any other terms than those proposed by himself yesterday. About 5 o'clock the Brooklyn, Texas and Indiana, lying off Aguadores, threw shells over the bluffs in an attempt to reach the city, which was about five miles distant. Re-enforcements arrive at Siboney for Gen. Shafter; these are the 1st Illinois, 8th Ohio, 1st District Columbia and 330 recruits, making 4,546 men. The "rough riders" practiced on the Spanish outposts with their dynamite gun. Capt. Roswell and one private were killed and four were wounded.

11. Gen. Miles arrived at Santiago de Cuba and conferred with Gen. Shafter. At 6 o'clock in the morning the American lines were ordered to open fire on the Spanish defenses. The firing was very effective and great damage was done. The fleet threw 166 shells, of which 101 were effective, at a distance of 8,500 yards. Camanes, northwest of the city, was taken possession of by Gen. Ludlow.

12. Flag of truce remained up all day while Gen. Toral considered the demands for surrender.

13. Gen. Miles reports: "At a meeting between the lines at which Gen. Shafter, Gen. Wheeler and Gen. Toral were present the latter claimed that he is unable to act without the authority of his government, but has received authority to withdraw and surrender harbor, port, munitions of war and eastern portion of Cuba. He urgently requests until to-morrow noon to receive an answer from his government regarding offer of our government to accept his forces to Spain, which was granted."

14. Gen. Toral surrendered. A dispatch from Gen. Shafter to the war department says: "Have just returned from interview with Gen. Toral. He agrees to surrender upon the basis of being returned to Spain. This proposition embraces all eastern Cuba from Aserradero on the south to Sagua on the north, via Palma, with practically the 4th army corps. Commissioners meet this afternoon at 2:30 to definitely arrange terms." The agreement for the surrender of Santiago consists of nine articles, of which the following is the gist:

"1. That all hostilities shall cease pending the agreement of final capitulation."

"2. That the capitulation includes all the Spanish forces and the surrender of all war material within the prescribed limits."

"3. The transportation of the troops to Spain at the earliest possible moment, each force to be embarked at the nearest port."

"4. That the Spanish officers shall retain their sidearms and the enlisted men their personal property."

"5. That after the final capitulation the Spanish forces shall assist in the removal of all obstructions to navigation in Santiago harbor."

"6. That after the final capitulation the commanding officers shall furnish a complete inventory of all arms and munitions of war and a roster of all the soldiers in the district."

"7. That the Spanish general shall be permitted to take the military archives and records with him."

"8. That all guerrillas and Spanish irregulars shall be permitted to remain in Cuba if they so elect, giving a parole that they will not again take up arms against the United States unless properly released from parole."

"9. That the Spanish forces shall be permitted to march out with all the honors of war, depositing their arms, to be disposed of by the United States in the future, the American commissioners to recommend to their government that the arms of the soldiers be returned to those 'who so bravely defended them.'"

15. The fourth Manila expedition, consisting of the steamships Peru and City of Puebla, with 1,700 troops, sailed from San Francisco under command of Gen. Otis.

16. Admiral Cervera and the captured officers of his fleet reached Annapolis as prisoners of war.

17. The city of Santiago de Cuba was formally surrendered to Gen. Shafter, and the United States flag was hoisted over the palace. Gen. Shafter and Toral, with their staffs, met at a point between the lines of the American and Spanish forces at 9 o'clock in the morning. The Spanish commander, with a brief statement to the effect that Santiago de Cuba—city and province—had now been delivered to the United States government, offered to give up his sword, but it was returned to him. The United States flag was hoisted at exact noon. The second military expedition to Manila arrived at Cavite.

18. The president issued his proclamation regarding the government of Santiago de Cuba. One sentence gives the key-note of the lengthy document. He said: "We come not to make war on the inhabitants of Cuba nor upon any party or faction among them, but to protect them in their homes, in their employments and in their personal and religious rights." The first troops for Puerto Rico, numbering 6,200 men, under Gen. Wilson, commenced embarking at Charleston. Gen. Schwan's brigade had already left Tampa for the same destination.

20. A dispatch from Gen. Miles said: "We have the Massachusetts, Dixie, Gloucester, Cincinnati, Annapolis, Leyden, Wasop, Yale and Columbia. We expect to sail [for Puerto Rico] at 3 o'clock." The number of troops convoyed from Guantanamo was 3,415.

23. Five troops of cavalry stationed at Camp Alger were ordered to Puerto Rico.

The City of Rio de Janeiro, with 890 men, sailed from San Francisco for Manila, under command of Gen. H. G. Otis.

25. The military expedition under Gen. Miles effected a landing on the island of Puerto Rico at Guanica, on the southern coast of the island, fifteen miles west of Ponce, after a skirmish between the Gloucester and a small Spanish force. About 35,000 men in all, sailing from various points, compose the army going to Puerto Rico. The Newport, with Gen. Merritt on board, arrived at Manila.

26. The French ambassador, M. Jules Cambon, on behalf of the government of Spain, and at the request of the Spanish minister of foreign affairs, presented to the president a message designed to inaugurate negotiations for peace.

27. The American troops advanced on Yauco, in Puerto Rico.

28. Gen. Brooke sailed from Newport News with his command for Puerto Rico. Another expedition composed of the 1st battalion of South Dakota volunteers and recruits for the Colorado and Minnesota regiments sailed for Manila. Ponce surrendered to Commander Davis, U. S. N.

29. The American troops advanced from Cavite toward Malate on the road to Manila. Jibara, on the northern coast of Cuba, outside the province not ceded by Gen. Toral, was taken by the gunboat Nashville, the Spanish garrison retreating to Holguin.

30. A statement embodying the views of the president as to the basis of peace acceptable to the United States was transmitted to Spain.

31. The Spanish troops attacked the Americans entrenched near Malate, between Cavite and Manila. The American loss was nine killed and forty-seven wounded, while the Spanish loss was very heavy.

#### AUGUST.

1. American troops in Puerto Rico advanced toward San Juan, Gen. Miles having formed a junction with Gen. Brooke and Schwan.

2. Gen. Merritt requested the war department to increase his command to 50,000 men. The troops with him and those on the way to join him amount to 20,000.

4. Five volunteer regiments of immunes are ordered to Santiago de Cuba for garrison duty.

5. The town of Guayama in Puerto Rico was captured by the 4th Ohio and the 3d Illinois after a slight skirmish.

6. Transports sailed from Santiago de Cuba with troops of Shafter's command ordered north.

7. Admiral Dewey and Gen. Merritt demanded the surrender of Manila, which was refused. Spain's reply to the president's statement of the terms of peace was sent to Paris for transmission to Washington. The note suggests that a suspension of hostilities would make negotiations easier.

8. Skirmish near Guayama, Puerto Rico, in which five of the 4th Ohio were wounded.

9. The town of Coamo, Puerto Rico, was captured. Our loss was one killed and six wounded, while the Spanish loss was the commander, two captains and nine privates killed, thirty-five wounded and 180 taken prisoners. Spain's reply to the peace proposition was presented to President McKinley by the French ambassador, M. Cambon.

10. Secretary Day and M. Cambon agreed on the terms of a protocol to be transmitted

to Spain for approval. Gen. Schwan drove back a strong force of Spaniards north of Mayaguez, Puerto Rico.

11. A protocol suspending hostilities between the United States and Spain was signed at 4:23 p. m. in Washington, M. Cambon having received authority to act in behalf of Spain. The following is the text of the document:

"Protocol of agreement between the United States and Spain, embodying the terms of a basis for the establishment of peace between the two countries, signed at Washington Aug. 12, 1898. Protocol: William R. Day, secretary of state of the United States, and his excellency Jules Cambon, ambassador extraordinary and plenipotentiary of the republic of France at Washington, respectively possessing for this purpose full authority from the government of the United States and the government of Spain, have concluded and signed the following articles, embodying the terms on which the two governments have agreed in respect to the matters hereinafter set forth, having in view the establishment of peace between the two countries—that is to say:

"Article 1. Spain will relinquish all claim of sovereignty over and title to Cuba.

"Art. 2. Spain will cede to the United States the island of Puerto Rico and other islands now under Spanish sovereignty in the West Indies, and also an island in the Ladrões, to be selected by the United States.

"Art. 3. The United States will occupy and hold the city, bay and harbor of Manila, pending the conclusion of a treaty of peace, which shall determine the control, disposition and government of the Philippines.

"Art. 4. Spain will immediately evacuate Cuba, Puerto Rico and other islands now under Spanish sovereignty in the West Indies, and to this end each government will, within ten days after the signing of this protocol, appoint commissioners, and the commissioners so appointed shall, within thirty days after the signing of this protocol, meet at Havana for the purpose of arranging and carrying out the details of the aforesaid evacuation of Cuba and the adjacent Spanish islands, and each government will, within ten days after the signing of this protocol, also appoint other commissioners, who shall, within thirty days after the signing of this protocol, meet at San Juan, Puerto Rico, for the purpose of arranging and carrying out the details of the aforesaid evacuation of Puerto Rico and other islands now under Spanish sovereignty in the West Indies.

"Art. 5. The United States and Spain will each appoint not more than five commissioners to treat of peace, and the commissioners so appointed shall meet at Paris not later than Oct. 1, 1898, and proceed to the negotiation and conclusion of a treaty of peace, which treaty shall be subject to ratification according to the respective constitutional forms of the two countries.

"Art. 6. Upon the conclusion and signing of this protocol hostilities between the two countries shall be suspended, and notice to that effect shall be given as soon as possible by each government to the commanders of its military and naval forces.

"Done at Washington in duplicate, in English and in French, by the undersigned, who have herunto set their hands and seals, the 12th day of August, 1898.

"WILLIAM R. DAY.  
"JULES CAMBON."

On the same day the president issued the following proclamation:

"By the president of the United States of America—A proclamation.

"Whereas, By a protocol concluded and signed Aug. 12, 1898, by William R. Day, secretary of state of the United States, and his excellency Jules Cambon, ambassador extraordinary and plenipotentiary of the republic of France at Washington, respectively, representing for this purpose the government of the United States and the government of Spain, the United States and Spain have formally agreed upon the terms on which negotiations for the establishment of peace between the two countries shall be undertaken; and

"Whereas, It is in said protocol agreed that upon its conclusion and signature hostilities between the two countries shall be suspended, and that notice to that effect shall be given as soon as possible by each government to the commanders of its military and naval forces;

"Now, therefore, I, William McKinley, president of the United States, do, in accordance with the stipulations of the protocol, declare and proclaim on the part of the United States a suspension of hostilities, and do hereby command that orders be immediately given through the proper channels to the commanders of the military and naval forces of the United States to abstain from all acts inconsistent with this proclamation.

"In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done at the city of Washington this 12th day of August, in the year of our Lord one thousand eight hundred and ninety-eight, and of the Independence of the United States the one hundred and twenty-third.

"By the president

"WILLIAM MCKINLEY,  
"WILLIAM R. DAY, Secretary of State."

12. The troops under Gen. Merritt and the fleet under Admiral Dewey made a simultaneous attack upon Manila. The brigades under Gens. McArthur and Greene carried the Spanish works with a loss in killed, wounded and missing of about fifty men. After six hours' fighting the Spaniards surrendered the city with about 7,000 prisoners.

17. The president named as commissioners to adjust the evacuation of Cuba Maj.-Gen. James F. Wade, Rear-Admiral William T. Sampson and Maj.-Gen. Matthew C. Butler.

For Puerto Rico, Maj.-Gen. John R. Brooke, Rear-Admiral Winfield S. Schley and Brig.-Gen. William W. Gordon.

19. Spain named as commissioners for Cuba Maj.-Gen. Gonzales Parrade, Rear-Admiral Pastor y Landers and Marquis Montoro. For Puerto Rico, Maj.-Gen. Ortega y Diaz, Commodore Vallarino y Carrasco and Judge-Advocate Sanchez Agula y Leon.

20. The New York, Brooklyn, Massachusetts, Indiana, Texas, Oregon and Iowa joined in a grand naval parade in New York harbor.

25. Transports Rio de Janeiro and Pennsylvania arrived at Manila.

## SEPTEMBER.

9. The president appointed as peace commissioners William R. Day of Ohio, Senators William P. Frye of Maine, Cushman K. Davis of Minnesota, George Gray of Delaware and Mr. Whitelaw Reid of New York.

17. The American commissioners sailed for Paris.

18. The Spanish government named as commissioners Senor Montero Rios, Senor Abarzuza, Senor Garnica, Gen. Cerero and Senor Villarrutia.

20. The evacuation of Puerto Rico commenced.

21. Mustering out of volunteers to begin at once.

24. The commission appointed by the president to investigate the conduct of the war met at Washington. The commission was composed of the following persons: Maj.-Gen. Grenville M. Dodge of Iowa, Col. J. A. Sexton of Illinois, Capt. E. P. Howell of Georgia, Maj.-Gen. J. M. Wilson, chief of engineers of the United States army; the Hon. Charles Denby of Indiana, late minister to China; ex-Gov. Urban A. Woodbury of Vermont, ex-Gov. James A. Beaver of Pennsylvania, Maj.-Gen. A. McD. McCook of the army (retired), Dr. Phineas S. Connor of Cincinnati. Gen. Dodge was elected chairman of the commission.

## OCTOBER.

1. The American and Spanish peace commissioners held their first conference at the apartments of the French foreign office in Paris. It lasted ninety minutes.

18. United States flag was raised over San Juan, Puerto Rico, the Spanish evacuation having been completed.

## CASUALTIES IN THE AMERICAN ARMIES.

Total casualties in killed and wounded during the war with Spain from May 1 to Sept. 30:

|                 | Killed.       |                | Wounded.      |                |
|-----------------|---------------|----------------|---------------|----------------|
|                 | Off-<br>cers. | Priv-<br>ates. | Off-<br>cers. | Priv-<br>ates. |
| Cuba .....      | 23            | 237            | 99            | 1,332          |
| Puerto Rico.... |               | 3              | 4             | 36             |
| Manila .....    |               | 17             | 10            | 96             |
| Died of wounds  | 4             | 61             | ...           | ...            |
| Total .....     | 27            | 318            | 113           | 1,464          |

Number of deaths by disease and accidents from May 1 to Sept. 30 was as follows:

|                                                   |     |
|---------------------------------------------------|-----|
| Camp Thomas, Chickamauga Park, Ga.                | 425 |
| Camp Cuba Libre, Jacksonville, Fla....            | 246 |
| Tampa, Fla.....                                   | 56  |
| Cuba .....                                        | 427 |
| At sea, en route from Cuba to Montauk Point ..... | 87  |

|                                       |       |
|---------------------------------------|-------|
| Manila, Philippine islands.....       | 63    |
| Camp Wikoff, Montauk Point, N. Y..... | 257   |
| Puerto Rico.....                      | 137   |
| Camp Alger, Falls Church, Va.....     | 107   |
| Camps in San Francisco, Cal.....      | 139   |
| Camp Poland, Tenn.....                | 23    |
| Camp Shipp, Ala.....                  | 12    |
| Camp Meade, Pa.....                   | 64    |
| Camp Hamilton, Ky.....                | 39    |
| Camp Wheeler, Ala.....                | 35    |
| At posts and minor camps.....         | 373   |
| Officers .....                        | 80    |
| Total .....                           | 2,566 |

Grand total of deaths, all causes...2,910

The total force was 274,717 men and the loss by death from all causes was 1.069 per cent.

## QUOTAS OF THE STATES UNDER THE TWO CALLS FOR TROOPS.

(From the Report of the Adjutant-General of the Army, Nov. 1, 1898.)

## FIRST CALL, 125,000 MEN.

Alabama, 2 regiments and 1 battalion of infantry.  
 Arkansas, 2 regiments of infantry.  
 California, 2 regiments and 3 battalions of infantry, 4 batteries of heavy artillery.  
 Colorado, 1 regiment of infantry.  
 Connecticut, 1 regiment of infantry, 1 battery of light artillery and 2 batteries of heavy artillery.  
 Delaware, 1 regiment of infantry.  
 Florida, 1 regiment of infantry.  
 Georgia, 2 regiments of infantry and 2 battalions of light artillery.  
 Idaho, 2 battalions of infantry.  
 Illinois, 7 regiments of infantry, 1 battery of light artillery and 1 regiment of cavalry.  
 Indiana, 4 regiments of infantry and 2 batteries of light artillery.  
 Iowa, 4 regiments of infantry.  
 Kansas, 3 regiments of infantry.  
 Kentucky, 3 regiments of infantry and 2 troops of cavalry.  
 Louisiana, 2 regiments of infantry.  
 Maine, 1 regiment of infantry and 1 battery of heavy artillery.  
 Maryland, 1 regiment of infantry.  
 Massachusetts, 4 regiments of infantry and 1 battery of heavy artillery.  
 Michigan, 4 regiments of infantry.  
 Minnesota, 3 regiments of infantry.  
 Mississippi, 2 regiments of infantry.  
 Missouri, 5 regiments of infantry and 1 battery of light artillery.  
 Montana, 1 regiment of infantry.  
 Nebraska, 2 regiments of infantry.  
 Nevada, 1 troop of cavalry.  
 New Hampshire, 1 regiment of infantry.  
 New Jersey, 3 regiments of infantry.  
 New York, 12 regiments of infantry and 2 troops of cavalry.  
 North Carolina, 2 regiments of infantry.  
 North Dakota, 2 battalions of infantry.  
 Ohio, 8 regiments of infantry and 8 troops of cavalry.  
 Oregon, 1 regiment of infantry.  
 Pennsylvania, 15 regiments of infantry, 3 batteries of light artillery and 3 troops of cavalry.  
 Rhode Island, 1 regiment of infantry.  
 South Carolina, 1 regiment and 1 battalion of infantry, 1 battery of heavy artillery.  
 South Dakota, 1 regiment of infantry.  
 Tennessee, 3 regiments of infantry.  
 Texas, 3 regiments of infantry and 1 of cavalry.  
 Utah, 2 battalions of light artillery and 1 troop of cavalry.  
 Vermont, 1 regiment of infantry.

Virginia, 3 regiments of infantry.  
 Washington, 1 regiment of infantry.  
 West Virginia, 1 regiment of infantry.  
 Wisconsin, 3 regiments of infantry.  
 Wyoming, 1 battalion of infantry.  
 District of Columbia, 1 regiment of infantry.

## SECOND CALL, 75,000 MEN.

Alabama, 2 battalions of infantry.  
 California, 1 regiment of infantry.  
 Colorado, 1 battery of light artillery.  
 Connecticut, 1 regiment of infantry.  
 Georgia, 1 regiment of infantry.  
 Illinois, 2 regiments of infantry.  
 Indiana, 1 regiment and 2 companies of infantry.  
 Iowa, 2 batteries of light artillery.  
 Kansas, 3 battalions of infantry.  
 Kentucky, 1 regiment of infantry.  
 Louisiana, 3 batteries of light artillery.  
 Maine, 3 batteries of heavy artillery.  
 Maryland, 1 battalion of infantry.  
 Massachusetts, 1 regiment of infantry.  
 Michigan, 1 regiment of infantry.  
 Minnesota, 1 regiment of infantry.  
 Mississippi, 6 companies of infantry.  
 Missouri, 1 regiment of infantry.  
 Nebraska, 1 regiment of infantry.  
 Nevada, 4 companies of infantry.  
 New Jersey, 1 regiment of infantry.  
 New York, 3 regiments of infantry and 3 batteries of light artillery.  
 North Carolina, 7 companies of infantry.  
 Ohio, 1 regiment and 9 companies of infantry.  
 Oregon, 2 batteries of light artillery.  
 Pennsylvania, 15 companies of infantry.  
 Rhode Island, 2 batteries of light artillery.  
 South Carolina, 2 battalions of infantry.  
 Tennessee, 1 regiment of infantry.  
 Texas, 1 regiment of infantry.  
 Utah, 1 battery of light artillery.  
 Virginia, 2 battalions of infantry.  
 Washington, 1 battalion of infantry.  
 West Virginia, 1 regiment of infantry.  
 Wisconsin, 1 regiment of infantry and 1 battery of light artillery.  
 Wyoming, 1 battery of light artillery.  
 Arizona, New Mexico, Oklahoma and Indian Territory, 1 regiment of infantry.  
 Four regiments of engineers, aggregating 3,600 men, were recruited at large. Three regiments of cavalry (1st, 2d and 3d volunteer cavalry, including Roosevelt's and Torrey's rough riders) were recruited at large also, aggregating 3,000. Ten immune regiments of infantry were recruited south of Mason and Dixon's line and west to include the Mississippi valley, aggregating 10,000 men.

## STRENGTH OF THE ARMY.

|                     | Officers. | Enlisted men. | Total.  |                    | Officers. | Enlisted men. | Total.  |

| Aggregate.....      | 9,307     | 202,868       | 212,175 | Aggregate.....     | 11,108    | 264,199       | 275,307 |

The last volunteer organization was mustered into the service Aug. 24, 1898.

## THE ISLAND OF CUBA.

The island of Cuba was discovered by Columbus on his first voyage, Oct. 28, 1492, and settled by Velasquez in 1511-12. It is the largest of the Antilles and lies between 20 and 23 degrees north latitude and 74 and 85 degrees of longitude west of Greenwich. The western portion is about 130 miles south of Florida and about ninety miles from Key West, and from time immemorial it has been known as "the key to the Gulf of Mexico." On the coat of arms of the city of Havana is a key conspicuously displayed, which seems to imply that the city controls the waters in which it is so centrally located. The northern coast has a length of about 918 miles indented with thirty-two harbors, of which ten are denominated as "first class." The most important of these are Havana, Mariel, Cabañas, Bahía Honda, Matanzas, Cardenas, Sagua, Calbarien, Nuevitas and Jibara. The southern coast has a length of 973 miles, with twelve important harbors, the best of which are Guantanamo, Santiago de Cuba and Cienfuegos. Most of the important harbors of the island are spacious and will admit vessels drawing twenty-six feet of water.

cleanliness is practically unknown. The following table, prepared by W. F. H. Phillips of the United States weather bureau, shows the average monthly temperature and rainfall at Havana for the last ten years.

At Matanzas the temperature is slightly higher than at Havana and at Santiago de Cuba the annual average is about 4 degrees higher than at the capital city. At Havana the maximum temperature is between noon and 2 o'clock p. m. and the minimum between dawn and sunrise.

There are only two marked seasons in Cuba, the dry and the rainy. The rainy season at Havana begins in the latter part of May and ends with October. Relatively the greater bulk of the rain falls during the months from June to October, for during this period the average rainfall is 32.57 inches, or 43 per cent of the annual fall. The number of days upon which rain falls is about one day out of three. Notwithstanding the frequency of rain during the summer months they do not present the greatest number of cloudy days. The rains, "although copious, are of short duration, and those days on which showers do fall

The exact area of the island has not been determined. Estimates vary from about 35,000 to 72,000 square miles. At the lower estimate Cuba would be about equal in size to the state of Indiana and a little larger than the state of Maine. At the larger estimate it would exceed somewhat the state of North Dakota. Through the island from east to west extends a chain of mountains the highest of which is about 8,000 feet. The territory is well supplied with streams, there being more than 200 rivers, the most important of which is the Cauto in the province of Santiago de Cuba, which is 160 miles long and navigable for small craft for fifty miles. Another large stream is the Sagua, in the province of Santa Clara, which is 111 miles long and has twelve miles of navigable channel.

As a rule the climate of Cuba is healthful, especially in the rural districts in the east and center of the island. There are some localities where malarial fevers prevail and in many of the cities yellow fever, but this is confined mainly to towns in which the sanitary conditions are bad and where

are in general perfectly cloudless. It may almost be said that during these months clouds are to be seen in the atmosphere except while the showers are falling, while in other months cloudy days sometimes occur without rain."

According to an official census taken in 1890 the population of Cuba was then 1,631,687. For years Cuba has been the theater of war and great mortality and devastation have occurred. An official statement made by our government says:

"It may be assumed that the present population is not in excess of the figures of 1890 and it may be considerably lower. It has been estimated that, taking as a basis the kingdom of Belgium (482 inhabitants to the square mile), Cuba could support 24,000,000 people. Of the population in 1890 the percentages, according to race, were: Whites, 65; colored and Chinese, 35. The actual number of white Cubans was given at 850,000; colored Cubans, 500,000, and Spaniards, 160,000."

In a report made to the government in 1897 by Mr. Hyatt, United States consul at

Santiago de Cuba, he says: "The productive soil, mineral wealth and climatic conditions of the island entitle it to rank among the foremost communities of the world. The soil is a marvel of richness and fertilizers are seldom used, unless in the case of tobacco, even though the same crops be grown on the same land for a hundred years, as has happened in some of the old sugar-cane fields. The mountains are of coral formation, while the lowlands of eastern Cuba at least seem to be composed largely of fossils of sea matter from prehistoric times and are extremely rich in lime and phosphate, which accounts for their apparent inexhaustibleness. Although founded and settled more than fifty years before the United States, Cuba has still 13,000 acres of primeval forests: mahogany, cedar, logwood, redwood, ebony, lignum-vitæ and caliguan (which is more durable in the ground than iron or steel) are among the woods.

"If all the lands suitable to the growth of sugar cane were devoted to that industry it is estimated that Cuba might supply the entire western hemisphere with sugar. The island has already produced in a single year for export 1,000,000 tons and its capabilities have only been in the experimental stage. The adaptability of the soil for tobacco culture has long been known. Cuba takes great pride in the quality of her coffee and until the war the plantations were flourishing."

The land is not suited to the cultivation of cereals. No flour mill, Mr. Hyatt thinks, exists on the island. The consul continues:

"In mineral wealth Cuba is capable of taking high rank. Gold and silver have not been found in paying quantities. Copper was mined at Cobre by the natives before Columbus discovered the island and there is strong proof that native copper was carried across to Florida and used by the Florida Indians hundreds of years ago. The mound-builders of that state buried with their dead copper ornaments and utensils hammered from native copper, which always has an admixture of more or less foreign matter. As no copper ore is found in Florida or in the United States for a long distance from there, and as that found in the United States or in Mexico does not correspond chemically with that buried with the mound-builders, it occurred to Prof. R. H. Sanders of the Academy of Natural Sciences in Philadelphia that it was possible that these mound-builders had water communication with Cuba and got their copper from here. He therefore communicated with the writer and procured a sample of native Cuban copper, which proved upon analysis to be identical with that used in the copper ornaments mentioned. In the early part of the present century some English capitalists purchased these mines, which are nine miles from Santiago. The books of this consulate show that from 1823 to 1840 an average of from \$2,000,000 to \$3,000,000 worth of copper ore was shipped annually to the United States from these mines. How much was shipped elsewhere I have not the means of knowing.

"The iron mines of Cuba, all of which are located near Santiago, overshadow in importance all other industries on the eastern end of the island, constituting the only industry that has made any pretense of withstanding the shock of the present insurrection. The Juragua and Baiquiri iron

companies (American), with a combined capital of over \$5,000,000, now operate mines in this vicinity and employ from 800 to 1,400 men, shipping to the United States from 30,000 to 50,000 tons of iron ore per month, the largest portion of which is used at Bethlehem, Steelton, Sparrows Point and Pittsburg. The ore of these mines is among the richest in the world, yielding from 63 to 67 per cent of pure iron, and is very free from sulphur and phosphorus. There are numerous undeveloped mines of equal value in this region.

"In the Sierra Maestra range, on the southern coast of Cuba, from Santiago west to Manzanillo, within a distance of about 100 miles, are found numerous deposits of manganese, an ore indispensable in the manufacture of steel. American capital opened a mine about twenty miles distant, at a place called Ponupo, and built a railroad to it. After shipping one cargo the mines were stopped by the insurgents. As nearly all the manganese used in the United States comes from the Black sea regions of Europe and a smaller quantity from the northern part of South America, it is but reasonable to suppose that the products of these near-by mines will be in great demand when the conditions are such that they can be operated in safety.

"Railroads and other highways, improved machinery and more modern methods of doing business are among the wants of Cuba, and with the onward march of civilization these will doubtless be hers in the near future. Cuba, like other tropical and semi-tropical countries, is not given to manufacturing; her people would rather sell the products of the soil and mines and buy manufactured goods. The possibilities of the island are great, while the probabilities remain an unsolved problem."

Regarding the agricultural productions of Cuba the Bulletin of the Bureau of American Republics, published by the United States government, says:

"The great wealth of Cuba lies in the wonderful fertility of its soil. It is estimated that the island has 35,000,000 acres of land, but in 1868, according to official statistics, only 2,689,400 were under cultivation, 9,974,134 acres were utilized in cattle-raising and nearly 16,000,000 were still virgin forest. Ten years later, after the long insurrection, considerable land was cleared and the production of sugar assumed large proportions. On the other hand, old lands were abandoned and the acreage was not greatly increased. It may be assumed, therefore, that only a small fraction of the agricultural wealth of Cuba has been developed and that at least 20,000,000 acres of land await the application of industry and capital.

"The principal industry of Cuba has been for many years the cultivation of sugar cane and the making of sugar, but this industry has suffered in recent years by the competition of European beet sugar and the internal disorders of the island. With the occupation of the island by the United States it is more than probable that the sugar industry will again revive and become remunerative. The great advantage of sugar-growing in Cuba is found in the fact that the cane reproduces itself, without the necessity of reseed, for ten, fifteen or twenty years, according to the nature of the soil. The sugar is of superior quality and

the proximity of the island to the United States of America is a favoring condition. The production of sugar from 1894 to 1896 aggregated over 1,000,000 tons. From 1896 to 1898 it was only 225,000 tons.

"Cuba has long been famous for the superiority of its tobacco. Efforts have been made to rival the Cuban tobacco in different parts of the world, but it seems to hold its own as excelling all others. The plant is grown in greatest abundance in the western part of the island, Vuelta Abajo, and in some localities in the provinces of Santa Clara and Santiago de Cuba. Next in rank in quality and quantity is the product of the district of Manicaragua in the province of Santa Clara. The Vuelta Abajo region, where the best tobacco on the island is raised, has suffered considerably from insurrection and it is believed that the crop for 1897 will not exceed 30,000 bales of 110 pounds—a tenth part, approximately, of the ordinary yield. Nearly all the leaf tobacco and about half the twist of Cuba is exported to the United States.

"Coffee for a long time constituted one of the principal products of Cuba, but since 1845 the development of the coffee product of Brazil and other countries, together with economic conditions in Cuba, caused the cultivation to decline and coffee is now raised almost exclusively for local consumption.

"Besides sugar, tobacco and coffee Cuba produces all the different classes of fruits known to the tropics and many of those belonging to the temperate zone. Among them are the pineapple, the banana, the orange, the mango and the guava. The cocoanut is also an important product. The forest wealth of Cuba is very great and but slightly developed. The island is rich in cabinet wood, among which the most important are mahogany and cedar. Among the trees the one most characteristic of a Cuban landscape is the palm, of which there are thirty-two species. Its wood and leaves are employed in the manufacture of several articles of trade, including hats and baskets. The soil of the island is well adapted to the production of all kinds of vegetables. The Cuban potato is said to be as good as that of Bermuda or Peru and the sweet potatoes are of superior quality.

"The price of Cuban land varies to a considerable extent. In the wealthy sugar districts 1,000, 1,200 and sometimes 3,000 pesos (\$928, \$1,111 and \$2,778) was paid per 'caballeria' (about 32.1 acres), but in other sections of the island, and especially where there are no railway facilities, land could be obtained at a nominal price."

Cuba has several important cities and towns. The largest is Havana, the capital, situated on the northern coast, and which has long been famous for its commerce. The city has a population of about 200,000; it is the residence of the captain-general and other authorities. It is defended by eight forts, has a fine navy yard, arsenal, gun manufactory, repair shops, barracks and hospitals. It has also three large markets, twenty-four churches, six theaters, a university, a school of fine arts, several public libraries and many educational institutions. It has several manufactories, street-railway and omnibus lines, railroads connecting with other parts of the island, gas and electric lighting plants and eighty newspapers and other periodicals.

Pinar del Rio, capital of the province of

the same name, has a population of 30,000. It is situated about 135 miles southwest of Havana, with which it is connected by a railroad. It is noted for the fine quality of the tobacco grown in its vicinity.

Matanzas, capital of the province of Matanzas, is sixty-six miles east of Havana and has a population of 66,000. It is famous for its proximity to the Hellamar caves and the valley of the Yumuri.

Cardenas is ninety miles east of Havana and is a commercial port of importance. It has a population of 23,000.

Santa Clara, 218 miles east of the capital, with which it is connected by rail, has a population of 22,000.

Sagua la Grande, eighty miles east of Havana, is situated on the river of the same name, seven miles from its mouth, and has a population of 18,000.

Cienfuegos, in the province of Santa Clara, is situated on the southern coast of the island, on the fine bay of Jagua, and is a thriving center of trade. It is about 100 miles southeast of Havana and has 40,000 inhabitants. In the same province are Trinidad, with 29,000 inhabitants; Sancti Spiritu, 20,000, and San de los Remedios, 15,000.

Puerto Principe, capital of that province, some 200 miles east of Havana, has 49,000 inhabitants.

Santiago de Cuba is the capital of the province in which it is situated, has a population of about 50,000 and one of the finest harbors on the southern coast. It has a number of important buildings and at one time was the capital of the island. It is a noted city, but in the future it will be best known because of its capitulation to the American army of invasion on the 14th of July, 1898. In the same province are the important towns of Mansanillo, Bayamo, Jiguani, Holguin, Jibara, Guantanamo and Baracoa.

There are ten railway companies operating lines of road in Cuba, the more important being the Ferrocarriles Unidos, with 1,000 miles of main road connecting Havana with Matanzas, Batabano, Union and Guanajay. The next in importance is the Western railway, ninety-six miles long, running to Pinar del Rio.

The telegraph and telephone systems in Cuba belong to the government, but the latter is farmed out for a limited number of years to a company called the Red Telefonica de la Habana. Nearly all the public and private buildings in the city and suburbs are connected by telephone. The Statesman's Year Book, 1898, says that there are 2,300 miles of telegraph line with 153 offices.

Under the Spanish administration Cuba was divided into three regions—the western, central and eastern. Each region comprises two provinces, divided into several judicial districts, and these again subdivided into municipal sections. The western region embraces the provinces of Pinar del Rio and Havana, the central comprises the provinces of Matanzas and Santa Clara and the eastern provinces are made up of Puerto Principe and Santiago de Cuba. The capital of the island is the city of Havana.

Prior to 1898 the island was governed by a governor and captain-general, appointed by the Spanish crown, who is the superior political, military and economic chief. Each of the six provinces was administered by a

governor. On the 1st of January, 1898, the Spanish government adopted a system of autonomous government for the island, providing for popular representation in the administration of affairs, but it was not accepted by the insurgents and has had no practical effect. Under the terms of the suspension of hostilities between the United

States and Spain the affairs of the island are likely to be administered for the present by the military commanders of the United States forces.

The trade of the United States with Cuba since 1891 is given as follows by the bureau of statistics, treasury department:

| DESCRIPTION.           | 1891.        | 1892.        | 1893.        | 1894.        | 1895.        | 1896.       | 1897.       |

## THE ISLAND OF PUERTO RICO.

The island of Porto Rico, or, according to the spelling of the Spanish, Puerto Rico, meaning "a rich port," ranks fourth in size with the islands of the Greater Antilles, being exceeded in area by Cuba, Santo Domingo and Jamaica. It lies between the seventeenth and nineteenth parallels of north latitude and the sixty-sixth and sixty-seventh degrees of longitude. Authorities are not exactly agreed as to the area of the island. A recent report by a British consul gives it an area of about 3,668 square miles—thirty-five miles broad and ninety-five miles long. An American authority says the "island is, in shape, an irregular parallelogram, being a little under 100 miles long by one-third of that distance broad." The island was discovered by Columbus on his second voyage, on the 16th day of November, 1493. According to tradition he landed on the western coast of the island at the site of the present town of Aguadilla, which means "a watering place," and, as the locality is now famous for its supply of excellent fresh water, it is supposed that he touched there to refill the tanks of his vessels. The native name of the island was Borinquen and the inhabitants were of the same Indian race that occupied Haiti. The Spaniards were delighted with the beauty of the island and with its fertility, and Prince Juan Ponce de Leon, one of Columbus' officers, assumed control in the hope of acquiring fortunes for himself and some of his personal followers. He remained and established a government, the object being to wring as much out of the peaceable and inoffensive people as was possible. The Indians in 1508 arose in rebellion against the arbitrary rule of Ponce de Leon; the revolt lasted until 1510, the result being that the inhabitants were defeated and the Spanish rule thoroughly established on the island. In 1511 the present capital city was founded and called San Juan Bautista de Puerto Rico.

There was nothing of interest in the history of the island between 1510 and 1596. The period is filled with the stories of the wrongs of the Spaniards and the sufferings of the people, for the avarice of the conquerors was unappased and the rights of the inhabitants were unrespected. In 1595 the daring British admiral Drake made an attack upon San Juan, burned a portion of the town and destroyed some of the Spanish ships in the harbor, but he was forced to embark without being able to hold the city permanently. The next year the earl of Cumberland, another British officer, attacked the place and compelled the citadel, Morro, to capitulate, but his sailors fell victims to the fevers and diseases incident to the climate and he was obliged to abandon his conquests. In 1625 Gen. Heinrich, a Dutch officer, led an expedition against the island and laid siege to the town and citadel, but in an attack upon the fortifications the Dutch were routed and Heinrich was killed. Again in 1673 the English planned an attack upon San Juan, but it failed, owing to a storm that scattered the fleet and destroyed some of the vessels. The attempt was repeated in 1703, when a landing was effected at Arecibo, a point some thirty miles west of San Juan, but it was repulsed with great loss and the British admiral was compelled to re-embark his forces and give up the attempt to take the island. The last attack on the island was made by the

noted British commander, Sir Ralph Abercromby, in 1797. He laid siege to San Juan, which he maintained for some two weeks, when, owing to insufficiency of his forces, he abandoned the effort and retired. Until the bombardment of the fortifications by Admiral Sampson on the 12th of May, 1898, the city had had a century's respite from attacks by the enemies of Spain.

There have been several ineffectual attempts of the people to throw off the Spanish rule, one of the earliest of which was the effort to establish a republic in 1820. The movement was checked without loss of life by the wise course of the governor, Torre, who was one of the ablest men that Spain has ever intrusted with the direction of any of her colonies. Another rebellion broke out in 1867, which was inspired by a sympathy with the revolt in Cuba then being carried on. An earthquake so frightened the people that the uprising went to pieces and was not again actively taken up, although peaceable efforts to secure independence have never been wholly abandoned on the part of the more influential portion of the people. The island has a population of about 815,000, of whom over 300,000 are negroes, the remainder being mostly Spaniards, besides some Americans, English, Germans and other European peoples. The surface of the island is broken by hills and low mountain ranges, one of which passes through it from east to west, with spurs projecting nearly to the northern coast. The highest point in this range is El Yunque, which rises 3,705 feet above the sea level and is visible for fifty or sixty miles from the coast. The island abounds with streams of the purest water, there being 1,300 flowing into the sea, of which forty-seven are rivers of considerable size. The island is thus abundantly watered and furnishes pasturage for immense herds of wild cattle.

The climate is exceptionally salubrious for a tropical one, and much of this is due to the fact that there is very little stagnant water, most of it being in running streams, and this has the effect of rendering the air pure and healthful. For foreigners the island of Puerto Rico has been more attractive than any of those surrounding it, the winters being especially pleasant, and from November to April living in the mountain valleys is delightful. In the northern section of the island the rainy season begins in May and extends to the last of September, the rain falling often like a deluge. It is estimated that in some sections the fall of water in those months aggregates about seventy cubic inches. During this period of the year there is an almost constant sea breeze from the north during the entire day, which makes life on that coast endurable. In the southern portions there is often very little rain, it being frequently the case that none is seen for the entire twelve months of the year. The most unfavorable months for those not acclimated are August and September, when fevers and malarial disorders are prevalent, but living in the mountains affords some protection against sickness.

The island is naturally adapted to agriculture, for the soil is rich and easily worked. It is chiefly clay mixed with marl, and the abundant natural supply of water keeps it productive even in those portions that are not visited by the rains that are common to the northern sections of the

island. The mountains are covered with timber, of which the palm is the most useful, the wood for lumber, the fruit for food and the leaves for thatching the dwellings of the negroes. A good deal of mahogany is exported and the plantain and the banana supply large quantities of food for the poorer classes. Coffee, tobacco and sugar cane grow in profusion, while cotton of peculiar fineness is easily cultivated. In 1896 the exports of the leading staples were: Sugar, \$4,204 tons; coffee, 26,455 tons; hides, 160 tons; cattle, 3,187 head; timber, 30 tons; molasses, 14,740 tons, and tobacco, 1,039 tons. Besides these the island produces flax, cassia, ginger, rice, maize, citrons, lemons, oranges and many other varieties of fruits. So far as is now known there are no important deposits of ores or minerals, although traces of gold have been found in the beds of the streams and indications of iron, copper, lead and coal have been discovered.

There is no portion of the West India islands in which the people are in a better condition than in Puerto Rico. This is due to the fact that it is an agricultural country and the poorer classes have been encouraged to become the possessors of land and many of them have become small landed proprietors. When slavery existed in the island slaves were encouraged to purchase their freedom and many availed themselves of the favorable terms offered. In 1873 slavery was abolished. The island has therefore been comparatively free from revolts and political disorders, notwithstanding the fact that the people disliked the Spanish rule. The island has become the home of a free, self-sustaining peasantry, imposing no burdens upon the government, but each family usually having its modest home, with necessary stock, and producing all that is required for support. The way the American soldiers were greeted shows the simplicity and hospitality of the plain people. The worst thing in the social condition of the inhabitants is their ignorance and superstition. They need schools of every kind and religious instruction.

Puerto Rico was a province of Spain, governed by a captain-general, who was the civil governor and also commander of the military forces stationed on the island, as well as the head of the highest court. Outside of San Juan the island is divided into seven military departments, each being under a separate official. The towns are governed by alcaldes, or mayors, appointed from San Juan. The government is supported by duties on imports, licenses for lotteries, public gaming houses and cockpits. The more important cities and towns are San Juan, Ponce, Mayaguez, Aguadilla, Arecibo, Fajardo, Naguabo and Arroyo. The following description of these places is taken from the United States consular reports:

#### SAN JUAN.

San Juan is situated on a long and narrow island, separated from the main island at one end by a shallow arm of the sea, over which is a bridge connecting it with the mainland, which runs out at this point in a long sand spit some nine miles in length apparently to meet the smaller island; at the other end the island ends in a rugged bluff or promontory some hundred feet high and three-fourths of a mile distant from the main island. This promontory is crowned by Morro castle, the principal fortification of the town. At this end of the island is the entrance to the harbor, with a

narrow channel and rocky bottom, so close under the headland that one can almost leap ashore from a passing vessel. The water here is some thirty feet deep. To a mariner unacquainted with the locality, or when a norther is blowing, this entrance is one of difficulty and danger. After rounding the bluff one finds a broad and beautiful bay, landlocked and with a good depth of water, which is being increased by dredging. It is by far the best harbor in Puerto Rico and probably as good a one as can be found in the West Indies. However, it has its drawbacks. Sailing vessels are frequently detained by the northerly winds during the winter months, and even steamers with a draft of over twenty feet are sometimes delayed; but these occasions are rare. When they do occur the "boca," or entrance to the harbor, is a mass of seething, foaming water and presents an imposing spectacle. To see steamers of sixteen to eighteen feet draft enter in a severe norther is a sight to be remembered, as the great waves lift them up and seem about to hurl them forward to destruction. At such times there is need of a staunch vessel, steady nerves and a captain well acquainted with the channel, as no pilot will venture out. The island upon which the city stands is shaped much like an arm and hand; it is about two and one-fourth miles long and averages less than one-fourth of a mile in width. The greatest width is a little over half a mile in the portion representing the hand, which also contains the major part of the city. San Juan is a perfect specimen of a walled town, with portcullis, moat, gates and bastlements. Built over 250 years ago it is still in good condition and repair. The walls are picturesque and represent a stupendous work and cost in themselves. Inside the walls the city is laid off in regular squares, six parallel streets running in the direction of the length of the island and seven at right angles. The houses are closely and compactly built of brick, usually of two stories, stuccoed on the outside and painted in a variety of colors. The upper floors are occupied by the more respectable people, while the ground floors, almost without exception, are given up to negroes and the poorer class, who crowd one upon another in the most appalling manner. The population within the walls is estimated at 20,000 and most of it lives on the ground floor. In one small room, with a flimsy partition, a whole family will reside. The ground floor of the whole town reeks with filth and conditions are most unsanitary. In a tropical country, where disease readily prevails, the consequence of such herding may be easily inferred. There is no running water in the town. The entire population depends upon rain water, caught upon the flat roofs of the buildings and conducted to the cistern, which occupies the greater part of the inner courtyard that is an essential part of Spanish houses the world over, but that here, on account of the crowded conditions, is very small. There is no sewerage, except for surface water and sinks, while vaults are in every house and occupy whatever remaining space there may be in the patios not taken up by the cisterns. The risk of contaminating the water is very great and in dry seasons the supply is entirely exhausted. Epidemics are frequent and the town is alive with vermin. fleas, cockroaches, mosquitoes and dogs. The streets are wider than in the older part of Havana and will admit two carriages abreast. The sidewalks are narrow and in

places will accommodate but one person. The pavements are of a composition manufactured in England from slag, pleasant and even, and durable when no heavy strain is brought to bear upon them, but easily broken and unfit for heavy traffic. The streets are swept once a day by hand, and, strange to say, are kept very clean. From its topographical situation the town should be healthy, but it is not. The soil under the city is clay mixed with lime, so hard as to be almost like rock. It is consequently impervious to water and furnishes a good natural drainage. The trade wind blows strong and fresh and through the harbor runs a stream of sea water at a speed of not less than three miles an hour. With these conditions no contagious diseases, if properly taken care of, could exist; without them the place would be a veritable plague spot. Besides the town within the walls there are small portions just outside, called the Marina and Puerta de Tierra, containing 2,000 or 3,000 inhabitants each. There are also two suburbs, one, San Turce, approached by the only road leading out of the city, and the other, Matano, across the bay, reached by ferry. The Marina and the two suburbs are situated on sandy points or spits and the latter are surrounded by mangrove swamps. The entire population of the city and suburbs, according to the census of 1887, was 27,000. It is now (1896) estimated at 30,000. One-half of the population consists of negroes and mixed races. There is but little manufacturing and it is of small importance. The Standard Oil company has a small refinery across the bay, in which crude petroleum, brought from the United States, is refined. Matches are made, some brooms, a little soap and a cheap class of trunks. There are also ice, gas and electric light works. The climate is warm, but for three months of the year agreeable, although one is subject, from the sudden change, to colds and catarrh. The natives are particularly susceptible to this class of ailments and to consumption and bronchitis.

#### PONCE.

The city is situated on the south coast of the island of Puerto Rico, on a plain, about two miles from the seaboard. It is regularly built—the central part almost exclusively of brick houses and the suburbs of wood. It is the residence of the military commander and the seat of an official chamber of commerce. There is an appellate criminal court, besides other courts; two churches—one protestant, said to be the only one in the Spanish West Indies—two hospitals besides the military hospitals, a home of refuge for the old and poor, a perfectly equipped fire department, a bank, a theater, three first-class hotels and gas works. The city has an ice machine and there are 115 vehicles for public conveyance. The inhabitants, who number about 15,000, are principally occupied in mercantile pursuits, but carpenters, bricklayers, joiners, tailors, shoemakers and barbers find good employment. The department of Ponce counts about 40,000 inhabitants. The chief occupations of the people are the cultivation of sugar, cocoa, tobacco and oranges, and the breeding of cattle. Commercially Ponce is the second city of importance on the island. A fine road leads to the port (Playa), where all the import and export trade is transacted. Playa has about 5,000 inhabitants, and here are situated the custom house, the office of the captain of the port and all the consular offices. The port is spacious and will hold vessels of twenty-five feet draft.

The climate, on account of the sea breezes during the day and land breezes at night, is not oppressive, though warm; and, as water for all purposes, including the fire department, is amply supplied by an aqueduct, it may be said that the city of Ponce is perhaps the healthiest place in the whole island.

#### MAYAGUEZ.

Mayaguez, the third city of importance of the island, is situated in the west part, facing what is generally known as the "Mona channel." Of industries there is little to be said, except that there are three manufactories of chocolate, which is for local consumption. Sugar, coffee, oranges, pineapples and coconuts are exported largely—all, except coffee, principally to the United States. Of sugar the muscovado goes to the United States and the centrifugal to Spain. Mayaguez is the second port for coffee, the average annual export being 170,000 hundredweight. The quality is of the best, ranging in price with Java and other first-rate brands. The lower grades are sent to Cuba. About 50,000 bags of flour are imported into this port every year from the United States, out of the 180,000 bags that are consumed in the whole island. The population is nearly 20,000, the majority white. The climate is excellent, the temperature never exceeding 90 degrees Fahrenheit. The city is connected by tram with the neighboring town of Aguadilla, and a railroad is being constructed to Lares, one of the largest interior towns.

#### AGUADILLA.

The city, which is the principal town and the port of Aguadilla district. In the north-west portion of the island, has 5,000 inhabitants. Industries in the vicinity consist of the cultivation of sugar cane, coffee, tobacco and coconuts and the distillation of rum from molasses. In the town are three establishments for preparing coffee for exportation. The climate is hot, but healthy; there is hardly ever yellow fever.

#### ARECIBO.

The town, of from 6,000 to 7,000 inhabitants, is situated on the north coast of Puerto Rico, facing the Atlantic ocean, and some fifty miles distant by rail from San Juan. It is similar to all Spanish towns, with a plaza surrounded by the church and other public buildings in the center, and streets running from it in right angles, forming regular squares. The buildings are constructed of wood and brick. The harbor is poor, being nothing more than an open roadstead exposed to the full force of the ocean, in which vessels during northerly winds can hardly lie in safety. Close inshore, on one side, dangerous reefs stretch, a constant menace to vessels if the anchor does not hold. Into this harbor empties a narrow and shallow stream called the Rio Grande de Arecibo. Goods are conveyed on this river to and from the town in flat-bottomed boats, with the aid of long poles and by dint of much pushing and patience. At the bar of the river everything is again transferred into lighters, and thence to vessels. It is a tedious and expensive process. However, Arecibo is quite an important port and has tributary to it a large district of some 30,000 inhabitants. The want of good roads in the island makes such a place as Arecibo far more important than it would naturally be.

#### FAJARDO.

The town, on the east coast of the island, has a population of 8,779, according to the

last official statistics (December, 1887). The port is handsome, with a third-class light-house at the entrance at the point called Cabezas de San Juan and a custom house open to universal commerce. The town is about one and one-quarter miles from the bay. The only important industry of the district is the manufacture of muscovado sugar, to which most of the planters devote themselves. Shooks, hickory hoops, pine boards and provisions come from the United States in considerable quantities. Sugar and molasses are exported and occasionally tortoise shell. The climate is temperate and healthy.

#### NAGUABO.

Naguabo (on the east side) is a small town of only about 2,000 inhabitants, and in the harbor there is another smaller place, called Playa de Naguabo, or Ucareas, with about 1,500. The capital of the department, Humacao, is nine miles from Naguabo and has 4,000 inhabitants, the district comprising more than 15,000.

#### ARROYO.

Arroyo, in the district of Guayama (south-east portion), is a small seaport of about

1,200 inhabitants. The annual exports to the United States average 7,000 to 10,000 heads of sugar, 2,000 to 5,000 casks of molasses and 50 to 150 casks and barrels of bay rum.

#### VIQUE.

The island of Vique, situated thirteen miles east of Puerto Rico, is twenty-one miles long and six miles wide. Its land is very fertile and adapted to the cultivation of almost all the fruits and vegetables that grow in the West Indies. Cattle are raised and sugar cultivated. It has a population of some 6,000. The town, Isabel Segunda, is on the north, and the port is unsafe in times of northerly wind, like all the anchorages on that side; the few ports of the south are better, the best being Punta Arenas. Not long ago there were two importing and exporting houses on the island of Vique, but on account of the long period of drought and the high duties on foreign imported goods trade has decreased to local consumption only. All supplies are brought from San Juan, the majority being of American origin. The climate is fine and may be considered healthy; there have never been any contagious diseases.

### COMMERCE OF THE UNITED STATES WITH PUERTO RICO FROM 1890 TO 1897 BY PRINCIPAL ARTICLES.

#### IMPORTS FROM PUERTO RICO.

THE PHILIPPINE ISLANDS.

There are few portions of the globe concerning which less is accurately known than that division which is embraced within what is commonly called the Philippine archipelago. The Spanish occupants of the territory have been opposed to the development of the islands, and have imposed taxes so onerous on all branches of industry that explorations to ascertain what the islands really contained or were capable of producing have been

limited to incursions prompted more by curiosity than for any practical object. An English resident has this summer published a pamphlet on the gold productions of the Philippines, in which he says: "Not five books in the English language are worth considering about them [these islands]. Crawford's history of the Indian archipelago, published early in this century, is still the student's textbook. Whatever has been published since then,

when it rises above the level of a mere traveler's tale, is either not comprehensive or not reliable."

The archipelago lies between 4.40 and 20 north latitude and 116.40 and 126.30 east longitude. So little is known about the region that writers do not agree as to the number of islands that make up the archipelago. A recent writer says: "The number of islands which form the Philippine archipelago will astonish many readers. It is said to approach 2,000. There are among them two that are larger than Ireland—namely, Luzon, with 42,000, and Mindanao, with 18,000 square miles. There are other islands with 5,500, 5,000, 4,500, 4,000, 3,500 and 3,000 square miles." Of the whole number some 600 are habitable. While there is much uncertainty regarding the area of the Philippines there is as little known as to the number of inhabitants that dwell upon them. Mr. Joseph T. Mannix, an educated native of Luzon, in an article published in June, 1898, says: "There are in the Philippines between 6,000,000 and 9,000,000 people—probably about 7,500,000. Nearly half of this number inhabit Luzon, the principal island of the group." Of these he says: "The Tagals of Luzon are a copper-colored people, and, like all people of the Malay family, are short of stature. These Tagals are the most advanced and influential element of the entire population of the islands. There are a great many very intelligent and ambitious men among them—men who got their start in the schools established by the monastic friars, whose political domination furnishes one of the many grievances which have given rise to the present rebellion." The Tagals number about 2,000,000, and they are rapidly increasing. Next to the Tagals in point of intelligence come the Vicos, or Bicolis, who occupy the Camarines peninsula, with the islands of Catanduanes, Burias, Ticao and half of Masbate. They greatly resemble the Tagals, and, like them, have made considerable progress in civilization. They number at least 400,000. The third division of the people are the Visayas, or Bisayas, who occupy the islands between Luzon and Mindanao, and are estimated at 2,500,000. Besides these are the Moors of the Sulu archipelago, the Negritos and some other families of the Malay race. On the whole, the Philippine natives find and take life easily. Their requirements are few. The sum of \$5 will provide a native household with a dwelling of its own and ample furniture. Under a genial climate, on a soil lavishly grateful for the slightest tending, by waters teeming with fish, they know naught of hunger and have much time left for amusements—such as dancing and public rejoicings on the smallest occasion, music, for which they have a natural talent, so that there is scarcely a commune without a fairly trained brass band—and gambling! Cockfighting is the national sport and no mean source of revenue to the authorities. Almost every native owns a fighting fowl, which is as dear to him as her lap dog is to a European lady. He carries it about with him and bets his bottom dollar on its performance in the arena. Thus the native is an intermittent rather than a steady worker, and his delight in feasts and holy days, and his content, which passes him off as rich in his own mind with \$10 in his purse, make him as a laborer, docile as he is and willing to

please, a source of frequent annoyance to his employers.

The Philippine islands were discovered by Magellan, who landed at the island of Cebu (or Zebu), where he anchored in March, 1521, and lost his life in a skirmish with the natives. In 1566 the islands were taken possession of by a fleet from Mexico, which first stopped at Cebu and subdued it. In 1570 a settlement was effected at the mouth of the Manila river, which place became the capital of the Spanish possessions in the Philippines and has remained so to the present time. At the time of the arrival of the Spaniards at Manila there were two fortified villages, one on either side of the Pasig river, and these they took on the 9th of May, 1571, the chiefs making their submission to their conquerors, and their example was followed by many of the tribes of Luzon. Previous to this the island had been practically under the dominion of the Chinese, who had shaken off the authority of that empire, but these people still continued to control the trade of the island after the Spanish capture. A little later a Chinese pirate, Li Ma Hong, attempted to drive out the Spaniards, but failed in the attempt with the loss of his fleet and his own life. In 1606 the Dutch attempted to take the islands, but their ships were destroyed and the enterprise failed. In 1763 Manila was captured by the British, and would probably have remained a possession of that country had not political conditions in Europe forced England to evacuate the city after Spain had promised a ransom of \$5,000,000, which has not been paid to this day.

Rebellions have been frequent in which the people have attempted to rid themselves of Spanish rule. Those of 1822, 1841, 1842, 1872, 1896 and 1897 have been the most important. The revolts have all had a common cause—the tyranny and exactions of the Spanish officials. Although the Spaniards made their appearance forty-four years after the death of Magellan the conquest of the archipelago is still far from complete. By an abuse of language the Philippines are mentioned as a Spanish colony, but they form in reality only a military possession, in which the whites are mainly officials, who control the natives, but they have founded few permanent settlements in the country. Except at Manila there are few towns or villages that are Spanish in fact. To extort money from the people, under the various forms of taxation that cunning and rapacity have devised, is, and for many years has been, the sole purpose of Spain and the business and object of the governmental officials that have been maintained there.

Upon this subject a recent writer has said: "It is no natural or physical disadvantage that accounts for the waste and neglect of the rich resources of the Philippines. These richly endowed islands have been kept in their primitive darkness and barbarism by the power that should have lifted them into the light of civilization and set them in the flowing stream of modern life. Her treatment of them is but one count in the long and terrible indictment that history brings against Spain for the opportunities she has neglected and the trusts she has betrayed. She has regarded her subject peoples in no other light than as sources of revenue for her government and her officials, and for that crim-

inal error, with all its cruel consequences, she is paying the penalty to-day. In the Philippines the representative of Spanish rule has been the tax collector. The system that ruined the Roman empire was revived there, a *gobernadillo* being appointed for each district and held personally responsible for the taxes. If the receipts fell below the estimate he had to make up the deficiency; if they exceeded it he pocketed the surplus—the result being that the last peseta was relentlessly wrung from the luckless inhabitants. There were poll taxes, taxes on every form of property, taxes on all mercantile transactions, taxes on every kind of amusement. There were taxes on marriages and taxes on funerals. In some provinces the native must carry his tax receipts with him; if found without them he is liable to arrest and punishment. For non-payment—after confiscation of property—were whipping and imprisonment. For failure to pay taxes men and women alike are subjected to such brutalities as the collector can devise, and from his judgments there is no appeal.

The Philippine islands are under the supreme charge of a governor-general, who resides in Manila, a town of considerably more than 300,000 inhabitants, among them a goodly number of British men of business, whose well-appointed club is the center of foreign and social intercourse. In Madrid the interests of the colony are specially intrusted to a council of state for the Philippines, which acts as an advisory body to the minister of the colonies. There is also a council of state in Manila, which has a voice in questions affecting the material progress of the islands, which are divided into provinces, each under its governor. The provinces are subdivided into districts, and these again into communes or parishes. The *gobernadillo* (little governor) stands on the lowest rung of the official ladder, being the elected head of a commune, and wearing as the symbol of office a stiff, mushroom-shaped hat, resplendent with solid ornaments of silver bullion. In these communes or parishes the cure (priest), especially if he be a Spaniard, as is generally the case in the more important parishes, exercises supreme power. He is the father and counselor of his people, and helps them not only with spiritual advice but also furthers their material interests. Many of these Spanish curas have done much good work in the way of making roads and bridges and the building of churches, acting frequently as their own engineers and architects, with far less unsightly results than one might expect from persons who are supposed to be more conversant with breviary and rosary than with rule and compasses.

The Spanish priests, friars of strict orders, come to the islands for aye and good, and, with scarcely any exception, do their duties faithfully and devotedly. Priests of native extraction do not quite come up to the high standard of their Spanish confratres. They cannot all live up to the severity of monastic rules. These native curas, moreover, suffer under the proverbial disadvantage which affects the prophet in his own country, and, lacking the strength of mind and tenacity of vow of the Spanish priests, sometimes seek consolation in diversions of not quite a clerical or monastic character.

The climate of the Philippines is not

such as will repel either Americans or Europeans. Upon this subject Col. W. Winthrop of the United States army says: "There are two seasons at Manila, the wet and the dry, or the seasons of the southwest and northeast monsoons. Broadly speaking, the wet or rainy season, ushered in by the southwest monsoon, is from June to November; the dry season, when the northeast monsoon prevails, is from November to June. The divisions are not, however, exact or invariable. Thus, in January and February north winds are not infrequent, and in March and April winds from the southeast sometimes prevail. In the beginning of October the winds vary between southeast and southwest, settling down to northeast by the close of the month. In the wet seasons the country is inundated, the roads become impassable and bridges disappear. The annual rainfall at Manila is variously reported as from seventy-five to ninety-one inches.

"The hottest months are April and May; the droughts are then long and accidental fires are to be guarded against; it is then that mosquitoes and white ants are most troublesome. The coolest months are December to February, when the freshness is grateful at night. The average temperature for the year is about 80 degrees. The periods of the changes of the monsoons in May to June and in September to October are marked by the heaviest blows and thunderstorms. Cyclones, typhoons and hurricanes then visit the coast. A typhoon on Sept. 27, 1865, drove some twenty vessels ashore and did great damage to the city of Manila. A typhoon or hurricane Oct. 30, 1876, killed 250 persons and destroyed 3,800 houses. The hurricanes of these times often sweep away crops and destroy plantations."

Almost everywhere in the islands are to be seen evidences of gigantic volcanic forces, although the number of active volcanoes is small. The volcanoes, active and extinct, are grouped in two lines, running, approximately, east and west. Earthquakes are not infrequent and the buildings are designed to resist them. The more violent seismic disturbances appear to be confined to certain centers, among which the neighborhood of Manila seems to be prominent. In a general sense the direction of the chains of mountains is north and south, with occasional deflections to east and west. The highest mountain in the group is Apo, in Mindanao, with over 9,000 feet, while Halcón, in Mindoro, reaches nearly 8,900 feet, and Majón, in Luzon, exceeds 8,200 feet. Of the earthquakes Sir John Bowring, an English traveler, says: "The destructive ravages and changes produced by them are nowhere more remarkable than in the Philippines. They have produced great changes in the geography of the islands. They have overturned mountains, filled up valleys, desolated extensive plains and opened passages from the sea into the interior and from the lakes into the sea." He refers to several of the most serious earthquakes that have been known at the islands, and to those of 1796, 1824 and 1828 as especially "calamitous." The most destructive earthquake of recent times was that of June, 1863, which rendered the city of Manila a mass of ruins, in which 400 persons were buried, 2,000 were injured and property valued at \$3,000,000 was destroyed.

The soil of the Philippines is of phenomenal fertility, although its capacities have been most imperfectly developed. It is difficult to say what product is a staple, although the Manila hemp is, perhaps, best known in the commerce of the islands. This is not a product of the hemp plant, but is the fiber of a species of the banana (*musa* textile). Where the soil is only slightly cultivated the products are: Sugar, hemp, tobacco, rice, coffee, cacao, gums of various kinds, arrowroot, indigo, cotton, pepper, cochineal, betelroot, areca nut, coconuts and coconut oil. In the forests grow the ebony, bamboo, logwood, rattans and numberless other valuable hard woods and gum-yielding trees and plants. The Hon. John Barrett, late United States minister to Siam, who is thoroughly acquainted with the resources of the Philippines, says that "a richer isolated land or group of islands, viewed comparatively as to area and population, variety of agriculture, mineral and forest resources undeveloped, in addition to those already improved, cannot be pointed out on the map of the world."

That the Philippines are fabulously rich in deposits of gold is not to be questioned. Books are extant that mention gold as the chief product of Luzon in the third century A. D., and there is no doubt that mining of the precious metal was extensively practiced in the islands long before the advent of the Spaniards. In a pamphlet written the present year by Mr. Frank Karuth, F. R. G. S., entitled "A New Center of Gold Production," the author says: "The question is often asked, 'How is it that so little is known of Philippine gold?' The answer is simple. There is no official control of the output or tax on it. The miners live in isolated districts and villages, with rare communication between them. And the universal man of business is the omnipresent Chinaman, now storekeeper, with a fixed abode, now perambulating peddler, who penetrates the most distant settlements, buys the gold with his wares and sends it out of the country, over to Hongkong or Amoy, or elsewhere. It is not his business to swagger over the volume of his trade; in fact, he keeps it dark. Those who know are aware that the gold export is considerable and very much exceeds the official computation, whatever that may be. 'Paracale' gold is well known in Manila, but few Manila know where Paracale is, and still less have ever visited the place. Yet it is a prosperous village, with a good deal of trade and a large native mining population. . . . The Paracale gold dust is melted into tiny ingots, a small bivalve serving as a mold, so that the gold shows the shape of the shell. These tiny ingots are tested by the Chinese purchaser the traces of whose probing auger are always in evidence on the ingots. Gold is found in many other islands of the group. Senor Abella found traces of alluvial workings in Cebu. Mindoro, which is but little known, is said to be rich in gold. Pananon, a small island north of Mindanao, has at least one well-defined vein of auriferous quartz, while Mindanao itself is the center of a considerable trade in alluvial gold. From specimens brought from that island the occurrence of rich quartz veins cannot be a matter of mere conjecture."

Copper is found in many parts of the Philippines, and cupreous pyrites is not

infrequently met with accompanying quartz veins, but in such small quantities as to exclude all commercial value. In the central mountain ranges of Luzon, however, between Cagayan and Ilocos, considerable deposits of copper ore are distributed and had been worked by a tribe of natives, called Igorrotes, long before the advent of the Spaniards. They obtain the ore in excavations which they make with the aid of wood fires, thus softening the rocks. They separate the ore according to quality and roast the poorer repeatedly before smelting it. Their furnace is a cylindrical hole, walled with clay, about twelve inches deep and eight inches in diameter, and they use blowers of bamboo worked with plungers to produce the requisite draft.

The coal which up to present times has been found in the Philippine islands is not true coal, but lignite, probably of the tertiary period, and of a variety which can scarcely be distinguished by the eye from true coal. There is no reason why true coal should not eventually be found, for it is found and worked in Japan, whose geological formation has much in common with that of the Philippines. There has been no systematic search made in these islands for coal, and wherever it has been found it has betrayed its presence by outcrops. Thus, in the island of Masbate, a local steamship owner drew his supplies from a bed of coal which is so tilted as to have the appearance of a vein. He supplied himself as long as his native laborers could get the coal with crowbars. An expert, who examined this bed cursorily, estimated the available quantity of coal at about 600,000 tons in that particular concession. He is, however, of opinion that very much larger quantities are available in adjoining concessions. These mines are practically untouched, and as they are situated within a few miles of the coast they can be worked at a profit by whosoever should venture to introduce the necessary capital.

The only coal deposits which have been to a certain extent developed in the Philippine archipelago, and of which a scientific and reliable record exists in the shape of a report by the chief inspector of mines, Senor Enrique Abella y Casariego, are those in the island of Cebu. This report is embodied in a work entitled "Rapida Descripcion Fisica, Geologica y Minera de la Isla de Cebu (Archipelago Filipino)."

The coal deposits of Cebu were first examined in 1855 by the government mining engineer, Senor Hernandez, who, without hesitation, described the coal as "lignite" (lignite). A few years later, however, another government engineer, Senor Centeno, declared the formation in which coal occurs to belong to the true carboniferous system, and proclaimed the discovery of a true coal field of large dimensions, the eastern rim of which cropped out in the island of Cebu, while its western rim came to the surface in the island of Negros. Analysis proved Senor Centeno to be in the wrong, for the contents—or carbon—of the coal of Cebu do not exceed 54 per cent, against the minimum of 75 per cent, which true coal contains.

The situation of affairs at the Philippines at the present time makes it necessary to take some notice of the rebellion that broke out against the Spanish rule in August,

1898. In 1872 there was an uprising of the people, the exciting cause of which was the oppressive taxes, excises, license fees and other burdens imposed upon the people by the government. Not only did the natives complain of these extortions, but objected to the corvee, or forced exactions of forty days' labor, which every man was compelled to furnish annually to the government. In addition to these complaints the natives were still further exasperated by the usurious loans to which they were obliged to submit. In case they had to raise money, and by the confiscation of their property in case these loans were not paid at maturity. This power of confiscation was lodged in the hands of certain officials, who used it for the purpose of making still greater exactions. To resist these aggressions a secret revolutionary society was formed, the membership of which in August, 1898, was more than 50,000. The basis of this league was freemasonry, which had been introduced into the islands by the Spanish many years before. The army of the rebels was increased by deserters from the native troops in the Spanish forces, by vagabonds, criminals and a large number of people who had lost all their property through confiscation upon various pretexts. The war that was waged between the Spaniards and the rebels was exceedingly bitter, neither side giving any quarter to the other. It was not war, but savage butchery, in which prisoners captured or who surrendered were smothered in dungeons, burned alive, disemboweled and put to death in other barbarous ways without regard to the usages of civilized warfare. The revolutionary forces were too strong and too well officered and armed for the Spanish army to subdue, and in December, 1897, Gen. Primo de Rivera proposed to Gen. Emilio Aguinaldo y Femi, the supreme head of the revolutionary movement, a cessation of hostilities between the insurgents and the Spanish forces. A council of the revolutionary government was held Dec. 14, 1897, in which twenty-four insurgent chiefs agreed to lay down their arms on condition that certain reforms were introduced by Spain in the administration of affairs. The insurgents demanded (1) that the Philippines should have representation in the Spanish national parliament, (2) reforms in the land and tax systems of the islands, (3) curtailment of the civil powers of the friars and (4) the recall of many of the Spanish officials in the islands with a view to a more honest, economical and efficient government. Gen. Primo de Rivera agreed to these reforms in substance and made its condition that the principal rebel leaders must leave the country during his majesty's pleasure. As these leaders had lost all of their property or had it confiscated and plundered, the government agreed to provide them with funds to live in a becoming manner on foreign soil.

The rebels laid down their arms and peace was apparently secured. But no sooner had they done so and returned to their houses or retired from the country than the intransigent religious orders commenced at once to again prosecute them and trump up imaginary charges to procure their rearrest. The Spanish government, on its side, imagining itself secure, desisted from carrying out the promised reforms, thinking another trick like that played on the Cubans, after the peace arrangement by Martinez Campos, might succeed. The Filipinos, however, refused to be made dupes and took up

arms again, not alone in the immediate districts around Manila, but throughout the archipelago, and early in March, 1898, the revolt was as formidable in the province of Manila as ever, the rebels having captured several important towns connected by rail with the capital, while the inhabitants refused to pay their taxes or acknowledge Spanish authority. Such was the condition of affairs in the Philippines at the date of the opening of the war between the United States and Spain.

#### COMMERCE WITH THE PHILIPPINES.

The following table shows the commerce of the islands, the years named being the latest attainable:

| Countries.                     | Imports from Philippines. | Exports to Philippines. |
|--------------------------------|---------------------------|-------------------------|
| Great Britain, 1897.....       | \$6,223,426               | \$2,063,598             |
| France, 1896.....              | 1,990,297                 | 359,796                 |
| Germany, 1896.....             | 223,730                   | 774,923                 |
| Belgium, 1896.....             | 272,240                   | 45,660                  |
| Spain, 1895.....               | 4,819,344                 | 4,973,589               |
| Japan, 1897.....               | 1,332,300                 | 92,823                  |
| China, 1897.....               | 56,137                    | 97,717                  |
| India, 1896.....               | 7,755                     | 80,156                  |
| Straits Settlements, 1896..... | 274,130                   | 236,001                 |
| New South Wales, 1897.....     | 119,550                   | 176,858                 |
| Victoria, 1896.....            | 180                       | 178,370                 |
| United States, 1897.....       | 4,383,740                 | 94,597                  |

Total..... 19,702,819 9,174,093

The average value of the trade of the Philippines is greater than indicated in the above table, having suffered in the last few years on account of political conditions. This is shown by the fact that in 1893 the imports of Great Britain from the islands were to the value of \$10,407,000, and the exports nearly \$1,500,000 more than the shipments in 1897. France imports three times as much as she did in 1893, but her exports have diminished in an even larger proportion, from over \$2,000,000 to \$350,000. China imports more than twice as much, but exports considerably less than in 1893. India imports less, but her exports have risen from \$57,000 to \$80,000. The Straits Settlements have lost over \$100,000 in imports and some \$140,000 in exports. The trade with New South Wales has grown, but that with Victoria has greatly diminished, and United States commerce, which was \$9,314,235 in 1893, has fallen to \$4,473,337 in 1897.

The following statements show the principal articles of import and export:

| COUNTRY.           | Hemp.       | Tobacco.  | Cocconuts and copra. | Sugar.      |
|--------------------|-------------|-----------|----------------------|-------------|
| Great Britain      | \$3,604,314 | \$716,767 | \$222,404            | \$1,512,708 |
| France.....        | 78,754      | 88,451    | 1,797,198            | .....       |
| Germany.....       | 166,800     | 81,654    | .....                | .....       |
| Japan.....         | 100,938     | 64,477    | .....                | 1,156,411   |
| India.....         | 4,966       | 3,058     | .....                | .....       |
| Spain.....         | .....       | 2,538,150 | .....                | 413,794     |
| United States..... | 2,701,651   | .....     | .....                | 1,190,202   |
| Total.....         | 6,745,177   | 3,435,562 | 2,009,602            | 4,282,110   |

It must not be inferred from the absence of statistics in regard to some of the above articles that there are no imports into the countries mentioned. They are either covered in the general heading, "All other imports," or are classified in some other way.

## PRINCIPAL EXPORTS TO PHILIPPINES.

| COUNTRY.           | Cotton<br>manfg. | Silk<br>and<br>woolen. | Apparel. | Machin-<br>ery and<br>metals. | Coal.    | Provi-<br>sions. |
|--------------------|------------------|------------------------|----------|-------------------------------|----------|------------------|
| Great Britain..... | \$1,268,087      | \$30,148               | \$6,274  | \$337,043                     | \$16,866 | \$79,455         |
| France.....        | 143,223          | 81,213                 | 3,912    | 15,388                        |          |                  |
| Germany.....       | 111,028          | 88,060                 | 90,246   | 175,413                       |          | 31,651           |
| Japan.....         | 120              | 4,418                  | 157      | 648                           | 40,906   | 7,429            |
| United States..... | 2,164            |                        |          |                               |          |                  |
| Total.....         | 1,524,622        | 206,839                | 100,486  | 528,485                       | 57,863   | 118,536          |

The figures covering Spain's trade with the Philippines are taken from "Spain's Foreign Trade," by Frank H. Hitchcock, department of agriculture, 1898.

Details of the trade by articles are not given, except in certain imports from the Philippines:

| Year.     | Imports from<br>Philippines. | Exports to<br>Philippines. | Year.     | Tobacco.    | Sugar.    | Coffee.   |
|-----------|------------------------------|----------------------------|-----------|-------------|-----------|-----------|
| 1891..... | \$4,842,009                  | \$2,712,515                | 1891..... | \$2,606,987 | \$216,909 | \$360,481 |
| 1892..... | 4,450,492                    | 2,655,398                  | 1892..... | 2,511,303   | 301,838   | 440,896   |
| 1893..... | 4,013,643                    | 4,378,530                  | 1893..... | 2,632,816   | 272,953   | 158,832   |

## THE MARIANA OR LADRONE ISLANDS.

The Mariana archipelago is a chain of islands in the Pacific stretching north and south a winding distance of about 600 miles and embraces some seventeen islands, having an area of about 500 square miles. They were the first group discovered by Magellan in 1521, while making his voyage around the globe, about ten days after he had reached the island of Cebu, one of the Philippines. Some years later, when the Spaniards had assumed sovereignty over the Philippines, they established a regular service for their vessels across the Pacific to the island of Guam, one of the Mariana group, which became a regular station for vessels sailing between Manila and the Mexican coast.

The native inhabitants of the Marianas soon disappeared under the dominion of Spain and the group was repopulated by immigrants from the Philippines, who brought with them a new language, plants and customs.

The name of "Ladrones" was given to the islands by Magellan because, it is said, of the character of their inhabitants, the word meaning "robbers," but history declares such a designation to have been entirely unjust to the aborigines of the group. Later they were renamed Mariana in honor of Mariana of Austria, the wife of Philip IV., king of Spain. A distance of about 1,200 miles separates the most southwesterly island of the Mariana group from the nearest of the Philippines and the entire intervening distance is wholly free from reefs or other obstructions to navigation, except a few rocks on the northern extremity toward Japan and the Pelew islands on the south. Geologically the group has no connection with the Philippines, but belongs to the same formation as the Aleutian islands that project west from the coast of Alaska.

The principal island of the group is Guam or Guahn, which comprises nearly one-half of the entire area of the archipelago. From a commercial point of view the Mariana group of islands is of little value, as the trade is wholly insignificant. The products are such only as are required by the inhabitants of the tropics, and even these are not sufficiently abundant to induce trade and commerce. The natives grow sugar cane, rice, corn and melons. Cocoanuts, pineapples, bananas, limes, lemons, oranges and the breadfruit grow wild in greatest profusion. It rains nearly all the time—half a dozen squalls of from ten to thirty minutes every day—but no one minds that. It keeps the temperature down and makes everything grow. It is a fine coffee country, but there is almost no attention paid to the industry. The principal product is copra. When the islands were discovered they were found to have a considerable population, which resembled the Malays of the Philippines in language but in no other particular. In physical appearance they resembled the Indonesian and Papuan race and were divided into two classes, one composing the nobility and the other the common people, between which marriage, by their own laws and customs, was not permitted. As soon as the Spaniards acquired possession of the islands all the inhabitants were reduced to a common state of servitude. This was not brought about without a long and serious struggle, for the natives held out valiantly against their oppressors and resistance did not cease until 60,000, or more than one-half of the native population had fallen in the conflict or had escaped to the Caroline islands, while more than one-third of the 180 villages had been destroyed. In 1760 the population of the group had been reduced to 1,600 inhabitants, and to supply the deficiency occasioned by the long struggle Tagul colonists were brought from the Philippines, but these compulsory immigrants perished from epidemics and the severity of the demands made upon them by the new masters of the islands. In 1876 the native population had become reduced to about 600 souls.

The entire population of the group is concentrated on the island of Guam, except a few colonies of fishermen. The island of Tinian has only a single village and a community of lepers, while Reta and Sayan have only a few hundred inhabitants each. Not only have the people fallen off in numbers but in capacity as well. While they have learned all the vices of the few Spaniards and Malays who have supplanted the larger portion of the aborigines, they have forgotten the virtues and the industries that their forefathers practiced. Agriculture has been

practically abandoned, modern pottery has taken the place of that made by the natives, imported cloths have destroyed the manufacture of the coarser domestic fabrics, houses that the natives used to build and inhabit have disappeared and the rudest huts have taken their places, and many of the arts practiced by the people have been wholly lost under the blighting rule of the Spaniards.

The government of the archipelago has, of necessity, been military in its character, the garrison at the capital, Agaña, on the island of Guam, being composed of some sixty Spanish and 300 native recruits drawn from the population by conscription, under a captain-general appointed by the Spanish cabinet. The garrison has been usually supported by a small and inefficient gunboat, which has been necessary to restrain the people as well as the native troops.

The importance of the Mariana archipelago to the United States depends entirely upon the part it is to play in the peace conference at Paris. When Capt. Glass, in command of the Charleston, left Honolulu he was given sealed orders which were not to be opened until he was out of sight of land. He was destined to Manila to reinforce Admiral Dewey and convey a fleet carrying troops to Gen. Merritt. These orders directed him to stop at Guam, capture the governor and all the Spanish officials and soldiers and destroy the fortifications at Agaña, the capital, or in the bay of San Luis d'Apra, upon which the town is situated. Early on the morning of June 20 land was sighted, the Charleston cleared for action and sailed into the bay. Entering the harbor, Capt. Glass directed his course to Fort Santa Cruz, upon which he opened fire at a range of 3,000 yards with his three-pounders. Thirteen shells were fired without eliciting any response. At length Lieut. García Gutierrez of the Spanish navy and Dr. Romero of the army rowed out to the vessel to see if the men on the Charleston were in good health and to give the promise to Capt. Glass that they would return his salute just as soon as they could borrow some powder for the two old guns that were in the fort. The following account of the surrender is by Oscar Kings Davis and was published in Harper's Weekly, the official report of Capt. Glass not having been made public:

Gutierrez and Romero were thunderstruck at being informed of the real situation, and when told that Manila was in Dewey's hands, practically, the Spanish fleet destroyed, and that they were prisoners of war, they were most unhappy. Francis Portusac, a native of Guam and an Agaña merchant, who was naturalized in Chicago in 1888, was with the officials to act as interpreter, but Capt. Glass used him more as a bureau of information about the island. Finally the captain paroled the Spaniards for the day and sent them away in their boats with a verbal message to the governor, Lieut.-Col. Don Jose Marina y Vega, to hurry up and pay his official call. That evening Gov. Marina sent Capt. Glass a message to the effect that the military regulations of Spain forbade him to set foot on a foreign vessel, but he would be pleased to see the captain at his office in the morning. Capt. Glass replied that he would see the governor himself, or send an officer to represent him.

The next morning Lieut. William Braun-

ersreuther, the navigator of the Charleston, with Ensign Waldo Evans and five men, went ashore. Lieut. Braunersreuther carried a formal note to the governor from Capt. Glass, which gave him thirty minutes in which to surrender unconditionally. The guns of the Charleston were ready to enforce the demands. Lieut. Braunersreuther met the governor at the landing place at the native village of Pitti. With the governor were Capt. Duarte of the Spanish army, his secretary, the port captain, Lieut. Gutierrez and Dr. Romero. In presenting the note from Capt. Glass Lieut. Braunersreuther said, in Spanish:

"I have the honor to present a communication from my commandant. I am authorized to wait one-half hour for your reply. In presenting this communication I call your attention to the fact that we have, as you see, three large ships in the harbor, and a fourth [the Sydney had remained outside] outside ready to come in. One of these ships is a modern war vessel of high power, with large guns. The others are transports full of soldiers. We have a large force here. I call your attention to these facts in order that you may not make any hasty or ill-considered reply to the note of my commandant."

Gov. Marina bowed and thanked Lieut. Braunersreuther, took the note and retired with his staff into his office. From its window, if he chanced to look out, he could see the steam launch of the Charleston towing a string of boats full of men up toward the landing place. In the boats were Lieut. Myers, U. S. M. C., of the Charleston, with forty marines from the ship, and part of company A, 2d Oregon, Capt. H. L. Heath, from the Australia. This was the first detachment of the landing force Gen. Anderson and Capt. Glass had agreed on the night before. The rest of company A and company D, Capt. A. T. Prescott, were waiting on the Australia for the launch to return and tow them to land. To their intense disgust, not a man of them set foot on land. The first detachment tied up to the Japanese brigantine while the launch went back for the rest, and before it came back the work had all been done.

For twenty-nine minutes Lieut. Braunersreuther waited, watch in hand, for the reply. Then Gov. Marina came out of his office with a sealed letter addressed to Capt. Glass. "It is for your commandant," he said, as Lieut. Braunersreuther broke it open. "I represent my commandant here," was the reply. Gov. Marina had written: "Sir: In the absence of any notification from my government concerning the relations of war between the United States and Spain, and without any means of defense, or the possibility of defense in the face of such a large opposing force, I feel compelled, in the interests of humanity and to save life, to make a complete surrender of all under my jurisdiction. Trusting to your mercy and justice, I have the honor to be," etc., etc.

So Guam was surrendered, with all the Mariana Islands. The unhappy governor had no notice that the force which had threatened him was intended really for Manila, and thought that it had been sent out solely against the Mariana group. He had but fifty-four Spanish regulars and a company of Chamorros, and was, as he said, quite without means of making a defense. Lieut.

Braunersreuther required him to write an order to Lieut. Ramon, in command of the troops at Agaña, to have them on the pier at Piti, with all arms, accoutrements and ammunition and the four Spanish flags in the island, at 4 o'clock that afternoon. That done, the governor wrote a long farewell to his wife, telling her to send his clothing and personal effects to Piti at once.

Soon after the arrival of the prisoners on the Charleston Capt. Glass took a large United States flag and went in his barge to Fort Santa Cruz, where he hoisted the stars

and stripes on the old Spanish staff. As the first broad red stripe rose over the ruined battlements, the six-inch rifles of the Charleston roared out the national salute. Formal possession had been taken of Guam. At the same time the bands on the Australia and Peking played the "Star-Spangled Banner," and the soldiers and sailors on the troopships and cruiser gave three times three for Uncle Sam's new island.

The captures consisted of 108 Mauser and Remington rifles and 15,000 rounds of ammunition.

## POPULAR VOTE

For presidential candidates from 1824 to and including 1896. Prior to 1824 electors were chosen by the legislatures of the different states.

1824—J. Q. Adams had 105,321 to 155,872 for Jackson, 44,252 for Crawford and 46,587 for Clay. Jackson over Adams, 50,551. Adams less than combined vote of others, 140,869. Of the whole vote Adams had 29.32 per cent, Jackson 44.27, Clay 13.23, Crawford 13.23. Adams elected by house of representatives.

1828—Jackson had 647,231 to 609,097 for J. Q. Adams. Jackson's majority, 138,134. Of the whole vote Jackson had 55.97 per cent, Adams 44.03.

1832—Jackson had 687,502 to 530,189 for Clay and 33,108 for Floyd and Wirt combined. Jackson's majority, 124,205. Of the whole vote Jackson had 54.96 per cent, Clay 42.39 and the others combined 2.65.

1836—Van Buren had 761,549 to 736,656, the combined vote for Harrison, White, Webster and Mangum. Van Buren's majority, 24,893. Of the whole vote Van Buren had 50.83 per cent and the others combined 49.17.

1840—Harrison had 1,275,017 to 1,128,703 for Van Buren and 7,069 for Birney. Harrison's majority, 138,256. Of the whole vote Harrison had 52.89 per cent, Van Buren 46.82 and Birney .29.

1844—Polk had 1,357,343 to 1,299,068 for Clay and 63,309 for Birney. Polk over Clay, 38,175. Polk less than others combined, 24,125. Of the whole vote Polk had 49.56 per cent, Clay 48.14 and Birney 2.21.

1848—Taylor had 1,360,101 to 1,220,544 for Cass and 291,263 for Van Buren. Taylor over Cass, 139,577. Taylor less than others combined, 151,706. Of the whole vote Taylor had 47.36 per cent, Cass 42.50 and Van Buren 10.14.

1852—Pierce had 1,601,474 to 1,386,678 for Scott and 156,149 for Hale. Pierce over all, 58,747. Of the whole vote Pierce had 50.90 per cent, Scott 44.10 and Hale 4.97.

1856—Buchanan had 1,838,169 to 1,341,264 for Fremont and 874,534 for Fillmore. Buchanan over Fremont, 496,905. Buchanan less than combined vote of others, 377,629. Of the whole vote Buchanan had 45.34 per cent, Fremont 33.09 and Fillmore 21.57.

1860—Lincoln had 1,866,352 to 1,375,157 for Douglas, 845,763 for Breckinridge and 589,531 for Bell. Lincoln over Breckinridge, 491,195. Lincoln less than Douglas and Breckinridge combined, 354,568. Lincoln less than combined vote of all others, 244,142. Of the whole vote Lincoln had 39.91 per cent, Douglas 29.40, Breckinridge 18.08 and Bell 12.61.

1864—Lincoln had 2,216,067 to 1,808,725 for McClellan (eleven states not voting, viz.: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas and Virginia). Lincoln's majority, 408,342. Of the whole vote Lincoln had 55.06 per cent and McClellan 44.94.

1868—Grant had 3,015,071 to 2,709,613 for Seymour (three states not voting, viz.: Mississippi, Texas and Virginia). Grant's majority, 306,458. Of the whole vote Grant had 52.67 per cent and Seymour 47.33.

1872—Grant had 3,597,070 to 2,834,079 for Greeley, 29,408 for O'Connor and 5,808 for Black. Grant's majority, 729,976. Of the whole vote Grant had 55.63 per cent, Greeley 43.83, O'Connor .15, Black .09.

1876—Hayes had 4,033,960 to 4,284,885 for Tilden, 81,740 for Cooper, 9,522 for Smith and 2,636 scattering. Tilden's majority over Hayes, 250,935. Tilden's majority of the entire vote cast, 157,037. Hayes less than the combined vote of others, 344,833. Of the whole vote cast Hayes had 47.95 per cent, Tilden 50.94, Cooper .97, Smith .11 scattering .3.

1880—Garfield had 4,449,053 to 4,442,035 for Hancock, 307,300 for Weaver and 12,576 scattering. Garfield over Hancock, 7,018. Garfield less than the combined vote for others, 313,864. Of the popular vote Garfield had 48.26 per cent, Hancock 48.25, Weaver 2.33, scattering .13.

1884—Cleveland had 4,874,986 to 4,851,981 for Blaine, 150,369 for St. John, 173,370 for Butler. Cleveland had over Blaine 23,008. Cleveland had 48.48 per cent, Blaine 48.22, St. John 1.49, Butler 1.74.

1888—Harrison had 5,441,902 to 5,638,560 for Cleveland, 249,937 for Fisk, 147,521 for Streeter, 3,073 for Cowdrey, 1,591 for Curtis and 9,845 scattering. Harrison had 96,658 less than Cleveland. Of the whole vote Harrison had 47.83 per cent, Cleveland 48.63, Fisk 2.21 and Streeter 1.30.

1892—Cleveland had 5,558,562 to 5,162,874 for Harrison, 384,068 for Bidwell, 1,065,421 for Weaver and 22,613 for Wing. Of the whole vote Cleveland had 48.73 per cent, Harrison 42.49, Bidwell 2.17 and Weaver 8.67.

1896—McKinley had 7,507,822; Bryan, 6,511,072; Levering, 120,683; Bentley, 13,950; Matchett, 33,545; Palmer, 133,800. Of the whole vote McKinley had 50.49 per cent and Bryan had 46.26.

Of the presidents, Adams, federalist; Polk, Buchanan and Cleveland, democrats; Taylor, whig; Lincoln, Hayes, Garfield and Harrison, republicans, did not, when elected, receive a majority of the popular vote. The highest percentage of popular vote received by any president was 55.97 for Jackson, democrat, in 1828, and the lowest 39.91 for Lincoln, republican, in 1860; Buchanan, democrat, next lowest, with 45.34. Hayes and Harrison, with the exception of John Quincy Adams, who was chosen by the house of representatives, were the only presidents ever elected who did not have a majority over their principal competitors, and Tilden and Cleveland the only defeated candidates who had a majority over the president-elect.

## THE HAWAIIAN ISLANDS.

The republic of Hawaii, the union of which to the United States was completed on the 12th of August, 1898, consists of eight islands in the Pacific ocean, between longitude 154.40 and 160.30 west from Greenwich and latitude 22.16 and 18.55 north. They were discovered by Capt. Cook in 1778, and on Hawaii he was killed by the natives Feb. 14, 1779. They are located on the edge of the tropics, but their position in mid-ocean and the prevalence of the northeast trade winds gives them a climate of perpetual summer without enervating heat. The group occupies a central position in the North Pacific, 2,089 nautical miles southwest of San Francisco, 4,840 from Panama, 3,800 from Auckland (New Zealand), 4,960 from Hongkong, 3,440 from Yokohama and 4,350 from Manila. It will thus be seen that Hawaii lies about one-third of the distance on the accustomed routes from San Francisco to Japan and Chinese ports, from San Francisco to Australia, from the Pacific ports of British Columbia to Australia and British India and about half way from the Isthmus of Panama to Yokohama and Hongkong. A government publication has the following to say as to the importance of Hawaii as a naval station: "From a naval standpoint Hawaii is the great strategic base of the Pacific. Under the present conditions of naval warfare, created by the use of steam as a motive power, Hawaii would secure to the maritime nation possessing it an immense advantage as a depot for the supply of coal. Modern battleships, depending absolutely upon coal, would be enabled to avail themselves of their full capacity of speed and energy only by having some halfway station in the Pacific where they could replenish their stores of fuel and rest. A battleship or cruiser starting from an Asiatic or Australian port, with the view of operating along the coast of either North America or South America, would be unable to act effectively for any length of time at the end of so long a voyage unless she were able to refill her bunkers at some point on the way. On the other hand, the United States, possessing Hawaii, will be able to advance its line of defense 2,000 miles from the Pacific coast, and, with a fortified harbor and a strong fleet at Honolulu, will be in a position to conduct either defensive or offensive operations in the North Pacific to greater advantage than any other power."

There are eight principal islands in the group, the others being mere rocks of no present value. They are named, beginning from the northwest:

|                 | Area in<br>sq. miles. |
|-----------------|-----------------------|
| Niihau .....    | 97                    |
| Kauai .....     | 590                   |
| Oahu .....      | 600                   |
| Molokai .....   | 270                   |
| Maul .....      | 760                   |
| Lanai .....     | 150                   |
| Kaboolawe ..... | 63                    |
| Hawaii .....    | 4,210                 |
| Total .....     | 6,740                 |

By comparison it will be seen that the area of the islands is only a little less than that of the state of New Jersey, while it is

more than three times that of the state of Delaware.

The islands that present the most attractions are Hawaii, Maui, Oahu and Kauai, as it is on these that coffee, fruits, potatoes, corn and vegetables of various kinds are produced in the most luxuriant profusion and where land can be obtained on reasonable terms. Hawaii is the largest of the group and presents the greatest variety of soil and climate. The island is divided into eight districts. Those on the windward side—North Kohala, Hamakua, Hilo and Puna—are well watered by plentiful rains, while on the lee side South Kohala, North Kona, South Kona and Kau are rarely without necessary water supply. The Kona district is noted for both its coffee and sugar. The coffee industry is carried on by several hundred proprietors, whose plantations embrace an acreage ample for 200,000 trees down to those who work an acre or more. A government report says of this island that there are "thousands of acres at present uncultivated and only awaiting the enterprise of the temperate zone to develop them."

Maui is one of the most productive islands in the group and produces sugar and coffee, the cultivation of which is largely confined to the eastern portion, which has been only recently devoted to those products. On this island is a large mountain, Haleakala, the western slope of which is covered with farms where the smaller grains are raised, with some swine. On this island thousands of acres are lying fallow.

No one of the group offers better advantages than Oahu. Very many acres of land in the fertile valleys are yet wholly undeveloped, the inhabitants being devoted to the cultivation of sugar on the larger islands. On this is situated the capital of the country. A line of railroad has been built extending west from Honolulu a distance of about thirty miles, and it is proposed to continue it entirely around the island. The road runs through a very rich coffee-producing region and affords good facilities for transporting the product to the capital, which is the chief port of entry in the group.

Kauai is popularly known as "the garden island" from the luxuriance of its vegetation. The chief products are sugar and rice. Little coffee is being grown, its introduction being but recently made. There are larger areas of rich unoccupied lands on the island of Kauai.

On Oahu is Honolulu, the capital of the whilom republic. It is a city of 30,000 inhabitants and is one of the most advanced capitals on the globe. It is lighted with electric lights and has an extensive telephone system and street cars. Any variety of goods that can be bought in any southern city in the world can be purchased at its stores, while the public buildings are ornate and commodious. It is abundantly supplied with churches and the best of schools, a large public library, a Young Men's Christian association hall, a Masonic temple, an Odd-Fellows' hall and all other appliances of an advanced civilization, not to mention four daily and two weekly English papers, besides others printed in the Hawaiian, Portuguese, Japanese and Chinese languages. Among the native Hawaiians the

percentage of illiteracy is very small, it having been officially declared not to be greater than it is in the state of Massachusetts.

The Hawaiian islands are of volcanic formation, and there are two active volcanoes on Hawaii—Kilauea and Mauna Loa. The altitude of Mauna Kea, the highest point on Hawaii, is 13,806 feet. The mountains on other islands range from 4,000 to 5,000 feet. The topography is broken and diversified, with many valleys and streams. The mountain sides abound in forests, containing an abundance of ship timber and many ornamental woods. Among the minerals that have been noticed are sulphur, pyrites, common salt, sal ammoniac, limonite, quartz, augite, chrysolite, garnet, labradorite, feldspar, gypsum, soda, alum, copperas, glauber salts, niter and calcite.

"In the Hawaiian islands," says a pamphlet of the Hawaiian government, "Americans and Europeans can and do work in the open air at all seasons of the year, as they cannot in countries lying in the same latitude elsewhere. To note an instance: Calcutta lies a little to the north of the latitude of Kaula, our most northerly island and in Calcutta the American and European can only work with his brain; hard physical labor he cannot do and live. On the Hawaiian islands he can work and thrive."

The rainfall varies, being greater on the windward side of the islands, and increasing up to a certain elevation. Thus, at Olan, on the island of Hawaii, windward side and elevation of about 2,000 feet, the rainfall from July 1, 1894, to June 30, 1895, was 176.82 inches, while at Kailua, on the leeward side, at a low level, it was only 61.31 inches during the same period.

The temperature also varies according to elevation and position. On the island of Hawaii one can get any climate from the heat of summer to actual winter at the summits of the two great mountains. A meteorological record, kept carefully for a period of twelve years, gives 89 degrees as the highest and 54 degrees as the lowest temperature recorded, or a mean temperature of 71.5 degrees for the year. A case of sunstroke has never been known. People take no special precautions against the sun, wearing straw and soft felt hats similar to those worn in the United States during the summer months.

The prevailing winds are the northeast trades. These blow for about nine months of the year. The remainder of the period the winds are variable and chiefly from the south. The islands are outside the cyclone belt, and severe storms accompanied by thunder and lightning are of rare occurrence.

The islands possess a healthful climate. There are no virulent fevers such as are encountered on the coast of Africa or in the West India islands. Epidemics seldom visit the islands, and when they do they are generally light. A careful system of quarantine guards them now from epidemics from abroad.

The pamphlet entitled "The Republic of Hawaii," issued by the department of foreign affairs of the islands in 1896, gives a full account of the agricultural resources of the country, with interesting details as to the coffee industry, from which the following matter is extracted: The mainstay of the islands, it says, has for the last thirty-five years been the sugar industry. From this source a large amount of wealth has

been accumulated. But the sugar industry requires large capital for expensive machinery and has never proved remunerative to small investors. An attempt has been made at profit-sharing, and has met with some success, the small farmer cultivating and the capitalist grinding at a central mill. Of late years, moreover, the small farmer has been steadily developing in the Hawaiian islands, and attention has been given to other products than sugar.

Rice neither Europeans nor Americans can cultivate as laborers. It requires working in marshy land, and, though on the islands it yields two crops a year, none but the Chinaman can raise it successfully. A dry-land or mountain rice has been introduced.

The main staple, after sugar and rice, is coffee. Of this, hundreds of thousands of trees have been planted out within the last five years. This is essentially the crop of the future, and bids fair to become as important a staple as sugar. Coffee does not require the amount of capital that sugar does and it can be worked remuneratively upon a small area. It is estimated that at the end of the fourth year the return from a seventy-five-acre coffee plantation will much more than pay the running expenses, while from that time on a return of from \$3,000 to \$10,000 per annum may be realized.

Fruits can also be cultivated to advantage. At present the banana trade of the islands amounts to over 100,000 bunches per annum, valued at over \$100,000, and the quantity might very easily be quadrupled. The banana industry may be regarded as in its infancy. The export of the fruit is only from the island of Oahu, but there are thousands of acres on the other islands of the group which could be profitably used for this cultivation and for nothing else. The whole question of the banana industry hinges on the market. At present the market is limited.

Limes and oranges can be cultivated and the fruit can be easily packed for export; at present the production does not meet the local market. The fruits can be raised to perfection. The Hawaiian orange has a fine flavor and the Hawaiian lime is of superior quality. In the uplands of Hawaii and Maui potatoes are raised. Their quality is good. Corn is also raised. In these industries many Portuguese, Norwegians and others have embarked. Both these products find an ample local market. The corn is used largely for feed on the plantations, and ground with the cob makes an excellent feed for working cattle, horses and mules.

In the uplands where the climate is temperate, as at Waimea, Hawaii, vegetables of all kinds can be raised; excellent cauliflower, cabbages and every product of the temperate zone can be grown to perfection.

Cattle raising in so small a place as the Hawaiian islands does not present great opportunities except for local consumption. Pigs are profitable to the small farmer. In the Kula district of Maui pigs are fattened upon the corn and potatoes raised in the district. The price of pork, dressed, is 25 cents a pound in Honolulu and about 15 cents a pound in the outside districts.

The Chinese, of whom there are some 20,000 residents on the various islands, are extremely fond of pork, so that there is a large local market, which has to be supplemented by importations from California.

Attention has lately been given to fiber plants, for which there are many suitable

locations. Ramie grows luxuriantly, but the lack of proper decorticating and cleaning machinery has prevented any advance in this cultivation.

Sisal hemp and anseveira have been experimented with, but without any distinct influence upon the trade output.

The cultivation of pineapples is a growing industry. In 1896 'pines' were exported from the islands to San Francisco to the value of nearly \$9,000. This has grown up in the last half-dozen years. There is every reason to think that canning pineapples for the coast and other markets can be made profitable.

The guava, which grows wild, can also be put to profit for the manufacture of guava jelly. It has never been entered upon on a large scale, but to the thrifty farmer it would be a convenient addition to his income, just as the juice of the maple adds to the income of farmers of the eastern states. Well-made guava jelly will find a market anywhere. In England it is regarded as a

great delicacy, being imported from the West India islands. Besides the guava there are other fruits which can be put up to commercial profit, notably the poha, or cape gooseberry (*Physalis edulis*). This has been successfully made into jams and jelly, which command an extensive local sale and should find their way into larger markets.

In fact, outside the great industries of sugar, coffee and rice there is a good field for many minor industries which can be carried on with profit.

In the Hawaiian islands a simple life can be lived, and entering gradually upon the coffee industry a good competence can be obtained long before such could be realized by the agriculturist in less favored countries. However, it is useless to go to the islands without the necessary capital to develop the land that can be obtained. Between arriving and the time that the crops begin to give returns there is a period where the living must be close and cash must be paid out for the necessary improvements.

### HAWAIIAN ANNEXATION.

The record of the proceedings having for their object the annexation of Hawaii to the United States was brought down in The Daily News Almanac for 1898 to September, 1897, when the Hawaiian senate met in special session for considering the annexation treaty then pending in the senate of the United States, which will be found on page 265 of that volume. The Hawaiian senate signified its assent to the annexation of the islands to the United States, although there was a strong feeling of opposition to such action among the native royalists, who opposed a surrender of their government and territory. It will be remembered that the annexation treaty was transmitted to the United States senate in June, 1897, just before the close of the special session, and it was publicly expected that it would be acted upon early in the session of the regular congress which met in December of that year. The treaty was considered in secret session, and it became evident that although the annexation of Hawaii was supposed to be a republican measure the ratification of the treaty was opposed by some of the ablest members of that party in the senate, while it had the unqualified support of several members of the opposition. It was publicly stated that Mr. Morrill (Rep.) of Vermont and Mr. Hoar (Rep.) of Massachusetts opposed the ratification of the treaty, while Mr. Morgan (Dem.) of Alabama, recognized leader of his party, warmly advocated its adoption. Other republicans were disposed to object to the union, while some of the other democrats and all the populists favored the proposal.

On the 24th of January, 1898, Mr. Joseph O. Carter arrived in Washington from Hawaii to oppose the adoption of the treaty, which he declared would be injurious to both countries, while he affirmed that Hawaii was amply able to take care of herself. On the 26th of January President Dole of the Hawaiian republic visited Washington and was received as the chief executive of a neighboring state. He remained at the capital some two weeks, and during the time he refrained from expressing himself publicly upon the subject of annexation. The treaty was reported from the committee

on foreign relations to the senate near the middle of January, and the opposition to its ratification at once developed itself. On the 3d of February Senator White (Dem.) of California offered a resolution setting forth that the people of Hawaii had the right to maintain their own form of government and the United States ought not to interfere with such right. On the 7th Senator Morgan (Dem.) of Alabama offered an amendment to this resolution, which was as follows:

"That the republic of Hawaii, established in and based upon its present constitution, is a rightful government, and has been and still is recognized as such by the United States of America and by other great powers, without any question by any nation of its rightful and sovereign independence; and said constitution is the true and recognized authority that fixes the measure and the distribution of the rights and powers of government in that republic while said constitution remains in force.

"That in conformity with the existing constitution of the republic of Hawaii, and so long as the same is in force, the powers of government reside in and are to be exercised by the incumbents of the departments, tribunals and offices created by said constitution and filled in pursuance of law, and the lawful electors under said constitution who qualify as such by taking the oath of allegiance prescribed therein are entitled to share in the government of Hawaii according to the rights secured to them in said constitution, and to the extent and in the manner therein provided, so long as the same is in force.

"And said government of the republic of Hawaii having in due form signified its consent in the manner provided in its constitution that the Hawaiian islands, with all the territory appurtenant thereto, over which said government now claims to exercise sovereign jurisdiction, shall be annexed to and become a part of the territory of the United States of America, and shall be subject to the national power and sovereign jurisdiction thereof, it is hereby enacted and declared that said cession is accepted, ratified and confirmed, and that said Hawaiian islands are annexed as a part of the

territory of the United States of America, and are subject to the sovereign dominion thereof."

Mr. Davis (Rep.) of Minnesota, chairman of the committee on foreign relations, moved that the resolution of Mr. White and the amendment proposed by Mr. Morgan be referred to the foreign relations committee, and after a brief colloquy between Mr. White and Mr. Morgan they were so referred.

The subject was debated in both the senate and house of representatives and on the 6th of March, 1898, the foreign relations committee of the senate became satisfied that the proposed treaty could not be ratified, for the number of votes in the senate was from four to six less than the requisite number. Two courses were open to the friends of annexation to pursue—first, to amend the treaty so as to make it acceptable to those who objected to it in its present form, and, second, to drop the treaty entirely and substitute for it a joint resolution which would require only a majority vote of the two houses of congress and could be openly discussed in both bodies. It was decided to adopt the second method, and on the 16th of March, 1898, Senator Davis (Rep.) of Minnesota reported to the senate from the foreign relations committee a joint resolution drawn by Senator Morgan of Alabama, which was as follows:

"Section 1. The government of the republic of Hawaii, having in due form signified its consent, in the manner provided by its constitution to cede absolutely and without reserve to the United States of America all rights of sovereignty of whatsoever kind in and to the Hawaiian islands and their dependencies, and also to cede and transfer to the United States the absolute fee and ownership of all public, government or crown lands, public buildings or edifices, forts, harbors, military equipment and all other public property of whatever kind or description belonging to the government of the Hawaiian islands, together with every right and appurtenance thereunto appertaining; therefore be it

"Resolved, That said concession is accepted, ratified and confirmed, and that the said Hawaiian islands and their dependencies be and they are hereby annexed as a part of the territory of the United States, and are subject to the sovereign dominion thereof, and that all and singular the property and rights hereinbefore mentioned are vested in the United States of America."

The resolution then adopts the language of the treaty (see Daily News Almanac, 1898, page 266), beginning with the second paragraph of the second section, and taking all the remainder of it, but does not cite it as a part of the treaty. These provide for the disposal of the Hawaiian public lands, for the temporary government of the islands until congress decides upon a permanent form of government, the abrogation of Hawaiian treaties and the preservation of Hawaiian customs and regulations until those of the United States shall be put into operation, the assumption of the public debt of Hawaii by the United States to the extent of \$4,000,000, the regulation of Chinese immigration and the appointment by the president of five commissioners to prepare a code of laws for the government of the islands.

Section 2 provides that the commissioners provided for shall be appointed by the

president, by and with the advice and consent of the senate. The sum of \$100,000 is appropriated by the third and last section for the purpose of carrying the resolution into effect, and this sum is made immediately available.

During these discussions the war feeling in the United States had been raised to a fever heat by the destruction of the battleship Maine in the harbor of Havana and by the declaration of war against Spain on the 21st of April. On the 27th of April President Dole sent a communication to President McKinley offering to transfer the Hawaiian islands to the United States for the purposes of its war with Spain and to furnish the American ships of war in the Pacific ocean with coal, provisions and ammunition. In the opinion of high officers of both the army and navy and of many members of both houses of congress it became the duty of this government to protect Hawaii from the legitimate results of its friendship for the United States, as expressed in the offer of its chief executive, and to guard it against attacks from Spain and her allies. Some were of the belief that all this could be accomplished by having this government establish a protectorate over Hawaii, without exposing the United States to the liabilities and burdens that would have to be assumed in case of annexation. On the 4th of May Mr. Newlands (silver Rep.) from Nevada introduced into the house the following joint resolution:

"Whereas, The government of the republic of Hawaii having in due form signified its consent, in the manner provided by its constitution, to cede absolutely and without reserve to the United States of America all rights of sovereignty of whatsoever kind in and over the Hawaiian islands and their dependencies, and also to cede and transfer to the United States the absolute fee and ownership of all public, government or crown lands, public buildings or edifices, forts, harbors, military equipment and all other public property of every kind and description belonging to the government of the Hawaiian islands, together with every right and appurtenance thereunto appertaining; therefore,

"Resolved, by the senate and house of representatives of the United States of America in congress assembled, That said cession is accepted, ratified and confirmed, and that the said Hawaiian islands and their dependencies be and they are hereby annexed as a part of the territory of the United States, and are subject to the sovereign dominion thereof, and that all and singular the property and rights hereinbefore mentioned are vested in the United States of America.

"The existing laws of the United States relative to public land shall not apply to such lands in the Hawaiian islands, but the congress of the United States shall enact special laws for their management and disposition; provided, that all revenue from or proceeds of the same, except as regards such part thereof as may be used or occupied for the civil, military or naval purposes of the United States, or may be assigned for the use of the local government, shall be used solely for the benefit of the inhabitants of the Hawaiian islands for educational and other public purposes.

"Until congress shall provide for the government of such islands all the civil, judicial and military powers exercised by the officers of the existing government in said

islands shall be vested in such person or persons and shall be exercised in such manner as the president of the United States shall direct; and the president shall have power to remove said officers and fill the vacancies so occasioned.

"The existing treaties of the Hawaiian islands with foreign nations shall forthwith cease and determine, being replaced by such treaties as may exist, or as may be hereafter concluded, between the United States and such foreign nations. The municipal legislation of the Hawaiian islands, not enacted for the fulfillment of the treaties so extinguished and not inconsistent with this joint resolution nor contrary to the constitution of the United States, nor to any existing treaty of the United States, shall remain in force until the congress of the United States shall otherwise determine.

"Until legislation shall be enacted extending the United States customs laws and regulations to the Hawaiian islands, the existing customs regulations of the Hawaiian islands with the United States and other countries shall remain unchanged.

"The public debt of the republic of Hawaii lawfully existing at the date of the passage of this joint resolution, including the amounts due to depositors in the Hawaiian postal savings bank, is hereby assumed by the government of the United States, but the liability of the United States in this regard shall in no case exceed \$4,000,000. So long, however, as the existing government and the present commercial relations of the Hawaiian islands are continued as heretofore provided said government shall continue to pay the interest on said debt.

"There shall be no further immigration of Chinese into the Hawaiian islands, except upon such conditions as are now or may hereafter be allowed by the laws of the United States, and no Chinese, by reason of anything herein contained, shall be allowed to enter the United States from the Hawaiian islands.

"The president shall appoint five commissioners, at least two of whom shall be residents of the Hawaiian islands, who shall, as soon as reasonably practicable, recommend to congress such legislation concerning the Hawaiian islands as they shall deem necessary or proper.

"Sec. 2. That the commissioners heretofore provided for shall be appointed by the president, by and with the advice and consent of the senate.

"Sec. 3. That the sum of \$100,000, or so much thereof as may be necessary, is hereby appropriated out of any money in the treasury not otherwise appropriated and to be immediately available, to be expended at the discretion of the president of the United States of America for the purpose of carrying this joint resolution into effect."

The debate on these resolutions began in the house on the 11th day of June and was continued until the 15th, when they passed by a vote of 209 to 91, six not voting although present. The following is the vote in detail:

The resolutions then went to the senate, where, by the dilatory tactics of the opponents of annexation, they remained until July 6, when they were passed by a vote of 12 to 21. The following is the vote in detail:

## REPUBLICAN AGAINST ANNEXATION.

Morrill.

The resolutions went to the president and were signed by him on the 7th of July, 1898. In accordance with the resolutions the president selected as the five commissioners who are to recommend to congress such legislation as they regard necessary and proper for the government of the new possessions the following: Senators Shelby M. Cullom (Rep.) of Illinois and John T. Morgan (Dem.) of Alabama, Representative Robert R. Hitt (Rep.) of Illinois, and Sanford B. Dole, president of Hawaii, and Walter F. Frear, representing Hawaii.

That this government has annexed the Hawaiian islands without the consent of the large majority of the native population is not to be denied. Upon this subject Rear-Admiral L. A. Beardslee, U. S. N., who, from being a long time stationed at Honolulu, is thoroughly competent to express an opinion, says in a recent article in the North American Review:

"That we have not obtained the full and free consent of these people seems to be a fact. Circumstances which occurred on and before annexation day, the 12th of August, indicate this very strongly. A short time before protests against annexation had been filed with both governments by political societies. On the day when annexation was consummated of the great number of the best of Honolulu people who, through social or official standing, were entitled to places on the great platform built on the steps of the executive building—formerly the palace of Hawaii's monarchs—to witness and participate in the ceremonies but one of the three principal classes into which Honolulu people are divided was present in any force, these, namely, who affiliated with or supported the party of which the government was formed. The other parties, the natives and half-whites, and the royalists, took no part, and among them were people whose official and social standing are such that their absence could not have been the result of accident. There were at the time in Honolulu the ex-Queen Liliuokalani, the ex-Dowager Queen Kapiulani, the ex-Princess Kalulani, and in the list I have before me as I write I cannot find their names nor the name of any of the prominent royalists, nor of a Hawaiian not attached to the government.

"The band of Hawaiian damsels who were to have lowered for the last time the Hawaiian flag as the government band played for the last time the Hawaiian ponol would not lower it. The band refused to play the ponol and loud weeping was the only music contributed by the natives. Very evidently there was dis-

cord, and as evidently the breach which had been made by the events of 1893 was not yet healed, the opposing factions into which the Hawaiian people had then been split had not coalesced. Beyond question, a large body of those who were to be governed did not consent to the new government." The native population that remains loyal to Queen Liliuokalani and opposed the union is estimated at about 40,000.

Aug. 12, 1898, was decided upon as the day for the ceremonies at Honolulu upon which the formal transfer of the islands to the United States should take place. The following is the press account of the proceedings:

"Every nationality was represented in the grounds of the executive building on the morning of Aug. 12 except the Hawaiian. The throng of sightseers began to arrive early, but no Kanakas came. At 10 o'clock the Hawaiian national guard marched to the water front to escort the men from the United States steamship Philadelphia to the grounds of the executive building. There were many Hawaiians in the guard, but they hoped to be able to avert their faces at the critical moment and so avoid seeing what they regarded as the death of their nation.

"The beautiful grounds of the executive building, planned for royal pastimes and never anticipating such a scene as this, were crowded with people. The seats had been arranged on the sward in the deep shade of the banana and bread-fruit trees. Since early in the morning these had been occupied by a medley of Chinese, Japanese and Portuguese, craning their necks to see the sights and caring not a jot that a nationality was to set that day. The guests of prominence were admitted to the balconies and to the platform that jutted over the drive, and men of the foreign office; literally staggering under pounds of gold braid, had as much difficulty in seating these people in the places assigned to them as if they had all been petty German princes at a Victorian jubilee. Heraldry is an art in Honolulu, and in spite of the mixture of blood, or, perhaps, because of it, they are sticklers in matters of precedence. On the platform, decorated with entwined Hawaiian and American flags, were seated all of Honolulu's official life, including the cabinet officials and their wives, the ministers and their wives, the judges and members of the legislature, the foreign diplomats and the navy officers. The long verandas and platform were as brilliant as flower beds with bright frocks of all imaginable hues and the white clothes of the men.

"At 11:45 President Dole and his cabinet appeared, followed immediately by United States Minister Sewall, Admiral Miller, U. S. N., and his staff. These took their appointed places and every one stood while the last prayer of the provisional government was said. The Rev. G. L. Pearson of the First Methodist church was appointed to say it, and the crowd maintained an almost reverent silence as he spoke. The men from the Philadelphia, the Hawaiian national guard, the members of the citizens' guard and the sharpshooters, who were seated behind them, bent their heads while a blessing was asked on this union of America and Hawaii.

"Then came the formal transfer of sovereignty. Mr. Sewall, United States minister, had been carrying under his arm a square

blue envelope of official appearance, and this he handed to President Dole, with the information that it contained the joint resolution of annexation. President Dole received the envelope and said:

"A treaty of peaceful union having been made in the interest of the Hawaiian body politic, with full confidence in the honor justice and friendship of the American people we yield up to you as the representative of the government of the United States the sovereignty and public property of the Hawaiian Islands."

"Mr. Sewall accepted the gift in the name of the people of the United States and every American there felt richer than before. The minister then called on the admiral to do his duty, and at a signal from President Dole the Hawaiian band played the first notes of 'Hawaii Ponoi,' the national anthem, while vigorous wig-wagging from the American sailors made it certain that in a second or two they would begin the salute to the Hawaiian flag. Chopin's funeral march was never more melancholy than the notes of this national melody. The natives in the band had begged to be released from playing it and could be seen feeling round the corner seeking to get away from sight of their beloved flag.

"In a moment guns were roaring their last good-bye and the flag of Hawaii was shivering convulsively at the top of the masts. Another moment and it was slowly settling to earth and all eyes were bent upon it. There went up a fluttering sigh from thousands of people. Just as it neared the ground and was caught in the arms of its friends Admiral Miller signaled and the blare of an American bugle rent the air. It was a call to colors.

"Then began to roll up from the ground a magnificent American flag, so ample, so soft in coloring that it seemed to drape the whole front of the building in its ascent. At sight of it there did not burst forth cheers as there would in more northern latitudes, but the Philadelphia's band hailed it with 'The Star-Spangled Banner,' and when it reached its lofty place there came a hearty hurrah from the American throats while a rain of tears coursed over the face of those Hawaiians who had witnessed the change of emblems.

"The president's proclamation, read by Minister Sewall, followed almost immediately. It made no change of officials, leaving the personnel of the government the same as before. The minister's speech came next, and then the solemn oath of allegiance to the United States was taken by Mr. Dole and his cabinet, the uplifted hands of some officials trembling as if with palsy.

"The next scene in the annexation drama was at the barracks, which were once the king's. Drawn up in a hollow square Hawaii's national guard took the oath, while a multitude looked on. The men who wished to swear allegiance were ordered to uncover and raise their right hands. Some refused to abjure their allegiance and stood with covered heads while the rest were swearing. Later Gov. Dole presented to the men the faded and historic flag, no less one than that which was carried by the marines of the Boston when they landed here in 1893. About the same time there was run up on the judiciary building the identical flag that Commissioner Blount ordered down on a memorable occasion."

Tobacco and snuff, manufactured—12 cents per pound.

Cigars and cigarettes:

Cigars weighing more than three pounds per 1,000—\$3.50 per M.

Cigars weighing not more than three pounds per 1,000—\$1 per M.

Cigarettes weighing more than three pounds per 1,000—\$3.50 per M.

Cigarettes weighing not more than three pounds per 1,000—\$1.50 per M.

**DEALERS AND MANUFACTURERS OF TOBACCO AND CIGARS.**

[To take effect from date of act.]

Dealers in leaf tobacco and manufacturers of tobacco:

When annual sales do not exceed 50,000 pounds—\$5.

When annual sales exceed 50,000 and do not exceed 100,000 pounds—\$12.

When annual sales exceed 100,000 pounds—\$24.

Dealers in tobacco whose annual sales exceed 50,000 pounds—\$12.

Manufacturers of cigars:

When annual sales do not exceed 100,000 cigars—\$5.

When annual sales exceed 100,000 and do not exceed 200,000—\$12.

When annual sales exceed 200,000—\$24.

**STAMP TAXES.**

[To take effect July 1, 1898.]

Bonds, debentures or certificates of stock and indebtedness issued after July 1, 1898, on each \$100 of face value—5 cents.

Certificates of stock, original issues of, on organization or reorganization, on each \$100 of face value or fraction thereof—5 cents.

Sale, or agreement to sell stock in any association, company or corporation, on each \$100 of face value or fraction thereof—5 cents.

Sale, or agreement to sell any products of

merchandise at any exchange, board of trade or similar place:

For each \$100 in value—1 cent.

For each additional \$100 or fraction thereof—1 cent.

Bank check, draft or certificate of deposit not drawing interest, or money order at sight—2 cents.

Bill of exchange (inland), draft, certificate of deposit drawing interest, or money order other than at sight or on demand, or promissory note (except bank notes) and original domestic money orders issued by the United States after July 1, 1898:

For a sum not exceeding \$100—2 cents.

For each additional \$100 or fraction thereof—3 cents.

Bill of exchange (foreign) or letter of credit (including orders by telegraph, or otherwise, for the payment of money issued by express, or other companies, or any person), drawn in, but payable out of the United States:

If drawn singly or otherwise than in a set of three or more—

Not exceeding \$100—4 cents.

For each additional \$100 or part thereof—1 cent.

If drawn in sets of two or more—

For every bill of each set not exceeding \$100—2 cents.

For each additional \$100 or part thereof—2 cents.

Bill of lading or receipt (other than charter party) for merchandise for export—1 cent.

Bill of lading, manifest, or receipt, and each duplicate thereof, express and freight—1 cent.

Telephone messages costing 15 cents or over—1 cent each.

Bonds of indemnity—50 cents.

Certificates of profit and transfers thereof on each \$100 or part of—2 cents.

Certificates issued by port warden or surveyor—25 cents.

Certificates, all other, required by law, no elsewhere specified—10 cents.

Charter contracts or agreements, or renewals or transfers of:

For vessels not exceeding 300 tons—\$3.

For vessels exceeding 300 and not exceeding 600 tons—\$5.

For vessels exceeding 600 tons—\$10.

Broker's note or memorandum of sale—1 cent.

Conveyance deed or instrument or written transferring realty:

When value exceeds \$100 and does not exceed \$500—50 cents.

For each additional \$500 or fraction thereof—50 cents.

Telegraphic dispatch—1 cent.

Custom-house entry of merchandise:

Not exceeding \$100 in value—25 cents.

Exceeding \$100 and not exceeding \$500—1 cent.

Exceeding \$500—\$1.

Entry for withdrawal of merchandise from customs bonded warehouse—50 cents.

Life insurance policies (except any fraternal beneficiary society or order, or farmer purely local co-operative company or a association, or employees' relief associations operated on the lodge system, or local co-operation plan, organized and conducted solely by the members thereof for the exclusive benefit of its members and not for profit):

For each \$100 or fractional part of—cents.

On policies issued on weekly payment plan—40 per cent on amount of first weekly premium.  
Insurance policies (marine, inland, fire), except purely co-operative or mutual, on each dollar of the amount of premium— $\frac{1}{2}$  of 1 cent.

Insurance policies (casualty, fidelity and guaranty, on each dollar of amount of premium— $\frac{1}{2}$  of 1 cent.

Lease, agreement or contract for rent:

Not exceeding one year—25 cents.

Exceeding one year and not exceeding three years—60 cents.

Exceeding three years—\$1.

Manifest for entry or clearance of vessel for foreign port:

When registered tonnage does not exceed 300 tons—\$1.

When registered tonnage exceeds 300 tons and does not exceed 600 tons—\$3.

When registered tonnage exceeds 600 tons—\$5.

Mortgage or pledge of lands, estate or property, real or personal, or assignment, transfer, or renewal of:

Exceeding \$1,000 and not exceeding \$1,500—25 cents.

On each \$500, or fractional part of, in excess of \$1,500—25 cents.

Passage tickets from United States to foreign ports:

Costing not over \$30—\$1.

Costing more than \$30 and not over \$40—\$3.

Costing more than \$40—\$5.

Power of attorney, or proxy for voting at any election of officers of any incorporated company or association, except religious, charitable or literary, or public cemeteries—10 cents.

Power of attorney, other—25 cents.

Protests of notes, etc.—25 cents.

Warehouse receipt—25 cents.

Medicinal proprietary articles and preparations (on every packet, box, bottle, pot, phial, or other inclosure):

On retail value not exceeding 5 cents— $\frac{1}{4}$  of 1 cent.

Exceeding 5 cents and not exceeding 10 cents— $\frac{2}{3}$  of 1 cent.

Exceeding 10 cents and not exceeding 15 cents— $\frac{1}{2}$  of 1 cent.

Exceeding 15 cents and not exceeding 25 cents— $\frac{1}{2}$  of 1 cent.

Each additional 25 cents of retail price or fractional part thereof— $\frac{1}{4}$  of 1 cent.

Perfumery, cosmetics and other similar articles (on every packet, box, bottle, etc.):

On retail value not exceeding 5 cents— $\frac{1}{4}$  of 1 cent.

Exceeding 5 cents and not exceeding 10 cents— $\frac{2}{3}$  of 1 cent.

Exceeding 10 cents and not exceeding 15 cents— $\frac{1}{2}$  of 1 cent.

Exceeding 15 cents and not exceeding 25 cents— $\frac{1}{2}$  of 1 cent.

Each additional 25 cents or part of— $\frac{1}{4}$  of 1 cent.

Sparkling or other wines, bottled:

Each bottle containing one pint or less—1 cent.

Each bottle containing more than one pint—2 cents.

Chewing gum, or substitutes:

On each jar, box or other package, of not more than \$1 retail value—4 cents.

On each additional \$1 or part thereof—4 cents.

On every ticket sold for a seat in a palace or parlor car, or berth in a sleeping car—1 cent.

#### ANNUAL EXCISE TAX.

Corporation, company, person or firm refin-

ing petroleum or sugar, or owning or controlling any pipe line for transporting oil or other products where gross annual receipts exceed \$350,000—on gross amount of receipts in excess of \$350,000— $\frac{1}{4}$  of 1 per cent.

#### LEGACIES AND DISTRIBUTIVE SHARES OF PERSONAL PROPERTY.

[To take effect on date of act.]

- Where the person or persons entitled to beneficial interest shall be the lineal issue or lineal ancestor, brother or sister of deceased:

When the whole amount exceeds \$10,000 and does not exceed \$35,000—75 cents on each \$100.

When the whole amount exceeds \$35,000 and does not exceed \$100,000—\$1.125 on each \$100.

When the whole amount exceeds \$100,000 and does not exceed \$500,000—\$1.50 on each \$100.

When the whole amount exceeds \$500,000 and does not exceed \$1,000,000—\$1.875 on each \$100.

When the whole amount exceeds \$1,000,000—\$2.25 on each \$100.

- Where the person or persons entitled to beneficial interest shall be the descendant of a brother or sister:

When the whole amount exceeds \$10,000 and does not exceed \$25,000—\$1.50 on each \$100.

When the whole amount exceeds \$25,000 and does not exceed \$100,000—\$2.25 on each \$100.

When the whole amount exceeds \$100,000 and does not exceed \$500,000—\$3 on each \$100.

When the whole amount exceeds \$500,000 and does not exceed \$1,000,000—\$3.75 on each \$100.

When the whole amount exceeds \$1,000,000—\$4.50 on each \$100.

- Where the person or persons entitled to any beneficial interest shall be the brother or sister of the father or mother or a descendant of a brother or sister of the father or mother:

When the whole amount exceeds \$10,000 and does not exceed \$25,000—\$3 on each \$100.

When the whole amount exceeds \$25,000 and does not exceed \$100,000—\$4.50 on each \$100.

When the whole amount exceeds \$100,000 and does not exceed \$500,000—\$6 on each \$100.

When the whole amount exceeds \$500,000 and does not exceed \$1,000,000—\$7.50 on each \$100.

When the whole amount exceeds \$1,000,000—\$9 on each \$100.

- Where the person or persons entitled to beneficial interest shall be the brother or sister of the grandfather or grandmother or a descendant of the brother or sister of the grandfather or grandmother:

When the whole amount exceeds \$10,000 and does not exceed \$25,000—\$4 on each \$100.

When the whole amount exceeds \$25,000 and does not exceed \$100,000—\$6 on each \$100.

When the whole amount exceeds \$100,000 and does not exceed \$500,000—\$8 on each \$100.

When the whole amount exceeds \$500,000 and does not exceed \$1,000,000—\$10 on each \$100.

When the whole amount exceeds \$1,000,-  
000—\$12 on each \$100.

5. Where the person or persons entitled to beneficial interest shall be a person of any other degree of collateral consanguinity, or a stranger in blood, or a body politic or corporation.

When the whole amount exceeds \$10,000 and does not exceed \$25,000—\$5 on each \$100.

When the whole amount exceeds \$25,000 and does not exceed \$100,000—\$7.50 on each \$100.

When the whole amount exceeds \$100,000 and does not exceed \$500,000—\$10 on each \$100.

When the whole amount exceeds \$500,000 and does not exceed \$1,000,000—\$12.50 on each \$100.

When the whole amount exceeds \$1,000,-  
000—\$15 on each \$100.

## MIXED FLOUR.

[To take effect sixty days after passage of act.]

Person, firm or corporation making, packing or repacking—\$12 per annum.

On each barrel or package containing more than 38 pounds and not more than 196 pounds—4 cents per barrel or package.

On each half-barrel or package containing more than 49 pounds and not more than 98 pounds—2 cents per barrel or package.

On each quarter-barrel or package containing more than 24½ pounds and not more than 49 pounds—1 cent per barrel or package.

On each eighth-barrel or package containing 24½ pounds or less—½ cent per barrel or package.

## CUSTOMS DUTIES.

[To take effect on date of act.]

Tea imported from foreign countries—10 cents per pound.

## EXPORTS OF MINERAL OILS.

The large production of mineral oils in other parts of the world, while it has not reduced our exportation, has probably reduced the prices which our producers and exporters have been able to realize. The exports of oil in the year 1898 were practically double those of 1888 and three times those of 1878, but the money received for them was only about 25 per cent greater than that received either in 1878 or 1888. The total receipts for the 1,034,269,676 gallons of oil exported in 1898 were \$54,126,578, while for the 578,351,638 gallons exported in 1888 the receipts were \$47,042,409, and for the 328,841,303 gallons exported in 1878 the receipts were \$46,574,974. The average export value of refined illuminating oil was in 1872 24.9 cents per gallon; in 1878, 14.4 cents per gallon; in 1888, 7.9 cents per gallon, and in 1898, 5.2 cents per gallon, having thus fallen from 24.9 cents to 5.2 cents from 1872 to 1898. Notwithstanding this steady fall the production and exportation continues to increase, the exports having increased over 60,000,000 gallons in the last year over that of the preceding year and over 100,000,000 gallons over that of any earlier year, while the production for 1897 was 2,528,067,984 gallons, against 2,033,331,972 in 1894, 1,476,867,546 in 1890, 1,017,174,396 in 1886, 836,394,132 in 1880 and 510,825,588 in 1876. Thus, while the price has been steadily and rapidly falling, the quantity produced and the quantity exported have as steadily and rapidly increased. The production in 1897 was five times that of 1876 and the exportation of last year nearly five times that of 1876. Great as the fall in price has been, the exports of illuminating oil bring over \$1,000,000 a week into the country and have in the last twenty years added a round \$1,000,000,000 to our foreign sales.

The following table shows the quantity and value of our exports of mineral oils of all grades since 1876:

| Year.     | Gallons.    | Value.       |
|-----------|-------------|--------------|
| 1876..... | 221,955,308 | \$30,078,568 |
| 1877..... | 243,660,153 | 32,915,786   |
| 1878..... | 209,198,914 | 61,789,438   |
| 1879..... | 338,841,303 | 46,574,974   |
| 1880..... | 378,310,010 | 40,306,249   |
| 1881..... | 422,964,099 | 36,218,625   |
| 1882..... | 497,660,362 | 40,315,609   |

| Year.     | Gallons.      | Value.       |
|-----------|---------------|--------------|
| 1882..... | 559,954,590   | \$51,222,706 |
| 1883..... | 506,931,622   | 44,913,079   |
| 1884..... | 513,660,092   | 47,103,248   |
| 1885..... | 574,668,180   | 50,257,947   |
| 1886..... | 577,781,752   | 50,130,844   |
| 1887..... | 592,903,267   | 46,324,915   |
| 1888..... | 578,351,638   | 47,042,409   |
| 1889..... | 616,185,459   | 49,913,877   |
| 1890..... | 664,063,170   | 51,403,089   |
| 1891..... | 709,819,439   | 53,026,734   |
| 1892..... | 715,365,819   | 44,906,992   |
| 1893..... | 804,221,230   | 42,142,058   |
| 1894..... | 908,252,314   | 41,490,806   |
| 1895..... | 834,502,082   | 46,660,082   |
| 1896..... | 890,458,994   | 62,322,403   |
| 1897..... | 973,514,946   | 62,635,037   |
| 1898..... | 1,034,269,676 | 54,126,578   |

The following table showing the countries to which our oil has been exported in 1897 and 1898 indicates the wide distribution which this article of our commerce obtains:

## EXPORTS OF REFINED MINERAL OIL.

|                                         | Gallons.    | Value.        |

## POLITICAL MOVEMENTS OF THE YEAR 1898.

Arranged in the Order of Their Occurrence.

## BIMETALLIC LEAGUE OF THE OHIO VALLEY.

The second annual convention of this organization was held at Indianapolis, Ind., on the 7th of April. While nominally a financial gathering it was in fact political in its character and strongly advocated the nomination of Mr. Bryan for the presidency in 1900, while the sentiment among the delegates was strongly in favor of George Fred Williams of Massachusetts for the second place on the national ticket. Judge James P. Tarvin of Covington, Ky., presided, and the following resolutions were adopted:

"Resolved, by the League of Bimetallic Clubs of the Ohio Valley, in annual convention assembled at Indianapolis on April 7, 1898, That we regard the financial question as the paramount political issue of the day, and hereby pledge ourselves to continue the battle for bimetallicism until the free and unlimited coinage of both silver and gold at the present legal ratio of 16 to 1, with full legal tender quality, is secured, without waiting for the consent or co-operation of any other nation.

"We are unalterably opposed to the single gold standard and the so-called reform of the Indianapolis monetary convention and all kindred projects.

"We believe that congress alone has power to coin and issue money and that this power should not be delegated to individuals and corporations; that the power to control and regulate a paper currency is inseparable from the power to coin money, and that all currency intended to circulate as money should be issued and its volume controlled by the general government only.

"We invite the co-operation of all persons who believe that the financial question is the paramount political issue and urge that all other domestic questions be held in abeyance until the principles enumerated in the foregoing resolutions shall be embodied into law.

"We express our continued confidence in the brave and sagacious leader of the bimetallic forces in 1896, William Jennings Bryan, whose high character, eminent ability, unimpeachable integrity, dauntless courage, inspired with unparalleled devotion the democratic, free republican and populist hosts in 1896.

"We extend our sympathy to the struggling and starving Cuban patriots in their contest for liberty, and are in favor of immediate intervention by the United States to secure the absolute independence of the Cuban republic. And while we deprecate war, unless necessary to maintain the national honor and to enforce the rule of civilization and humanity in this hemisphere, we favor such a vigorous foreign policy as will preserve the dignity of the nation, secure proper respect for the stars and stripes and prevent in future the cowardly assassination of our brave and gallant sailors."

The following officers were chosen for the ensuing year: President, James P. Tarvin, Covington, Ky.; vice-presidents, N. R. Tucker of Ohio, F. J. Voorhies of Indiana, A. C. Bentley of Illinois; secretary, Allen C. Clark of Indiana; treasurer, Col. Shote of Ohio.

Louisville, Ky., was designated as the place for holding the convention of 1899.

## THE SOCIAL DEMOCRACY OF AMERICA.

This organization held a meeting in Chicago, Ill., in June, which resulted in a split. Mr. Debs and his followers retiring to another hall and organizing a new political party. The point of difference was the colonization scheme which Mr. Debs had once championed, but which experiment had satisfied him was chimerical and fatal to the purposes of the organization. The question of colonization came up, and after a night of rather bitter debate the convention upheld colonization by a vote of 52 to 34, when Mr. Debs and his followers withdrew. The leaders claim something like 4,000 members for the new organization. The following platform was adopted:

"Labor, manual and mental, being the creator of all wealth and all civilization, it rightfully follows that those who perform all labor and create all wealth should enjoy the fruit of their efforts. This is rendered impossible by the modern system of production. The fruits of co-operative labor are in a great measure appropriated by the owners of the means of production. This system is gradually extinguishing the middle class and necessarily leaves but two classes in our country—the large class of workers and the small class of great employers and capitalists. The producers can never be in reality free until they become the owners of the means of production. This is possible in but two ways:

"1. Individual ownership, which has never been generally realized and which the industrial development is from day to day obliterating and rendering impossible.

"2. Social ownership, which has been made necessary by the development of the mode of production. The individual instrument, the tool, has developed into a social instrument, the machine. In order to conform to the change we must substitute social ownership for individual ownership of the means of production.

"This social control of the means of production must naturally follow the economic development. To accomplish the transition it is necessary that the producers of the country shall unite in an independent political party, the social democratic party of America, which aims to effect the change by all honorable means at the disposal of the producers, especially the ballot, which from a means of corruption and office-hunting must be transformed into a means of emancipation.

"To arrive at this end we declare in favor of the following demands:

"1. The public ownership of all industries controlled by monopolies, trusts and combines.

"2. The public ownership of all railroads, telegraphs, telephones, all means of transportation, communication, water works, gas and electric plants and all other public utilities.

"3. The public ownership of gold, silver, copper, lead, coal, iron and all other mines; also all oil and gas wells.

"4. Reduction of the hours of labor in proportion to the progress of production.

"5. The inauguration of a system of public works and improvements for the employ-

ment of the unemployed, the public credit to be utilized for that purpose.

"6. All useful inventions to be free to all, the inventor to be remunerated by the public.

"7. The people to provide honorable maintenance for aged and disabled toilers.

"8. Labor legislation to be made national instead of local and international where possible.

"9. National insurance of working people against accidents and lack of employment.

"10. Equal civil and political rights for women and the abolition of all laws discriminating against women.

"11. The adoption of the initiative and referendum and the right of recall of representatives by the voters; also minority representation.

"12. Abolition of war as far as the United States is concerned and the introduction of international arbitration instead.

"Draft of a farmers' programme—While in the field of industry the instruments of production have become centralized to such a degree that only in collective form can they be restored to the producers, this is by no means the case in the field of agriculture; here the main instrument of production—to wit, the soil—is generally the individual possession of the producer. We adopt the following platform for the purpose of uniting the workers in the country with those in the city:

"1. Nationalisation of all mortgages on land, the rate of interest to be lowered to cost price.

"2. The national credit to be at the disposal of the farmers for improvement of their land to the extent of half its value. Money to be issued for this purpose, which is to be destroyed when the instalments are paid.

"3. No more public land to be sold, but to be utilized by the United States or the state directly for the public benefit, or leased to farmers in small parcels of not over 640 acres, the state to make strict regulations as to improvement and cultivation. Forests and waterways to be put under direct control of the nation.

"4. Erection of grain elevators, magazines and cold-storage buildings by the nation to be used by the farmers at cost price.

"5. A uniform postal rate for the transportation of agricultural products on all railroads.

"7. Public credit to be at the disposal of counties and towns for the improvement of roads and soil and for irrigation and drainage. Money to be used for such purpose to be destroyed when repaid."

#### THE PEOPLE'S PARTY CONVENTION.

Pursuant to a call issued by the national organization committee of the people's party a convention was held in Cincinnati, O., on the 6th day of September. The delegates, numbering about 246, who were in attendance represented that wing of the party known as the "middle-of-the-road" or "non-fusionist" element. Ignatius Donnelly of Minnesota was chosen chairman of the convention. A committee on resolutions was appointed to present an address to the people of the United States and to formulate a platform. This committee was composed of the following named delegates:

Florida, F. H. Lytle; Georgia, W. J. McDaniel; Illinois, Ray Goodwin; Indiana, O. L. Ross; Kentucky, Jo A. Parker; Michigan, James E. McBride; Mississippi, Frank

Burkitt; Ohio, John Phalen; Pennsylvania, Wharton Barker; Tennessee, Horace Merritt; Minnesota, Ignatius Donnelly; Missouri, W. O. Atkeson; Arkansas, M. R. Coffman.

The committee presented the following address and platform, which were adopted:

"Prosperity is the first right of a people.

"The preamble of the constitution of the United States declares the purpose of that instrument to be to 'promote the general welfare'—in other words, to enrich the people and make them happy.

"Liberty is desired of all men, because it means equality of opportunity; and this means universal prosperity. Poverty, lacking liberty, is unable to defend itself against privilege.

"All history is but a record of the struggles of mankind to rise to happiness in the face of misgovernment.

"Labor in the ancient civilisations was but another name for slavery. All the workers in the forest, on the farm, in the shop and in the mine, were slaves.

"The monuments of Egypt still rear their massive fronts to heaven, enduring testimony to the enormities of injustice inflicted upon the workmen who built them.

"The producers of the wealth of Greece and Rome were denied happiness in life and heaven in death. They were regarded as soulless beings, forbidden to be present at the religious mysteries, and refused even the rights of sepulture.

"Their degraded estate was branded in their very faces, and when they became too numerous for their masters' safety they were slaughtered by thousands.

"The fact that they belonged to the same race, and even to the same families, as their owners did not in the least mitigate their sufferings. Nor was it considered any argument in behalf of the poor creatures that their outlawed caste had given birth to great geniuses and commanders, like Æsop, Probus, Vitellius, Diocletian, and even Augustus Cæsar.

"The producers of all food were hungry, the creators of all wealth were paupers, the manufacturers of all clothing were naked, the forgers of all weapons were defenseless.

"Out of their very faith in God were welded the chains that rendered them helpless; for they feared the denial of the sacred rites of sepulture more than they feared death itself, and the baseless hope of future bliss, in pagan heaven, were received by them as an equivalent for a life of continuous misery on earth.

"When these wretched beings, unable longer to bear the incalculable sufferings broke out in great insurrections, under Spartacus, Eunus, Athenion and others more than a million of them were crucified and left to rot on the public highways.

"The birth of the Christian religion was the first break of light amid the gloomy horrors of this awful spectacle. It came as an outburst from the depths of the oppress and servile class. Its Founder was a mechanic; His apostles fishermen. It preached to the multitude equality and universal brotherhood, the immortality of the soul and the love of a Heavenly Father. It scourged the money-changers out of the temple and consigned the wicked rich to the tortures of an eternal hell.

"The growth of Christianity was a successful insurrection of the poor and was adopted by the great only after it had embraced the great body of the people.

gradually abolished slavery, mitigated the evils of human selfishness and lifted up all mankind.

"The next step in this preordained advancement was the voyage of Columbus and the transfer of the best blood of the old world to the shores of the new. A flood of poor, hungry men struggled across the Atlantic, and, on terms of perfect equality and filled with the positive demands of liberty, spread themselves over the virgin land, kept void of inhabitants, therefore, by the providence of God.

"Then began a process of splendid development for which the previous experience of mankind had afforded no parallel. The genius of humanity cast away its chains and stepped forward into the light with a continent for an arena, surrounded by the glorious effulgence of universal prosperity.

"All who stood before it went down, and resistance was but a stepping-stone to nobler heights of development. The dreams of the poets and sages of antiquity were realized, and a government of equal rights and human brotherhood, enlightened by universal education, rose like a mountain before the gaze of the astonished world.

"From the Atlantic to the Mississippi the forests were brushed away and endless gardens and magnificent cities covered the land. The bodies and the minds of men were enlarged to nobler proportions and all the magnificent qualities of the human soul shone forth with resplendent luster.

"But the width of the Atlantic had not changed human nature. Into this paradise the old serpent of injustice drove the toiler himself. He took possession of the garden and drove the toiler from beneath his vine and fig tree. He changed the lovely scene into an abode of unhappiness, filled with lamentations.

"The census of 1890 showed that one-fourth of the dwellers in this land of free homes had become tenants. While population had in ten years increased 25 per cent and wealth 45 per cent the mortgaged indebtedness on the homes of the people had, in the period, advanced 156 per cent. The farm-owning families, despite the homestead law, had increased but 2½ per cent, while the tenants of land had increased 40½ per cent.

"It was shown by that census that 4,047 families owned \$12,000,000,000 of the wealth of the whole country. In other words, three one hundredths of 1 per cent of the people owned one-fifth of all the wealth, 9 per cent of the people owned 71 per cent of the entire property of the country, while the remaining 91 per cent owned but 29 per cent of the wealth. Bankruptcy, suicide and insanity had grown beyond all precedent.

"These facts struck terror to the souls of all thinking people.

"They asked themselves, If less than 100 years of national life, starting from an ideal condition of equality, under the noblest institutions ever known to man, had produced these terrible results, what would another hundred years bring forth?

"They perceived that the great American people were rapidly becoming landless, homeless and hopeless.

"They beheld the birth of that product of modern times—the corporation—an artificial creature, unknown to the ancient world; a demon possessed of all the attributes of God's creatures, but clothed with immortal life and boundless power. They saw it rise in a few generations from

nothingness to the control of congress, state legislatures, municipal governments, the avenues of public opinion, and all the instrumentalities of production and transportation. They saw it a government within the government—levying taxes and collecting revenues never voted by the people. They saw it lessening the opportunities of labor; driving the farmer from his farm and the workman from his bench, concentrating the earth's surface in the hands of a few and consigning the toiler to change and starvation.

"Thoughtful men looked down the vista of the future and saw the people returning to the awful conditions of pre-Christian slavery. To the evil rich Christ had become but a name; the horrid image of Moloch displaced the gentle Nazarene in the hearts of the rulers of the world.

"Appalled by the revelations of the census of 1890 the friends of mankind assembled in this city of Cincinnati on the 19th and 20th days of May, 1891, in a convention of 2,415 delegates from thirty-two states, and with vast enthusiasm and complete unanimity established the people's party of the United States.

"They adjourned until Feb. 22, 1892, to meet at St. Louis, a great assemblage, representing all the extensive labor organizations of farmers and mechanics, including those which met in St. Louis in 1889, the Ocala conference of 1890 and the Omaha assemblage of the Northwestern alliance held in 1891.

"It was there unanimously resolved that a new party should be established; the call was issued for a delegate convention, to be held at Omaha on the 4th of July, 1892, to place in nomination candidates for the presidency and vice-presidency.

"The slowly gathering discontent, extending over many years, found voice at last in the preamble and resolutions of that convention.

"They built the new party on the broadest and grandest principles. They declared that 'wealth belongs to him that creates it,' and that 'every dollar taken from industry without an equivalent is robbery.' They announced that 'the interests of rural and civic labor are the same, their enemies identical.'

"They declared:

"The conditions that surround us justify our co-operation; we meet in the midst of a nation brought to the verge of moral, political and material ruin. Corruption dominates the ballot box, the legislatures, the congress, and touches even the ermine of the bench. The people are demoralized. In most of the states have been compelled to isolate the voters at the polling places in order to prevent universal intimidation or bribery. The newspapers are subsidized, public opinion silenced, business prostrated, our homes covered with mortgages, labor impoverished and the land concentrating in the hands of capitalists. The urban workmen are denied the right of organization for self-protection; imported, pauperized labor beats down their wages; a hireling standing army, unrecognized by our laws, is established to shoot them down, and they are rapidly degenerating into European conditions. The fruits of the toil of millions are boldly stolen to build up colossal fortunes, unprecedented in the history of mankind, and the possessors of these in turn despise the republic and endanger liberty. From the prolific womb of gov-

ernmental injustice we breed two great classes—tramps and millionaires.

"They denounced both the old parties as equally responsible for the terrible condition of the people. The platform said:

"We have witnessed for more than a quarter of a century the struggles of the great parties for power and plunder, while grievous wrongs have been inflicted upon a suffering people. We charge that the controlling influences dominating both these parties have permitted the existing dreadful conditions to develop without serious efforts to prevent or restrain them. Neither do they promise us any substantial reform. They have agreed to ignore in the coming campaign every issue but one. They propose to drown the outcries of a plundered people with the uproar of a sham battle over the tariff, so that capitalists, corporations, national banks, rings, trusts, watered stocks, the demoralization of silver and the oppression of the users may all be lost sight of. They propose to sacrifice our homes and children on the altar of Mammon, to destroy the multitude in order to secure corruption funds from the millionaires."

"Upon this platform, with its familiar concluding demands, we went before the people, and after four months' campaign we polled 1,066,424 votes and carried four states and partially two more, receiving altogether twenty-two electoral votes. The democrats won in the contest and elected Grover Cleveland president by 277 electoral votes, against 145 for Benjamin Harrison. In the campaign both the old parties kept up their 'sham battle' over the tariff and studiously ignored the great issues raised by the people's party.

"In 1893 the Omaha platform received striking corroboration from the terrible panic which fell upon the country, sweeping away banks and business and plunging millions into bankruptcy. Mr. Cleveland's panacea of free trade did not relieve the sufferings of the people. In the elections of 1894 the democratic party was generally repudiated, and it became apparent that that venerable organization must find new issues or be borne to its everlasting resting place. There did not seem to be a state it was certain to carry in 1896.

"The people's party vote in 1894 and 1896 rose to nearly 2,000,000, and everything indicated its speedy national triumph.

"In this emergency the democratic party saw that it had no resource but to steal one of the principles of the despised populists, and after having persistently opposed the remonetization of silver in congress and defeating a dozen bills looking to that end it changed front in the twinkling of an eye, and in the Chicago convention of 1896, in a prearranged, theatrical scene of great uproar and enthusiasm, moved to the front as the devoted and lifelong champion of that which it had ever opposed.

"Having stolen one of the principles of our platform it became necessary to steal our votes and break up our organization. Hence, when the people's party national convention met, a tremendous pressure was brought to bear upon it to do what no political party had ever done in the history of our country—to wit, to nominate the candidates of another party for president and vice-president and stop in mid-career of its own tremendous growth and tie itself to the doubtful fortunes and still

more doubtful sincerity of a rival organization.

"In vain it was urged upon the convention that if we maintained our separate existence and nominated our own candidates we could still unite with any other party in support of a joint electoral ticket in every state.

"If this plan had been adopted the republican party would surely have been defeated, but democracy insisted that the battle must be won under their banner. Hence our noble candidate for vice-president was ostracized and pushed aside in behalf of a man whose every principle was in fundamental antagonism to the creed of our party, and our organization with its twenty-two electoral votes and nearly 2,000,000 voters was ignored and spat upon. Our nomination was thrown back in our faces by a telegram from the gentleman we had nominated; we were denied all recognition. The telegram of declination was not produced, but our votes were carefully exploited in the election which followed.

"By an extraordinary calamity a gentleman was made chairman of our national committee and commander-in-chief of our forces who had achieved success by a combination with republicans, and who was ready to equalize things by sacrificing our party to accomplish another unholy union with the democrats.

He preached disintegration and demoralization, just as Benedict Arnold stipulated for the scattering of the American forces; that the British might the more readily overthrow the young republic. Mr. Butler taught our forces the first duty of a soldier was to break ranks and go over to the enemy. It was as if Gen. Miles had issued orders to our troops at Santiago to tear down the American flag and merge into the Spaniards—because we all thought alike of the question of God and the immortality of the soul.

"All efforts to chain the boundless subtlety of this cunning man had been in vain. As late as Aug. 25, 1898, in a speech at Denver, Col., despite all previous compacts and promises, he urged all friends of free silver to act together, and he denounced those who were 'trying to divide its friends because they differed on other questions.' And yet he well knew that the republican and prohibitionists of Colorado and all the western states were also in favor of free silver, and that there was just as much reason to unite with them as with the democrats. He also knew that where a smaller and weaker party unites with a greater and stronger it is the inevitable union of the lion and the lamb. He knew that the experiment had nearly obliterated the people's party in several states and that he was leading the rest of those who trusted him into the abyss where repose the moldering bones of the greenback party. He well knew that the free-silver issue was but one of many planks of the people's party, and while desirable in itself could not bring the people relief if corporate power were to continue to rule the nation and plunder unchecked the industry of the land.

"Our chief battle is not against the demoralization of one metal for the benefit of another, but against the chaining of the world's progress to the car wheels of prehistoric superstition in the shape of both metals. The growth of population and the happiness of mankind are thus made con-

tingent upon accidental discoveries of two intrinsically worthless metals. The whole adoration of gold and silver is but a survival of pagan barbarism, more deadly in its effects than slavery, polygamy and witchcraft.

"While it is conceded that money is a governmental measure of value, and consists not in its material but in the stamp of the nation, the whole world is to-day held in check by a system of gold barter, while enterprise languishes, industry suffers and cemeteries are becoming populous with the bodies of bankrupts and suicides. Recognizing that a terrible emergency requires desperate remedies and that we must appeal to the highest qualities of the human mind and heart, and not in degrading 'dickers' and trades of scrambling politicians, we cast aside all precedents and go directly to the people. We commence anew the campaign of education which gave us, in the first two years of our existence, nearly 2,000,000 votes.

"We believe the soul is bigger than the pocketbook. We address ourselves to the reason of men and their love of country. We have nothing but kind words for democrats and republicans, individually. We beg them to join our ranks and help us fight the battles of mankind. For those who, eager for immediate results, have innocently left us and merged with the enemy and helped on our demoralization, we extend the open arms of invitation and reconciliation. We ask them for the sake of the great truths which fired their hearts in 1892 to be with us in 1898 and forever after. If the birth of our party was demanded by events six years ago circumstances clamor in thunder tones for its continuance to-day. The whole experiment of self-government is at stake. We are about to add to our population as many millions of alien and strange people as our whole voting force amounts to, and no one can say how soon these will be dragged to the ballot box by the money power to bury our liberties in universal ruin.

"By all the dreadful past of the world, by the memory of all the millions who ended lives of miserable enslavement in degraded graves, by the teachings and sacrifices of the martyred Christ, by the sufferings of the great revolution that made us a nation, by all the hopes of humanity all over this round globe, we implore our fellow-citizens to unite with us in one grand effort to build up a reform party that will liberate mankind.

"Our hearts go out to the wretched and oppressed of the whole world, and if placed in power in this country we shall try to do as to help all mankind.

#### PLATFORM OF THE REVIVIFIED PEOPLE'S PARTY.

"As a fundamental step to the preservation of our endangered liberties we demand that the reign of corruption shall cease in our legislative halls by the establishment of direct legislation. We must shorten the plow handles of government by bringing the legislator closer to his principals—so close that no lobbyist can intrude between them. Through the initiative and referendum all moral and political questions can be submitted to a fair and impartial vote of the people and if adopted by a majority of the voters become the law of the land.

"While we demand that if either gold or silver is to be used as money both shall be

so used, we insist that the best currency this country ever possessed was the full legal tender greenback of the civil war. And we look forward with hope to the day when gold shall be relegated to the arts of the country and the human family possess, free of tribute to bankers, a governmental full legal measure of value, made of paper, that will expand side by side with the growth of wealth and population. Then, and only then, will the people realize the full benefits of civilization and the world be made a garden of delights for mankind.

"We call attention to the public school system and the postal service as exemplifications of a beneficent state socialism which our people would only relinquish with their lives. And we demand that the carrying of messages written with pen and ink be amplified to embrace messages written by electricity, and that the train of cars which carries our letters be owned by the government to carry those who wrote the letters. No other reforms will avail much if corporations are permitted to say how much they shall take from the producers and how much they will leave them.

This is taxation without representation in its worst form. It is the disgrace of our republic that foreign despots have defended the right of the people in these particulars, while corruption has made self-government a helpless failure in this land. We believe in the collective ownership of those means of production and distribution which the people may elect, such as railways, telegraphs, telephones, coal mines, etc.

"We are opposed to individuals or corporations fastening themselves, like vampires, on the people, and sucking their substance, and we demand that whatever can be better done by government for the enrichment of the many shall not be turned over to individuals for the aggrandizement of the few.

"Hence we insist that banks have no more right to create our money than they would have to organize our army or pass our laws.

"We reaffirm the fundamental principles of the Omaha platform and declare it to be the immutable creed of our party, coeval with it in birth and filled with the spirit that launched it on its grand career. It must not be whittled away or traded off for offices. The man who proposes to do this is an enemy of mankind; he would sell the kingdom of heaven for a mess of pottage.

"In order to maintain the liberties of the people we must preserve their homes, and we therefore demand laws in the several states exempting the homes of the people from taxation absolutely in a sum not less than \$2,000, and a personal property exemption of not less than \$300 to each head of a family. To make up for this reduction of taxation we favor an income, inheritance and other like taxes.

"With malice toward none, with charity to all, with devotion to the rights as God gives us to see the right, we commit our cause to the hearts and consciences of the American people."

After the adoption of the address and platform the convention proceeded to the nomination of candidates for the presidency and vice-presidency. Upon a call of the states Mr. Rahilly of Minnesota presented the name of Ignatius Donnelly; Dr. Fay of the same state and Mr. Burton of Illinois seconded the nomination. Florida yielding

to Michigan, Mr. Fogg of the latter state presented the name of Wharton Barker of Pennsylvania, Mr. McDaniel of Georgia and Mr. Kogan of Tennessee seconding the nomination. Mr. Houghwatt of Missouri presented the name of Frank Burkitt of Mississippi, but he declined. Nominations being declared closed, the roll was called by states and resulted in 123 4-5 votes for Barker and 117 1-5 votes for Donnelly, whereupon Mr. Donnelly moved to make the nomination unanimous, and Wharton Barker of Pennsylvania was declared to be the nominee of the convention for president of the United States.

The nomination of a candidate for vice-president being in order, Dr. Fay of Minnesota presented the name of Ignatius Don-

nely, whereupon the nomination was made by acclamation.

Capt. Burkitt of Mississippi moved the following resolutions, which were adopted: "Whereas, The sole object of this convention has been and is to secure to the rank and file of the people's party an absolute certainty that a straight populist ticket on a straight populist platform should be presented to them in 1900; therefore,

"Resolved, That the ticket nominated here to-day is subject to a referendum vote of the populists of the United States.

"Resolved, second, That the referendum vote above referred to shall be taken in accordance with the plan provided in the report of the committee on plan of organization made to this convention."

### CANADIAN-AMERICAN JOINT COMMISSION.

For several years the perplexing questions and disputes between the Canadian and United States governments have been increasing both in number and gravity. Some of these have at times assumed threatening aspects, and it has only been because both countries were determined to prevent a clash that serious complications have been avoided. With the purchase of Alaska by the United States the right of this government to protect the seals in the waters of the North Pacific was so energetically disputed both by Great Britain and Canada that an open rupture was seriously threatened, but after several attempts on the part of our government to bring about a peaceable solution of the question it is yet an open one. The boundary line between British Columbia and this country has been given an additional importance by the discovery of gold in the Klondike region and serious disputes over the collection of customs duties.

On the 30th of May, 1898, negotiations were begun in Washington with the view to the drawing of a treaty which would settle and dispose of all the questions in controversy between the two governments. The conference was conducted by Sir Julian Pauncefote, British ambassador, and Sir Louis H. Davies, Canadian minister of marine and fisheries, representing Great Britain and Canada, on the one hand, and on the other ex-Secretary of State John W. Foster and John A. Kasson, reciprocity commissioner, representing the United States. On the 26th of May an agreement was concluded between them for the creation of a joint commission, the members of which should be appointed by the executive branches of the two governments, to negotiate a treaty adjusting, so far as possible, all subjects of controversy between Canada and the United States. To defray the expenses of the commissioners congress appropriated the sum of \$50,000 and Quebec was designated as the place of meeting of the commissioners.

The president appointed as representatives of the United States Charles W. Fairbanks of Indiana, United States senator (Rep.); Charles J. Faulkner of West Virginia, United States senator (Dem.); Nelson Dingley of Maine, member of the house of representatives (Rep.); John A. Kasson of Iowa, United States reciprocity commissioner (Rep.); John W. Foster of the District of Columbia (Rep.); T. Jefferson Coolidge of Massachusetts.

The queen appointed as representatives of Great Britain and Canada Baron Herschell, lord high chancellor of England; Sir Wil-

frid Laurier, G. C. M. G., premier of Canada; Sir Richard Cartwright, K. C. M. G., Canadian minister of trade and commerce; Sir Louis Henry Davies, Canadian minister of marine and fisheries; Sir James T. Winter, premier of Newfoundland.

The first meeting of the joint commission was at Quebec on the 21st of August, 1898.

The principal questions for the consideration of the commission are as follows:

1. The questions in respect to fur seals in Bering sea and the waters of the North Pacific ocean.

2. Provisions in respect to fisheries off the Atlantic and Pacific coasts and in the waters of their common frontiers.

3. Provisions for the delimitation and establishment of the Alaska-Canadian boundary by legal and scientific experts, if the commission shall so decide, or otherwise.

4. Provisions for the transit of merchandise in transportation to or from either country, across intermediate territory of the other, whether by land or water, including natural and artificial waterways and intermediate transit by sea.

5. Provisions relating to the transit of merchandise from one country to be delivered at points in the other beyond the frontier.

6. The question of the alien labor laws, applicable to the subjects or citizens of the United States and of Canada.

7. Mining rights of the citizens or subjects of each country within the territory of the other.

8. Such readjustment and concessions as may be deemed mutually advantageous of customs duties applicable in each country to the products of the soil or industry of the other upon the basis of reciprocal equivalents.

9. A revision of the agreement of 1817 respecting naval vessels on the lakes.

10. Arrangements for the more complete definition and marking of any part of the frontier line by land or water where the same is now so insufficiently defined or marked as to be liable to dispute.

11. Provisions for the conveyance for trial or punishment of persons in the lawful custody of the officers of one country through the territory of the other.

12. Reciprocity in wrecking and salvage rights.

Other questions relating to the United States and Canada will undoubtedly be brought before the commission as the work goes forward. The findings will be submitted in the form of a treaty for the approval of the senate of the United States and of Great Britain.
